التوثيق الالكتروني والميكرو فيلم

جامعة عين شمس

التوثيق الالكتروني والميكرو فيلم

قسم

نقسم بالله العظيم أن المادة التي تم توثيقها وتسجيلها
علي هذه الأفلام قد اعدت دون أية تغيرات

يجب أن

تحفظ هذه الأفلام بعيداً عن الغبار

في درجة حرارة من 15 – 20 مئوية ورطوبة نسبية من 20-40 %

To be kept away from dust in dry cool place of
15 – 25c and relative humidity 20-40 %

**CONTRIBUTION OF GEOPHYSICAL
TRANSFORMATIONS IN THE SUBSURFACE
GEOLOGIC INTERPRETATIONS OF THE WEST
OF CAIRO AREA , WESTERN DESERT , EGYPT**

A Thesis

Submitted to the Department of Geology,
Faculty of Science,
Ain Shams University, Cairo

By

AHMED ABD EL-HADY IBRAHIM EL-KHAFAEF

M. Sc. in Geology

For

THE DEGREE OF DOCTOR OF PHILOSOPHY

of Science in Geology

Supervised By

Prof. Dr. W. M. Abdelmalik

Prof. of Geology,
Geology Department,
Faculty of Science,
Ain Shams University

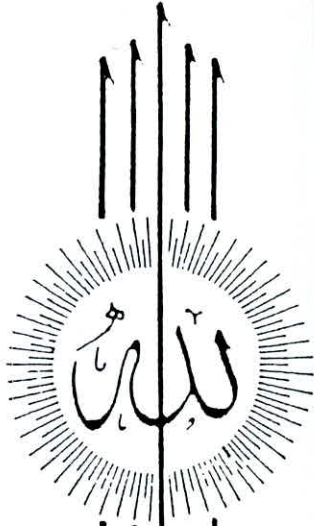

Prof. Dr. A. S. A. Abu El-Ata

Prof. of Geophysics,
Geophysics Department,
Faculty of Science,
Ain Shams University

Prof. Dr. R. A. I. Rizkalla

Prof. of Geophysics,
Exploration Department,
Egyptian Petroleum Research Institute

1999

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا
عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

مَكِّي - اللَّهُ الْعَلِيمُ

LIST OF FIGURES.	
ACKNOWLEDGMENTS.	
ABSTRACT.	
CHAPTER I : GENERAL GEOLOGIC SETTING.	1
I.1. Introduction.	1
I.2. Geomorphology.	3
I.3. Surface Geology.	5
I.4. Subsurface Stratigraphy.	10
I.5. Structures.	25
I.6. Tectonics.	35
I.7. Geologic History.	41
I.8. Previous Exploration Activities of this Area.	45
I.9. The Aim of the Present Study.	47
CHAPTER II : GRAVITY TRANSFORMATION.	49
II.1. Introduction.	49
II.2. Gravity Data.	50
II.3. Space Domain Filtering Options.	53
II.3.1. Filtration and Transformation Enhancements Operations.	55
a. Generalities.	55
b. Digitization.	56
A. Polynomial surface fitting enhancement.	56
a. Theory of fitting.	57

Subject	Page
b. Polynomial orders implementation.	58
B. Low-pass/high-pass filtering operations.	59
a. Moving average operator. . .	59
b. Laplacian operator.	59
II.3.2. Edge Enhancement Operation. . . .	60
II.3.3. Sun-shading Enhancement Operation.	61
a. Theory of the technique.	62
b. Implementation.	62
II.4. Frequency Domain Transformation Options.	63
II.4.1. Vertical Continuation Transform. . .	64
a. Continuation function and algorithm.	65
b. Downward continuation orders. . .	65
II.4.2. Vertical Derivative Operator.	65
a. Algorithm.	66
b. Derivative orders implementation.	66
II.4.3. Strike Filtering Technique.	67
a. Algorithm.	67
b. Implementation.	68
1. Enhancement.	68
2. Suppression.	68
II.4.4. Gradients and Analytical Signal Transform.	69
A. Hilbert transform analysis.	69
a. Theory of the transform. . .	69

