A Pharmacological study of the effect(s) of Garlic and/or Ginseng on LPS induced Cardiotoxicity in Rats

Thesis

Submitted for master degree in Pharmaceutical Sciences
(Pharmacology & Toxicology)

By

Eman Abd Al-Hameid Hussein Mahmmoud

B.Pharm.Sci.

Faculty of Pharmacy

Cairo University

National Organization For Drug Control And Research

Under the Supervision of

Prof. Dr. Hekma A. Abd EL Latif
Prof. & head of Pharmacology and Toxicology
Department.
Faculty of Pharmacy
Cairo University

Prof. Dr. Salwa Abdallah Metwally
Prof. of Pharmacology and Toxicology
National Organization For Drug
Control and Research.
(NODCAR)

Faculty of Pharmacy
Cairo University
2010

Thesis Approval Committee:

Signature

1- Prof. Dr. Hekma A. Abd El Latif

Professor & Head of Pharmacology and Toxicology Department
Faculty of Pharmacy
Cairo University

Hekma A. Abd El Latif

2- Prof. Dr. Afaf A. Ain -Shoka

Professor of Pharmacology and Toxicology
Faculty of Pharmacy
Cairo University

Afaf A. Ain -Shoka

3- Ass. Prof. Mohamed Ahmed El Moselhy

Associated Professor of Pharmacology and Toxicology
Faculty of Pharmacy
Minia University

M. A. El Moselhy

Date: 14/10/2010

Prerequisite postgraduate course

Beside the work presented in this thesis, the candidate has attended the following courses for one year:

General courses

- Computer and its applications
- Literature search
- Scientific English language
- Basic statistics

Department courses

- Pathophysiology of diseases
- Pharmacometrics *on the basis of drugs and...*
- Toxicometrics
- Immunopharmacology

The candidate had successfully passed examinations in these courses with general grade "Good"

Prof. Dr. Hekma A. Abd El-Latif

Head of Pharmacology & Toxicology Department
Faculty of Pharmacology
Cairo University

Acknowledgment

Praise is to **Allah**, the most gracious, and the source of all knowledge by whose abundant grace this work has come to completion.

Words can not express my sincere appreciation to **Prof. Dr. Hekma A. Abd EL Latif** , professor and head of Pharmacology and Toxicology Department, Faculty of Pharmacy; Cairo University who supported me throughout my thesis and practical work, helped me to ensure myself confidence and regards me as a daughter rather than a student. I am heavily indebted to her tremendous effort, deep experience, the valuable time and generous assistance during all stages of this study.

I would like to express my deepest thanks, heartfelt appreciation and endless gratitude to **Prof. Dr. Salwa Abdallah Metwally**, Professor of Pharmacology and Toxicology, National Organization for Drug Control and Research, for her active supervision, enlightening thoughts, useful comments, efforts, kind relation and valuable time that she sacrificed for me during this work, without which I would have never been able to produce such a work.

A grateful thanks to **Dr. Mohamed Soliman**, Assistant lecturer of Intensive Critical Care medicine, Faculty of medicine, Cairo University, by the help of whom, description and interpretation of electrocardiography data was possible, also, for his support, effort and useful comments.

A word of thanks to **Dr. Amira El-sheikh**, Assistant Professor of Physiology, National Organization For Drug Control And Research, for her support.

My deepest thanks and appreciation to **Prof. Dr. Adel B. Khelosy**, Professor of Pathology, Faculty of Veterinary Medicine, Cairo University for his professional aid and meticulous guidance in the histopathological aspects of this thesis.

Last but not least, I would like to express grateful thanks to my family members for their love and prayers.

Eman Abd Al-Hameid Hussein
