**EFFECTS OF LOW DOSE DOBUTAMINE ON
DISPLACEMENT OF THE ATRIOVENTRICULAR PLANE
AND ASSESSMENT OF MYOCARDIAL VIABILITY IN
PATIENTS WITH ACUTE MYOCARDIAL INFARCTION**

Thesis

Submitted for the partial fulfillment of
The master degree in
Cardiology

By

Amira Aly Taha
M.B.B.Ch

Supervised By

Prof. Dr. Wagdy Abdel Hamid Galal

*Professor of cardiology,
Faculty of Medicine,
Ain Shams University*

Dr. Amr Adel El-Sayed

*Lecturer of Cardiology,
Faculty of Medicine,
Ain Shams University*

Faculty of Medicine
AIN SHAMS UNIVERSITY
(2001)

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿ قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْحَكِيمُ ﴾

صدق الله العظيم

سورة البقرة / الآية { ٣٢ }

Acknowledgement

First of all, *Thanks To Allah*, most merciful and most generous. Thanks for him before and after for enabling me to finish this work.

I wish to express my deepest appreciation and profound gratitude to *Professor Dr. Wagdy Galal*, Professor of Cardiology, Faculty of Medicine, Ain Shams University, for his keen and valuable supervision, which made me accomplish this work in its present form.

Also, I would like to extend my thanks and appreciation to *Dr. Amr Adel*, Lecturer of Cardiology, Faculty of Medicine, Ain Shams University, for his honest advise, kind guidance, and generous help during every stage of this work.

I would like as well to express my deepest gratitude to *Dr. khaled El Menyawi*, Assistant professor of Cardiology, Faculty of Medicine, Ain Shams University, for his remarkable effort and kind assistance through the practical work of this thesis.

Also, I wish to express many thanks and sincere gratitude to *Dr. Zeinab Abdel-Salam*, Assistant lecturer of cardiology, Faculty of medicine, Ain Shams University, for her valuable and generous help through the whole practical work of this thesis.

I do feel deeply indebted to all Professors, Senior Staff, and Colleagues in Department of Cardiology, for the facilities and support they offered.

CONTENTS

	Page
INTRODUCTION AND AIM OF THE WORK	1
REVIEW OF LITERATURE	
Myocardial stunning and hibernation	
• Basic consideration of myocardial ischemia	5
• Myocardial stunning	7
• Myocardial hibernation	24
Myocardial viability	
• Definition of myocardial viability	30
• Assessment of myocardial viability.....	30
Stress echocardiography	
• Rationale of stress echocardiography	45
• Acquisition of stress echocardiography	47
• Interpretation of stress echocardiography	54
• Pitfalls of stress echocardiography	64
• Modalities of stress echocardiography	65
• Dopamine stress echocardiography	69
• Stress echocardiography with vasoactive agents.....	81
• Prognostic value of stress echocardiography	87
• Comparison between DSE and exercise stress echocardiography	89
• Comparison between stress myocardial perfusion imaging and DSE.....	90

Atrioventricular plane displacement	
• Left ventricular architecture in man	93
• Mechanism of AV plane displacement	98
• Assessment of AV plane displacement	99
• Advantages of AVPD in assessing LV function	102
• AVPD in healthy persons	103
• AVPD in patients with CAD	104
• Effects of exercise on AVPD in patients with CAD	104
• AVPD in patients with acute MI	105
• Role of AVPD in assessment of myocardial viability.....	107
• AVPD in patients with heart failure	109
• AVPD and diastolic function.....	111
SUBJECTS AND METHODS	112
RESULTS	120
Images	141
DISCUSSION	158
SUMMARY	168
CONCLUSION	170
RECOMMENDATION.....	171
STUDY LIMITATIONS	172

MASTER SHEETS.....	--
ARABIC SUMMARY	--

LIST OF TABLES

No.	Title	Page
1	Differential diagnosis of reversible contractile dysfunction .	8
2	Clinical settings associated with myocardial stunning	9
3	Techniques for diagnosis of myocardial stunning	20
4	Techniques for non-invasive diagnosis myocardial viability	31
5	Positron emitting tracers of cardiac PET	34
6	Regional wall motion scoring index	59
7	Commonly applied protocols of DSE	71
8	Sensitivity, specificity, PPV & NPV of LDDE for prediction of functional recovery after AMI	78
9	Stress echo versus stress nuclear perfusion imaging	92
10	Clinical and laboratory parameters for the patients	120
11	Percentage distribution of infarction sites among the patients	121
12	Percentage distribution of risk factors among the patients	122
13	Basic echocardiographic data for the patients	123
14	Distribution of wall motion abnormalities among the patients	124
15	The mean AVPD and mean WMSI	124
16	Comparison between resting AVPD between control and patients groups	126

No.	Title	Page
17	Comparison between resting AVPD between control and patients with anterior MI	127
18	Comparison between resting AVPD between control and patients with inferior MI	128
19	Comparison between resting AVPD between control and patients with lateral MI	129
20	Haemodynamic parameters for the patients during rest and LDDs	131
21	Mean resting WMSI and during LDDs in viable and non-viable groups	133
22	AVPD at rest and during LDDs in viable group	133
23	AVPD at rest and during LDDs in non-viable group	134
24	Magnitude of AVPD at rest and LDDs in patients with anterior MI with and without signs of viability	134
25	Magnitude of AVPD at rest and LDDs in patients with inferior MI with and without signs of viability	135
26	Concordance between WMSI and AVPD for viability detection	136
27	Sensitivity, specificity, PPV and NPV for the test	138
28	Comparison between AVPD at pre-discharge and after follow up in viable group	140
29	Comparison between AVPD at pre-discharge and after follow up in non-viable group	140
30	Sensitivity, specificity, PPV and NPV of LDDE for prediction of functional recovery after AMI	167
