STUDIES ON SOME ENDOGENOUS DINUCLEOSIDE POLYPHOSPHATES AND THEIR EFFECTS ON THE CARDIOVASCULAR SYSTEM

Thesis

**SUBMITTED FOR THE Ph.D. DEGREE IN PHARMACEUTICAL SCIENCES
(PHARMACOLOGY)**

By

MAHMOUD MOHAMED KHATTAB

B.Pharm., M.Sc.

**ASSISTANT LECTURER, DEPT. OF PHARMACOLOGY & TOXICOLOGY
FACULTY OF PHARMACY
CAIRO UNIVERSITY**

**UNDER THE SUPERVISION
OF**

PROF. DR. MOHAMED T. KHAYYAL

Professor of Pharmacology
Dept. of Pharmacology & Toxicology
Faculty of Pharmacy
Cairo University

PROF. DR. KARL-HEINZ RAHN

Professor & Chairman
Dept. of Internal Medicine D
Faculty of Medicine
Münster University, Germany

PROF. DR. SANAA A. KENAWY

Professor of Pharmacology
Dept. of Pharmacology & Toxicology
Faculty of Pharmacy
Cairo University

Faculty of Pharmacy
Cairo University
1997

3105

Approval Sheet

Title of Thesis: *STUDIES ON SOME ENDOGENOUS DINUCLEOSIDE POLYPHOSPHATES AND THEIR EFFECTS ON THE CARDIOVASCULAR SYSTEM.*

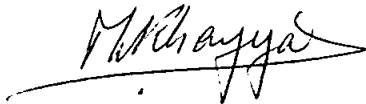

Presented By: *MAHMOUD MOHAMED KHATTAB* (B.Pharm., M.Sc.)

Assistant Lecturer, Dept. of Pharmacology and Toxicology, Faculty of Pharmacy,
Cairo University

Submitted For: The Ph.D. Degree in Pharmaceutical Sciences (Pharmacology)

Approved By:

1. Prof. Dr. M. T. Khayyal

Professor of Pharmacology, Faculty of Pharmacy, Cairo University

2. Prof. Dr. E. Haron

Professor of Pharmacology, Faculty of Medicine, Mansoura University

3. Prof. Dr. M.T. Ghonim

Professor of Pharmacology, Faculty of Medicine, Alexandria University

B

(Committee in Charge)

1-007

Date: 4/10/1997

Acknowledgements

I am greatly indebted to **Prof. Dr. M.T. Khayyal**, Prof. of Pharmacology, Faculty of Pharmacy, Cairo University. He has strongly motivated me during all phases of this work, helped me keep up my enthusiasm throughout. I have learnt from him basic pharmacological concepts and enjoyed his open-minded scientific discussions.

I am also deeply grateful to **Prof. Dr. K-H. Rahn**, Prof. and Chairman of Internal Medicine Dept., Faculty of Medicine, Münster University, Germany. I feel privileged to have worked under his supervision and enjoyed the family atmosphere in his department for nearly two years. During that time, I can not fail to acknowledge the help and motivation afforded to me by **Prof. Dr. E. Schlatter**, Chairman of Experimental Nephrology Dept., Faculty of Medicine, Münster University, Germany. I am also thankful to all my colleagues and members of the Experimental Nephrology Dept. for providing me with the ideal friendly and scientific atmosphere. My thanks are also to **Dr. H. Hohage**, Münster University, for helping me with the up-dated techniques.

It is a pleasure to express my deep gratitude to **Prof. Dr. Sanaa A. Kenawy**, Prof. of Pharmacology, Faculty of Pharmacy, Cairo University for her continuous encouragement, lending me a lot of support throughout this work.

I would like also to extend my appreciation to **Prof. Dr. W. Zidek**, Prof. of Internal Medicine, Faculty of Medicine, Münster University, for his kind supervision during the in-vitro part of this study as well as to **Dr.H. Schlüter**, Chemist and Biochemist, Faculty of Medicine, Münster University, for his helpful advice.

Last but not least I would like to thank the Egyptian Ministry of Education and the Education and Culture Mission of the Egyptian Embassy in Bonn, Germany for supporting me with the scholarship during my stay in Germany.

