EFFECT OF SOME PROCESSED ORGANIC RESIDUES ON SOIL PROPERTIES AND GROWTH OF TOMATO AND PEPPER

By

Magdy Mohamed Ibrahim Nassr

B.Sc. Soil Science, Fac. Agric., Kafr El-Sheikh, Tanta University, 1978

Thesis

*Submitted in Partial Fulfillment of the Requirements for the Degree
of*

Master of Science

In

Soil Science

*Faculty of Agriculture
Kafr El-Sheikh
Tanta University*

B
A-ET

Approval Sheet

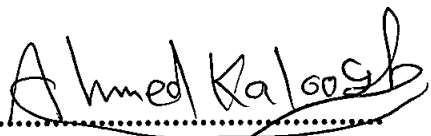

Thesis Title : Effect of some processed organic residues on soil properties and growth of Tomato and Pepper

Name : Magdy Mohamed Ibrahim Nassr

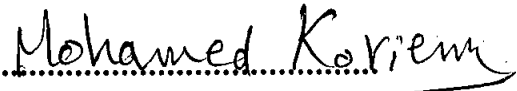

Approved by

Prof. Dr. Taha M. El-Essawi..... 

*Prof. of Soil Science, Faculty of Agriculture, Kafr El-Sheikh,
Tanta University*

Prof. Dr. Ahmed Ahmed Kalooish..... 

*Prof. of Soil Science, Faculty of Agriculture
Alex. University*

Prof. Dr. Mohamed Ahmed Koriem..... 

*Prof. of Soil Science, Faculty of Agriculture, Kafr El-Sheikh,
Tanta University*

Prof. Dr. Mohamed Radwan Khalifa..... 

*Prof. of Soil Science, Faculty of Agriculture, Kafr El-Sheikh,
Tanta University*

ACKNOWLEDGMENT

The author wishes to express his profound gratitude and sincere appreciation to Prof. Dr. Taha M. El-Essawi, Dept. of Soil Sci., Faculty of Agric., Kafr El-Sheikh, Tanta Univ. for Suggesting the research points, the problems of study, continuous help, careful supervision, the great effort and time he offered for revising the manuscript and keen guidance throughout the work.

Deep appreciation and sincere thanks to Prof. Dr. Mohamed Radwan Khalifa, Prof. of Soil Science, Faculty of Agriculture, Kafr El-Sheikh, Tanta University for sincere supervision, objective criticism, continuous help, keen revising the manuscript and guidance throughout the work.

I wish also to express my deep thanks to Prof. Dr. Bassiouny Ismail El-Sawy, Professor of Vegetable Crops, Faculty of Agric., Kafr El-Sheikh, Tanta Univ. for sincere supervision, keen revising the manuscript and help throughout the work.

Thanks are also for Prof. Dr. M.S. Shams, Head and Prof. of Soil and Water Sciences, Faculty of Agriculture, Kafr El-Sheikh, Tanta University.

Special thanks and gratitudes to Prof. Dr. Farok I. Zein, Head of Soil Chemical and Physics Res. Dept., Agric. Res. Sta., Sakha, Egypt.

Thanks are all staff members of Soil and Water Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University and all staff members of Sakha Agric. Res. Sta. especially Prof. Dr. Sayed Amer, for his help in Statistical Analysis.

Thanks to my parents and family, for their great help and encourage and for every thing they did for me.

1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1. Effect of different organic amendments application on some soil chemical properties.....	3
2.1.1. Soil pH.....	3
2.1.2. Soil salinity (EC).....	3
2.1.3. Organic-c and organic matter.....	4
2.1.4. Soluble ions, SAR and ESP	4
2.1.5. Soil Nitrogen (total-N).....	4
2.1.6. Soil phosphorus and potassium	6
2.1.7. Micro-elements in soils.....	6
2.2. Effect of different organic amendments application on some soil physical properties	8
2.3. Effect of different organic amendments application on some vegetative growth characters of plants.....	10
2.3.1. Growth characters	10
2.3.2. Early fruit yield	12
2.3.3. Morphological characters of fruits.....	15
2.3.4. Leaves and fruit contents of macro elements	16
2.3.5. Some micro elements in plants and fruit	28
3. MATERIALS AND METHODS	28
3.1. Sources of used biosolids	28
3.2. Sources of experimental soils.....	28
3.3. Sources of seeds used.....	28
3.4. The plan of experimental study.....	28
3.4.1. Part A: Preparation and processing of pellets.....	28
3.4.2. Treatment used	31
3.4.3. Part. B: Pots experiment.....	33

