Physiological Role of Fenugreek Seeds as Biological Control for Tomato Wilt Disease.

THESIS

**Submitted in Partial Fulfillment of
Requirement for the Degree of Master of
Science in Botany
(M.Sc.)
(Plant Physiology)**

By

Mahmoud Madany Yousif Madany

B.Sc. (2003)

**Botany Department, Faculty of Science,
Cairo University**

B

KAVK

(2009)

APPROVAL SHEET

Title of the M.Sc. Thesis

Physiological Role of Fenugreek Seeds as Biological Control for Tomato Wilt Disease.

Name of the Candidate

Mahmoud Madany Yousif Madany

Submitted to

Botany Department, Faculty of Science, Cairo University

Supervision Committee

Prof. Dr. Maimona A. Kord

Professor of Plant Physiology, Botany Department, Faculty of Science,
Cairo University.

Mamy

Prof. Dr. Shahnaz A. M. Al-Wakeel

Professor of Plant Physiology, Botany Department, Faculty of Science,
Cairo University.

Shahnaz Al-Wakeel

Prof. Dr. Mohamed Hani Moubasher

Professor of Microbiology, Botany Department, Faculty of Science,
Cairo University.

Mobash

Prof. Dr. Effat Shabana

Head of the Botany Department.,
Faculty of Science,
Cairo University.

Effat Shabana
6-7-2009

A part from the work, carried out in this thesis, the candidate had attended post graduate courses for one academic year covering the following topics:

Subject	
1. Biochemistry.	7. Biostatistics.
2. Enzymology.	8. Radiobiology.
3. Plant Water Relations.	9. Plant Tissue Culture.
4. Plant Mineral Nutrition	10. Nitrogen Fixation.
5. Growth Regulation.	11. German Language.
6. Analytical Chemistry.	-----

He had successfully passed a written examination in studied courses.

Head of the Department

Prof.Dr. Effat Shabana

DEDICATION

- ✓ *This thesis is dedicated to my family, my wife and my daughter Mariam.*
- ✓ *Also a special dedication to my supervisor Prof. Dr. Shahnaz A. M. Al-Wakeel for her help, guidance and support.*

ACKNOWLEDGEMENTS

First of all, I'd like to thank *ALLAH* Almighty, without his mercy and guidance this work would never been started nor completed.

Second, I wish to acknowledge with deep gratitude and great regards

Prof. Dr. Maimona A. Kord

Professor of Plant Physiology, Botany Department, Faculty of Science, Cairo University for her encouragements and help her offers to complete this work.

With many thanks, I am also indebted to

Prof. Dr. Shahnaz A. M. Al-Wakeel

Professor of Plant Physiology, Botany Department, Faculty of Science, Cairo University for her supervising this work and for her critical comments and guidance during preparation this thesis and her unlimited consistent advises she offered in most of the aspects presented through this work.

I also would like to express my thanks and gratitude to

Prof. Dr. Mohamed Hani Moubasher

Professor of Microbiology, Botany Department, Faculty of Science, Cairo University for his direct supervision and scientific support.

Finally, I hope to extend my thanks to all my colleagues specially my dear friend Ahmad M. Saleh

Contents

<i>ABSTRACT</i>	
<i>INTRODUCTION</i>	01
<i>AIM OF THE WORK</i>	16
<i>MATERIALS AND METHODS</i>	17
I. PLANT MATERIALS	17
1. Preparation of Fenugreek Seed Extract	17
2. Preparation of Spore Suspension	18
II. PRELIMINARY EXPERIMENT	18
III. GREENHOUSE POT EXPERIMENT	18
1. Growth Measurements	20
2. Photosynthetic Pigments	20
IV. BIOCHEMICAL ANALYSES	22
1. Phenolic Analysis	22
1.1. <i>Extraction of phenolic compounds</i>	22
1.2. <i>Determination of phenolic contents</i>	22
2. Nitrogen and Phosphorus Analyses	23
2.1. <i>Extraction of Total Nitrogen and Phosphorus</i>	23
2.2. <i>Extraction of Soluble Nitrogen and Phosphorus</i>	23
2.3. <i>Hydrolysis of Insoluble Nitrogen and Phosphorus</i>	24
2.4. <i>Determination of Total Free Amino Acid Content</i>	24