CONTENTS

INTRODUCTION

I. Purinergic Mechanisms and Receptors	1
• Purine Hypothesis	2
• Purinoceptors	5
- P ₁ Purinoceptors (Receptors for Adenosine)	6
- P ₂ Purinoceptors (Receptors for ATP)	10
- P ₃ Purinoceptors (Receptors for Adenosine and ATP)	15
- P ₄ Purinoceptors (Receptors in the Nervous System for AP _n A).....	17
II. Diadenosine Polyphosphates	18
• Storage and Release	19
• Catabolism	21
• Pharmacological Activity	24

<u>Aim of the Work</u>	34
------------------------------	----

<u>MATERIALS AND METHODS</u>	36
------------------------------------	----

A. <i>In-Vitro</i> Experiments on the Isolated Perfused Rat Kidney.....	37
B. <i>In-Vivo</i> Experiments on the Haemodynamics of Anaesthetised Rats ...	40

RESULTS

A. <i>In-Vitro</i> Experiments on the Isolated Perfused Rat Kidney.....	48
B. <i>In-Vivo</i> Experiments on the Haemodynamics of Anaesthetised Rats	59

DISCUSSION

1. Isolated Perfused Rat Kidney (<i>In-Vitro</i>).....	106
2. Haemodynamic Effects of Diadenosine Polyphosphates (<i>In-Vivo</i>)...	112

<u>SUMMARY AND CONCLUSIONS</u>	123

<u>ARABIC SUMMARY</u>	--
-----------------------------	----

LIST OF TABLES

1. Original Criteria for Distinguishing P_1 - and P_2 -Purinoceptors	6
2. Main Characteristics of A_1 - and A_2 - Subclasses of Adenosine receptors (P_1 -Purinoceptors)	7
3. Main Characteristics of the P_{2X} and P_{2Y} Subclasses of P_2 -Purinoceptors	10
4. Maximal Effect of Sodium Nitroprusside (SNP), Norepinephrine (NE) and Diadenosine Pentaphosphate (AP_6A) on Mean Arterial Blood Pressure(MABP), Heart Rate (HR), Renal Blood Flow (RBF) and Femoral Blood Flow (FBF)	61
5. Effect of AP_4A on Mean Arterial Blood Pressure (mm Hg)	64
6. Effect of AP_5A on Mean Arterial Blood Pressure (mm Hg)	65
7. Effect of AP_6A on Mean Arterial Blood Pressur (mm Hg)	66
8. Effect of AP_4A , AP_5A and AP_6A on Heart Rate (bpm)	67
9. Effect of AP_4A on Renal Bllod Flow (ml/min).....	82
10. Effect of AP_5A on Renal Bllod Flow (ml/min)	83
11. Effect of AP_6A on Renal Bllod Flow (ml/min)	84
12. Effect of AP_4A on Femoral Blood Flow (ml/min)	85
13. Effect of AP_5A on Femoral Blood Flow (ml/min)	86
14. Effect of AP_6A on Femoral Blood Flow (ml/min)	87
15. Effect of AP_4A on Renal Vascular Resistance (mm Hg/ml/min)	94
16. Effect of AP_5A on Renal Vascular Resistance (mm Hg/ml/min)	95
17. Effect of AP_6A on Renal Vascular Resistance (mm Hg/ml/min)	96
18. Effect of AP_4A on Femoral Vascular Resistance (mm Hg/ml/min) ...	98

19. Effect of AP₆A on Femoral Vascular Resistance (mm Hg/ml/min).... 99
20. Effect of AP₆A on Femoral Vascular Resistance (mm Hg/ml/min) 100