3.5.	Methods of analysis.....	33
3.5.1.	Soil analysis.....	33
3.5.2.	Characterization of experimental plants	35
4.	RESULTS AND DISCUSSIONS	37
	Characterization of used biosolids:	
4.1.	Some soil chemical properties after harvesting pepper and tomato plants	38
4.1.1.	Clay soil.....	38
	a. Soil pH.....	38
	b. Electrical conductivity (EC, dS/m ⁻¹).....	41
	c. Organic C and organic matter (OM %) contents in soil	44
	d. Soluble cations and anions.....	49
	e. SAR and ESP	50
	f. Total nitrogen (TN).....	50
	g. Available phosphorus (P) and potassium (K) in soil	55
	h. Soil contents of micro elements.....	58
4.1.2.	Loamy soil.....	59
	a. Soil pH.....	59
	b. Electrical conductivity (EC, dS/m-1)	59
	c. Organic C and organic matter (OM) contents in soil	64
	d. Soluble cations and anions (meq/L)	69
	e. SAR and ESP in soil	69
	f. Total nitrogen (TN).....	72
	g. Available phosphorus (P) and potassium (K).....	72
	h. Available micro elements in soils.....	75
4.1.3.	Sandy soil	80
	a. Soil pH.....	80

b. Soil salinity (EC, dS/m-1).....	80
c. Organic C and organic matter (OM %) contents in soil.....	80
d. Soluble cations and anions in soil (meq/L)	87
e. SAR and ESP in soil	88
f. Total nitrogen (TN).....	88
g. Available phosphorus (P) and potassium (K)	93
h. Available micro elements	93
4.2. Some soil physical properties of the different studied soil after harvesting pepper and tomato plants	96
4.2.1. Clay soil.....	96
a. Aggregation parameters	96
b. Soil bulk density (D_b), gm/cm ³	106
c. Saturated hydraulic conductivity (K_s), cm/hr ...	106
d. Total porosity, %.....	110
4.2.2. Loamy soil.....	112
a. Aggregation parameters	112
b. Soil bulk density (D_b), gm/cm ³	121
c. Saturated hydraulic conductivity (K_s), cm/hr ...	122
d. Total porosity, %.....	122
4.2.3. Sandy soil	127
a. Aggregation parameters	127
b. Soil bulk density (D_b), gm/cm ³	135
c. Saturated hydraulic conductivity (K_s), cm/hr ...	137
d. Total porosity, %.....	137
4.3. Effect of biosolid applications on growth and yield of pepper and tomato plants	142
4.3.1. Clay soil.....	142
1.a. Some growth parameters of pepper and tomato plants.....	142

b.	Early fruits yield.....	147
c.	Morphological characters of fruits (physical properties)	150
d.	Macro-nutrients in pepper and tomato leaves .	152
e.	Macro-elements in fruits	153
f.	Micro elements in fruits	154
4.3.2.	Loamy soil	155
a.	Growth parameters	155
b.	Early fruits yield.....	160
c.	Morphological characters of fruits	162
d.	Macro-nutrients in leaves	164
e.	Macro-elements in fruits	164
f.	Micro elements in fruits	165
4.3.3.	Sandy soil	166
a.	Growth parameters of pepper and tomato plants	166
b.	Early fruits yield.....	171
c.	Morphological characters of fruits	173
d.	Macro-elements in pepper and tomato leaves	175
e.	Macro-elements in fruits	176
