Magnetic Resonance Imaging Of Brachial plexus Injuries

THESIS

Submitted for partial fulfillment of M.Sc. degree in Radiodiagnosis

BY Adel Abd Elhameid Mohamed

 \mathcal{M} . \mathcal{B} ., \mathcal{B} . $\mathcal{C}h$.

Under the Supervision of

Prof. Dr. Hanan Mohamed Essa

Prof. of Radiodiagnosis

Faculty of medicine - Ain Shams University

Dr. Sherein George

Lecturer of Radiodiagnosis

Faculty of medicine - Ain Shams University

Faculty of medicine - Ain Shams University 2007

دور الرنين المغناطيسي في تشخيص إصابات الضفيرة العصبية للطرف العلوي

رسالة توطئة للحصول على درجة الماجستير في الأشعة التشخيصية

مقدمة من الطبيب

عادل عبد الحميد محمد

تحت إشراف

د/ حنان محمد عيسى

أستاذ الأشعة التشخيصية كلية الطب - جامعة عين شمس

د/ شیرین جورج

مدرس الأشعة التشخيصية كلية الطب - جامعة عين شمس

سمه ربيد قعمام - جبكا قيلك

<u>Acknowledgment</u>

Foremost, I feel always grateful to ALLAH.

I would like to thank Prof. **Dr. Hanan Essa,** Professor of Radiodiagnosis, Ain Shams University, for her encouragement, support and her extreme efforts in making this work possible. I am greatly honored and pleased to have had the opportunity to learn from her creative advices and expanded experience.

Also I extend my thanks to **Dr. Sherein Gorge**, Lecturer of Radiodiagnosis, Ain Shams University, for her efforts in making this work possible.

My gratitude and thanks are extended to all the staff members and colleagues of the Radiology department, Ain Shams University, for their help and co-operation.

I am also offering my warmest thanks to my mother and my wife for their positive attitude, moral support.

LIST OF CONTENTS

	Introduction and aim of work	1
	Review of literature :	
1.	Anatomy of the brachial plexus	4
2.	MR imaging of the normal brachial plexus	33
3.	Etiology and mechanism of injury	46
4.	Physical aspects & imaging techniques	74
5.	Imaging of brachial plexus injuries	84
	- Magnetic resonance imaging	84
	- Other radiological methods for imaging of brachial plexus injuries	97
	Summary & conclusion	103
	References	108
	Arabic Summary	118

LIST OF FIGURES

Figure	Subject	Page
Fig.01	Schematical presentation of the right brachial plexus.	07
Fig.02	A simplified diagram showing the anatomy of the brachial plexus.	08
Fig.03	Diagram showing relation of the nerve rootlets With the spinal membranes (nesterior view)	11
Fig.04	With the spinal membranes (posterior view). Diagram showing exit anterior and posterior	11
Fig.05	roots from the spinal cord (anterior view). A Diagram showing the superficial relations of the brachial plexus in the posterior triangle of	12
Fig.06	the neck. Diagram showing the relations of the brachial plexus elements in the axilla.	14 15
Fig.07	Supraclavicular branches of the brachial plexus.	17
Fig.08	Infraclavicular branches of the brachial plexus.	20
Fig.09	The course of musculocutaneous nerve in the	
	upper limb.	21
Fig.10	The course of median nerve in the upper limb.	23
Fig.11	The course of ulnar nerve in the upper limb.	26
Fig.12	The course of the radial and axillary nerves in	00
Fig.13	the upper limb. The cutaneous nerves of the right upper limb, viewed from anterior aspects.	29 31
Fig.14	The cutaneous nerves of the right upper limb, viewed from posterior aspects.	32

Figure	Subject	Page
Fig.15	Diagram showing the major structures in the neck, related to the right brachial plexus.	34
Fig.16	MR images of normal Brachial Plexus; Sagittal	37
1 19.10	View.	38 -40
Fig.17	MR images of normal Brachial Plexus; Axial View.	41
Fig.18	MR images of normal Brachial Plexus; Coronal	
	View.	42 -44
Fig.19	A Drawing shows the different possibilities of	
	rootlet avulsion, after a traction injury of the	
	brachial plexus.	54
Fig.20	A case of Thoracic Outlet Syndrome from	
	fibrous band on the lower trunk of the Brachial	
	Plexus.	58
Fig.21	Obstetrical brachial plexus palsy from birth	
	trauma.	65
Fig.22	Comparison between two coronal T1-weighted	
	images, were obtained with the body coil, and the	
	phased array coil.	79
Fig.23	MRI Cross-sectional imaging of the brachial	
	plexus in the sagittal plane, compared with MRI	
	In-plane imaging of the plexus in the coronal	
	plane.	82
Fig.24	Coronal T1-weighted image with gadolinium-DTPA	
	showing, Schwannoma of the ventral ramus of	02
C:_ 25	root C6. Regulamanings sale from thoumatic conviced next	83
Fig.25	Pseudomeningocele from traumatic cervical root	6-
	avulsion, in a 12 month old male.	87

Subject	Page
Examples of post-traumatic lesions of the plexus	
that have been demonstrated on SE images.	88 -90
The diagnostic accuracy of 3-D MR myelography	
in the evaluation of traumatic injuries of the	
brachial plexus.	92 - 95
The diagnostic accuracy of MR neurography in	
the evaluation of the components of the brachial	
plexus.	96
Myelography, in a case of severe stretch injury	
of the brachial plexus (flail arm).	98
CT myelogram of brachial plexus lesions.	
	99
extraforaminal part.	102
	Examples of post-traumatic lesions of the plexus that have been demonstrated on SE images. The diagnostic accuracy of 3-D MR myelography in the evaluation of traumatic injuries of the brachial plexus. The diagnostic accuracy of MR neurography in the evaluation of the components of the brachial plexus. Myelography, in a case of severe stretch injury of the brachial plexus (flail arm).

LIST OF TABLES

Тавlе	Subject	Page		
Table 01	Trunks of the brachial plexus.	05		
Table 02	Cords of the brachial plexus.			
Table 03	Relations of the brachial plexus.			
Table 04	Supraclavicular branches of the brachial plexus.	16		
Table 05	Infraclavicular branches of the brachial plexus. 19			
Table 06	Segmental cutaneous supply of the upper limb.			
Table 07 Major structures in the neck, related to the				
	brachial plexus.	35		
Table 08	Types of the brachial plexus injuries.	50		
Table 09	Iatrogenic injuries of the brachial plexus.	55		
Table 10	The basic types of brachial plexus palsies.	68		

LIST OF ABBREVIATIONS

✓ 3D	Three dimensions.	✓ NEX	Number of excitations.
✓ BP	Brachial plexus.	✓ RF	Radiofrequency.
✓ CISS	Constructive interference steady	✓ RT	Repetition time.
	state.		
✓ CT	Computed tomography.	✓ SE	Spin echo.
✓ FOV	Field of view.	✓ SNR	Signal to noise ratio.
✓ MIP	Maximum intensity projection.	✓ STIR	Short time inversion
			recovery.
✓ MRI	Magnetic resonance imaging.	✓ US	Ultrasonography.
✓ MRN	Magnetic resonance neurography	✓ VPR	Ventral primary rami.