LIST OF FIGURES

1. How the Small Animal Transonic Flowmeter Works	45
2. Vessel Dimensions Independence	46
3. Vessel Alignment Insensitivity	46
4. Superficial Laser Probe	47
5. Dose-Response Effect of AP ₂ A, AP ₃ A, AP ₄ A, AP ₅ A and AP ₆ A on Changes in Perfusion Pressure of the Isolated Perfused Rat Kidney	49
6. Effect of Suramin (500 μ M) on the Change in Perfusion Pressure Induced by AP ₄ A, AP ₅ A and AP ₆ A in the Isolated Perfused Rat Kidney.....	51
7. Effect of Alpha,Beta-MeATP (1 μ M) on the Change in Perfusion Pressure Induced by AP ₄ A, AP ₅ A and AP ₆ A in the Isolated Perfused Rat Kidney.....	52
8. Effect of Suramin (500 μ M) on the Change in Perfusion Pressure Induced by AP ₂ A and AP ₃ A in the Isolated Perfused Rat Kidney	53
9. Effect of Alpha,Beta-MeATP (1 μ M) on the Change in Perfusion Pressure Induced by AP ₂ A and AP ₃ A in the Isolated Perfused Rat Kidney	54
10. Effect of PPADS (10 μ M) on the Change in Perfusion Pressure Induced by AP ₄ A, AP ₅ A and AP ₆ A in the Isolated Perfused Rat Kidney.....	56
11. Effect of 1,3-Dipropyl-8-Cyclopetyl-xanthine (CPDPX) (10 μ M) on the Change in Perfusion Pressure Induced by AP ₄ A, AP ₅ A and AP ₆ A in the Isolated Perfused Rat Kidney	57
12. Effect of 3,7-Dimethyl-1-Propargyl-xanthine (DMPX) (10 μ M) on the Change in Perfusion Pressure Induced by AP ₄ A, AP ₅ A	

and AP ₆ A in the Isolated Perfused Rat Kidney	58
13. Effect of Saline (0.5 ml) on Heart Rate (HR), Mean Arterial Blood Pressure (MABP), Renal Blood Flow (RBF) and Femoral Blood Flow (RBF)	60
14. Dose-Response Effect of AP ₄ A, AP ₅ A and AP ₆ A on Heart Rate (HR) and Mean Arterial Blood Pressure (MABP)	68
15. Effect of AP ₄ A 0.75 mg/kg on Heart Rate (HR), Mean Arterial Blood Pressure (MABP), Cardiac Output (CO) and Total Peripheral Resistance (TPR)	70
16. Effect of AP ₄ A 0.75 mg/kg on Mean Arterial Blood Pressure (MABP) and Heart Rate (HR)	71
17. Effect of AP ₄ A 0.75 mg/kg on Cardiac Output (CO) and Total Peripheral Resistance (TPR)	72
18. Effect of AP ₅ A 0.75 mg/kg on Heart Rate (HR), Mean Arterial Blood Pressure (MABP), Cardiac Output (CO) and Total Peripheral Resistance (TPR)	74
19. Effect of AP ₅ A 0.75 mg/kg on Mean Arterial Blood Pressure (MABP) and Heart Rate (HR)	75
20. Effect of AP ₅ A 0.75 mg/kg on Cardiac Output (CO) and Total Peripheral Resistance (TPR)	76
21. Effect of AP ₆ A 0.75 mg/kg on Heart Rate (HR), Mean Arterial Blood Pressure (MABP), Cardiac Output (CO) and Total Peripheral Resistance (TPR)	78

22. Effect of AP₆A 0.75 mg/kg on Mean Arterial Blood Pressure (MABP) and Heart Rate (HR)	79
23. Effect of AP₆A 0.75 mg/kg on Cardiac Output (CO) and Total Peripheral Resistance (TPR)	80
24. Effect of AP₄A 0.75 mg/kg on Renal Blood Flow (RBF), Superficial Renal Microcirculation (SRMC) and Femoral Blood Flow (FBF).....	89
25. Effect of AP₆A 0.75 mg/kg on Renal Blood Flow (RBF), Superficial Renal Microcirculation (SRMC) and Femoral Blood Flow (FBF).....	90
26. Effect of AP₆A 0.75 mg/kg on Renal Blood Flow (RBF), Superficial Renal Microcirculation (SRMC) and Femoral Blood Flow (FBF).....	93
27. Dose-Response Effect of AP₄A, AP₆A and AP₈A on the Maximal Increase in Renal Vascular Resistance (RVR).....	97
28. Effect of AP₄A 0.75 mg/kg on Femoral and Renal Vascular Resistance	102
29. Effect of AP₆A 0.75 mg/kg on Femoral and Renal Vascular Resistance	103
30. Effect of AP₆A 0.75 mg/kg on Femoral and Renal Vascular Resistance	105