2.5. <i>Determination of Nitrogen Content</i>	25
2.6. <i>Determination of Phosphorus Content</i>	26
3. Nucleic Acids and Crude Protein Analyses	26
3.1. <i>Extraction of Nucleic Acids and Proteins</i>	26
3.2. <i>Determination of RNA</i>	27
3.3. <i>Determination of DNA</i>	28
3.4. <i>Determination of Crude Proteins</i>	28
4. Defense-Related Enzymes	29
4.1. <i>Extraction and Assay of Peroxidase</i>	29
4.2. <i>Isozyme Pattern of Peroxidase</i>	30
4.3. <i>Extraction and Assay of β-1,3-Glucanase</i>	30
5. HPLC Analysis	32
6. Statistical Analysis	33
RESULTS	34
I. GROWTH CRITERIA OF TOMATO PLANTS	34
1. Root Growth Criteria	34
2. Shoot Growth Criteria	42
3. Photosynthetic Pigment	50
II. BIOCHEMICAL ANALYSES	58
1. Phenolic Contents	59
1.1. <i>Root Phenolics</i>	59
1.2. <i>Shoot Phenolics</i>	67

2. Nitrogen Compounds	72
3. Total Free Amino Acids and Crude Proteins	80
4. Defense-Related Enzymes	88
5. Isozyme Pattern of Peroxidase	92
6. Phosphorus Components	94
7. Nucleic Acids Components	98
III. PHENOLIC PROFILE OF FENUGREEK SEED	106
<i>DISCUSSION</i>	110
<i>REFERENCES</i>	130
<i>SUMMARY</i>	151
<i>ARABIC SUMMARY</i>	155

List of Tables

Table No.	Title	Page
1-a	Effect of different treatments of fenugreek seed on the root growth criteria of tomato plants during various growth stages.	35
1-b	Analysis of variance of fenugreek seed treatments on the root growth criteria of tomato plants during the experimental time.	36
2-a	Effect of different treatments of fenugreek seed on the root growth criteria of healthy and infected tomato plants (60-day-old).	39
2-b	Analysis of variance of fenugreek seed treatments on the root growth criteria of healthy and infected tomato plants (60-day-old).	40
3-a	Effect of different treatments of fenugreek seed on the shoot growth criteria of tomato plants during various growth stages.	43
3-b	Analysis of variance of fenugreek seed treatments on the shoot growth criteria of tomato plants during the experimental time.	44
4-a	Effect of different treatments of fenugreek seed on the shoot growth criteria of healthy and infected tomato plants (60-day-old).	47
4-b	Analysis of variance of fenugreek seed treatments on the shoot growth criteria of healthy and infected tomato plants (60-day-old).	48
5-a	Effect of different treatments of fenugreek seed on photosynthetic pigment contents (mg g^{-1} fresh weight) in the shoot of tomato plants during various growth stages.	51
5-b	Analysis of variance of fenugreek seed treatments on the photosynthetic pigments in tomato shoot during the experimental time.	52
6-a	Effect of different treatments of fenugreek seed on the photosynthetic pigment contents (mg g^{-1} fresh weight) in the shoot of healthy and infected tomato plants (60-day-old).	55

6-b	Analysis of variance of fenugreek seed treatments on the photosynthetic pigments in the shoot of healthy and infected tomato plants (60-day-old).	56
7-a	Effect of different treatments of fenugreek seed on the phenolic content (mg g^{-1} dry weight) in the root of tomato plants during various growth stages.	60
7-b	Analysis of variance of fenugreek seed treatments on the root phenolic content in tomato plant during the experimental time.	61
8-a	Effect of different treatments of fenugreek seed on the phenolic content (mg g^{-1} dry weight) in the root of healthy and infected tomato plants (60-day-old).	64
8-b	Analysis of variance of fenugreek seed treatments on the root phenolic content of healthy and infected tomato plants (60-day-old).	65
9-a	Effect of different treatments of fenugreek seed on the phenolic content (mg g^{-1} dry weight) in the shoot of tomato plants during various growth stages.	68
9-b	Analysis of variance of fenugreek seed treatments on the shoot phenolic content of tomato plants during the experimental time.	69
10-a	Effect of different treatments of fenugreek seed on the phenolic content (mg g^{-1} dry weight) in the shoot of healthy and infected tomato plants (60-day-old).	74
10-b	Analysis of variance of fenugreek seed treatments on the shoot phenolic content of healthy and infected tomato plants (60-day-old).	75
11-a	Effect of different treatments of fenugreek seed on the contents of nitrogen components (mg g^{-1} dry weight) in the shoot of tomato plants during various growth stages.	77
11-b	Analysis of variance of fenugreek seed treatments on the nitrogen components in the shoot of tomato plants during the experimental time.	78
12-a	Effect of different treatments of fenugreek seed on the contents of total free amino acids and crude protein in the shoot of tomato plants during various growth stages.	81
12-b	Analysis of variance of fenugreek seed treatments on the contents of total free amino acids and crude protein in the shoot of tomato plants during the experimental time.	82