Subject	Page
II.5. Depth Determination.	72
a. Treitel et al. (1971).	72
b. Sadek et al. (1984).	80
II.6. Structural Circular Representation.	81
II.6.1. Theory of the representation.	82
II.6.2. Implementation.	85
CHAPTER III : MAGNETIC TRANSFORMATION.	86
III.1. Introduction.	86
III.2. Magnetic Data.	87
III.3. Reduction to the Magnetic Pole.	89
III.3.1. Concept of the Reduction to the Pole Transformation.	89
III.3.2. Theory of the Reduction to the Pole Transformation.	93
III.3.3. Total Intensity Magnetic Map Reduction to the Pole (R.T.P).	96
III.4. Space Domain Filtering Options.	102
III.4.1. Filtering and Transformation Enhancement Operations.	103
a. Generalities.	103
b. Digitization.	104
A. Polynomial surface fitting enhancement.	105
a. Theory of fitting.	105
b. Polynomial orders implementation.	105
B. Low-pass/high-pass filtering operations.	105

Subject	Page
III.4.2. Edge Enhancement Operation. . .	106
III.4.3. Sun-shading Enhancement Operation.	107
a. Theory of the technique.	107
b. Implementation.	107
III.5. Frequency Domain Transformation Options.	107
a. Generalities.	107
III.5.1. Power Spectrum Analysis Transform.	110
a. Filtering with analytical power spectrum.	111
III.5.2. Vertical Continuation Transform. . .	112
a. Algorithm.	113
b. Upward-downward continuation orders.	114
III.5.3. Vertical Derivative Operator.	115
a. Algorithm.	115
b. Derivative orders implementation.	115
III.5.4. Strike Filtering Technique.	120
a. Algorithm.	120
b. Implementation.	120
1. Enhancement.	120
2. Suppression.	121
III.5.5. Gradients and Analytical Signal Transform.	121
A. Gradient and phase angle analysis.	121

Subject	Page
a. Normalized total vector.	121
b. Normalized horizontal vector.	124
c. Horizontal and total phase angles.	124
B. Hilbert transform analysis.	125
a. Theory of the transform.	126
III.6. Depth Determination.	127
a. Treitel et al. (1971).	134
b. Sadek et al. (1984).	134
1. Theory.	134
c. Cooper (1991).	136
III.7. Structural Circular Representation.	136
III.7.1. Theory.	137
III.7.2. Implementation.	137
CHAPTER IV : GRAVITY INTERPRETATIONS.	138
IV.1. Introduction.	138
IV.2. Qualitative Interpretation.	139
IV.2.1. Filtration and Transformation Enhancement.	140
A. Polynomial surface fitting enhancement.	140
B. Low-pass and High-pass filtering.	153
1. Moving average low-pass filtered map.	153
2. Moving average high-pass filtered map.	153

Subject	Page
3. Laplacian low-pass filtered map.	158
4. Laplacian high-pass filtered map.	158
IV.2.2. Edge Enhancement Technique. . .	159
IV.2.3. Sun-shading Technique.	159
IV.2.4. Vertical Continuation Transform. .	165
IV.2.5. Vertical Derivative Transform. . .	172
IV.2.6. Strike Filtering Operations.	173
a. Enhancement implementation. . .	173
b. Suppression implementation. . .	180
IV.2.7. Gradient and Analytical Signal Transformations.	181
Implementations.	181
IV.3. Quantitative Interpretation.	194
IV.3.1. Basement Depth Determination. . .	195
1. Near-surface intrusion relief map. .	202
2. Deep-seated basement relief map. .	202
CHAPTER V : MAGNETIC INTERPRETATIONS. . . .	207
V.1. Introduction.	207
V.2. Qualitative Interpretation.	207
V.2.1. Filtration and Transformation Enhancement.	208
A. Polynomial surface fitting enhancement.	208
