A STUDY ON MECHANIZATION OF SUGAR BEET CROP

DEVELOPMENT OF A SMALL MACHINE SUITABLE FOR HARVEST SUGAR BEET UNDER EGYPTIAN CONDITIONS

BY

Mohamed Abd- Allah Abd El-Raouf Khodeir

B.Sc. in Agric. Science (Agric. Mech.), Kafr El-Sheikh, Tanta University, 1985
M.Sc. in Agric. Science (Agric. Eng.), Minufya University, 1996

Thesis

Submitted to the Graduate Division in Partial Fulfillment of the
Requirements for the Degree of Doctor of Philosophy

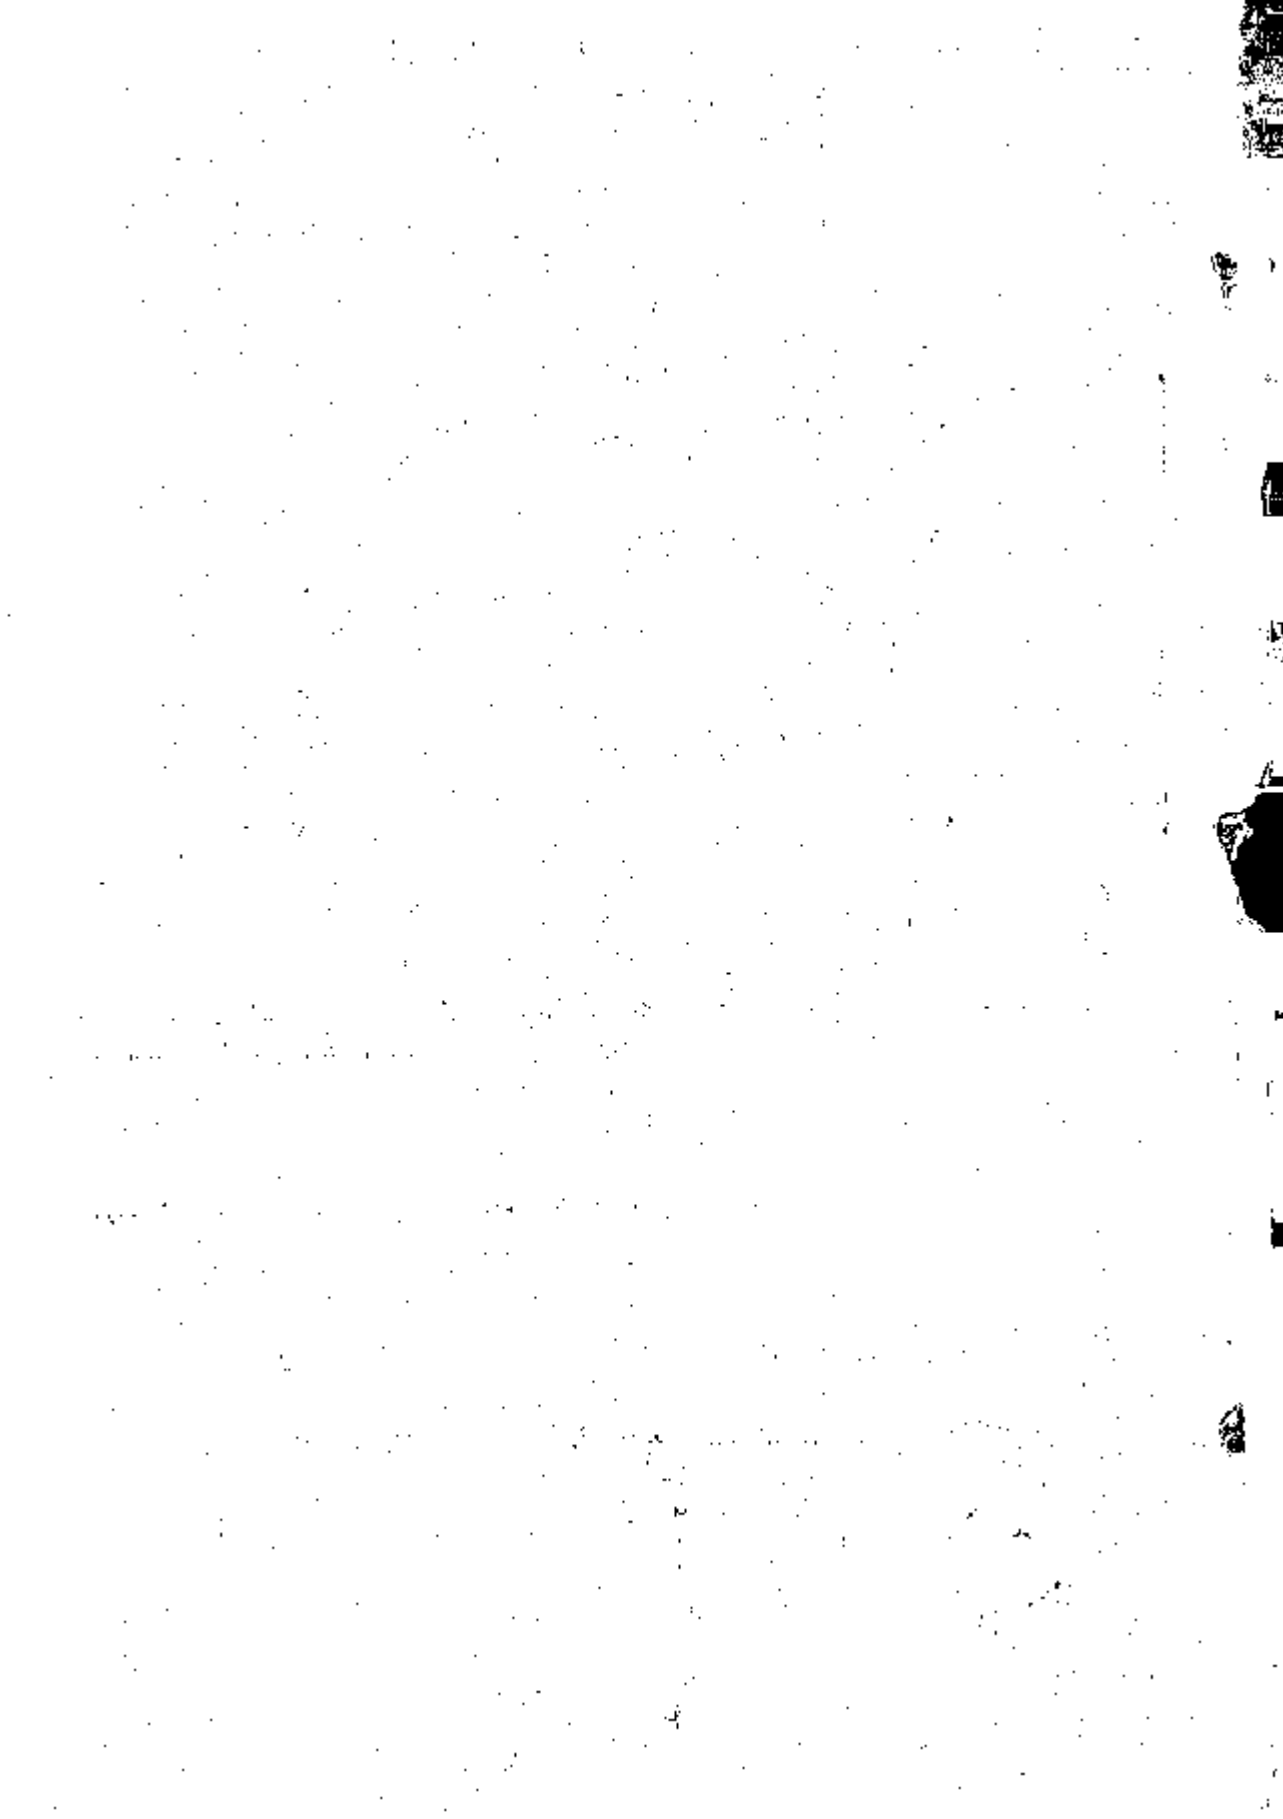

In

AGRICULTURAL SCIENCE

(Agricultural Mechanization)

Agricultural Mechanization Department, Faculty of Agriculture
Kafr El- Shelkh,
Tanta University.

APPROVAL SHEET

"A STUDY ON MECHANIZATION OF SUGAR BEET CROP"

DEVELOPMENT OF A SMALL MACHINE SUITABLE
FOR HARVEST SUGAR BEET UNDER EGYPTIAN
CONDITIONS

By

MOHAMED ABD ALLH ABD AL-ROUF KHODEIR

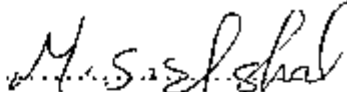

This thesis for Ph. D. Degree in

Agricultural Sciences (Agricultural Mechanization)

has been approved by:

Prof. Dr. Mamdouh A. Helmy.....

Professor of Agric. Eng., and
Head of Agric. Mech. Dept.,
Faculty of Agric., Kafr El-Sheikh,
Tanta University.

Prof. Dr. Mohamed S. El-Shal.....

Professor of Agric. Eng., Agric. Eng. Dept.,
Faculty of Agric., Zagazig University.

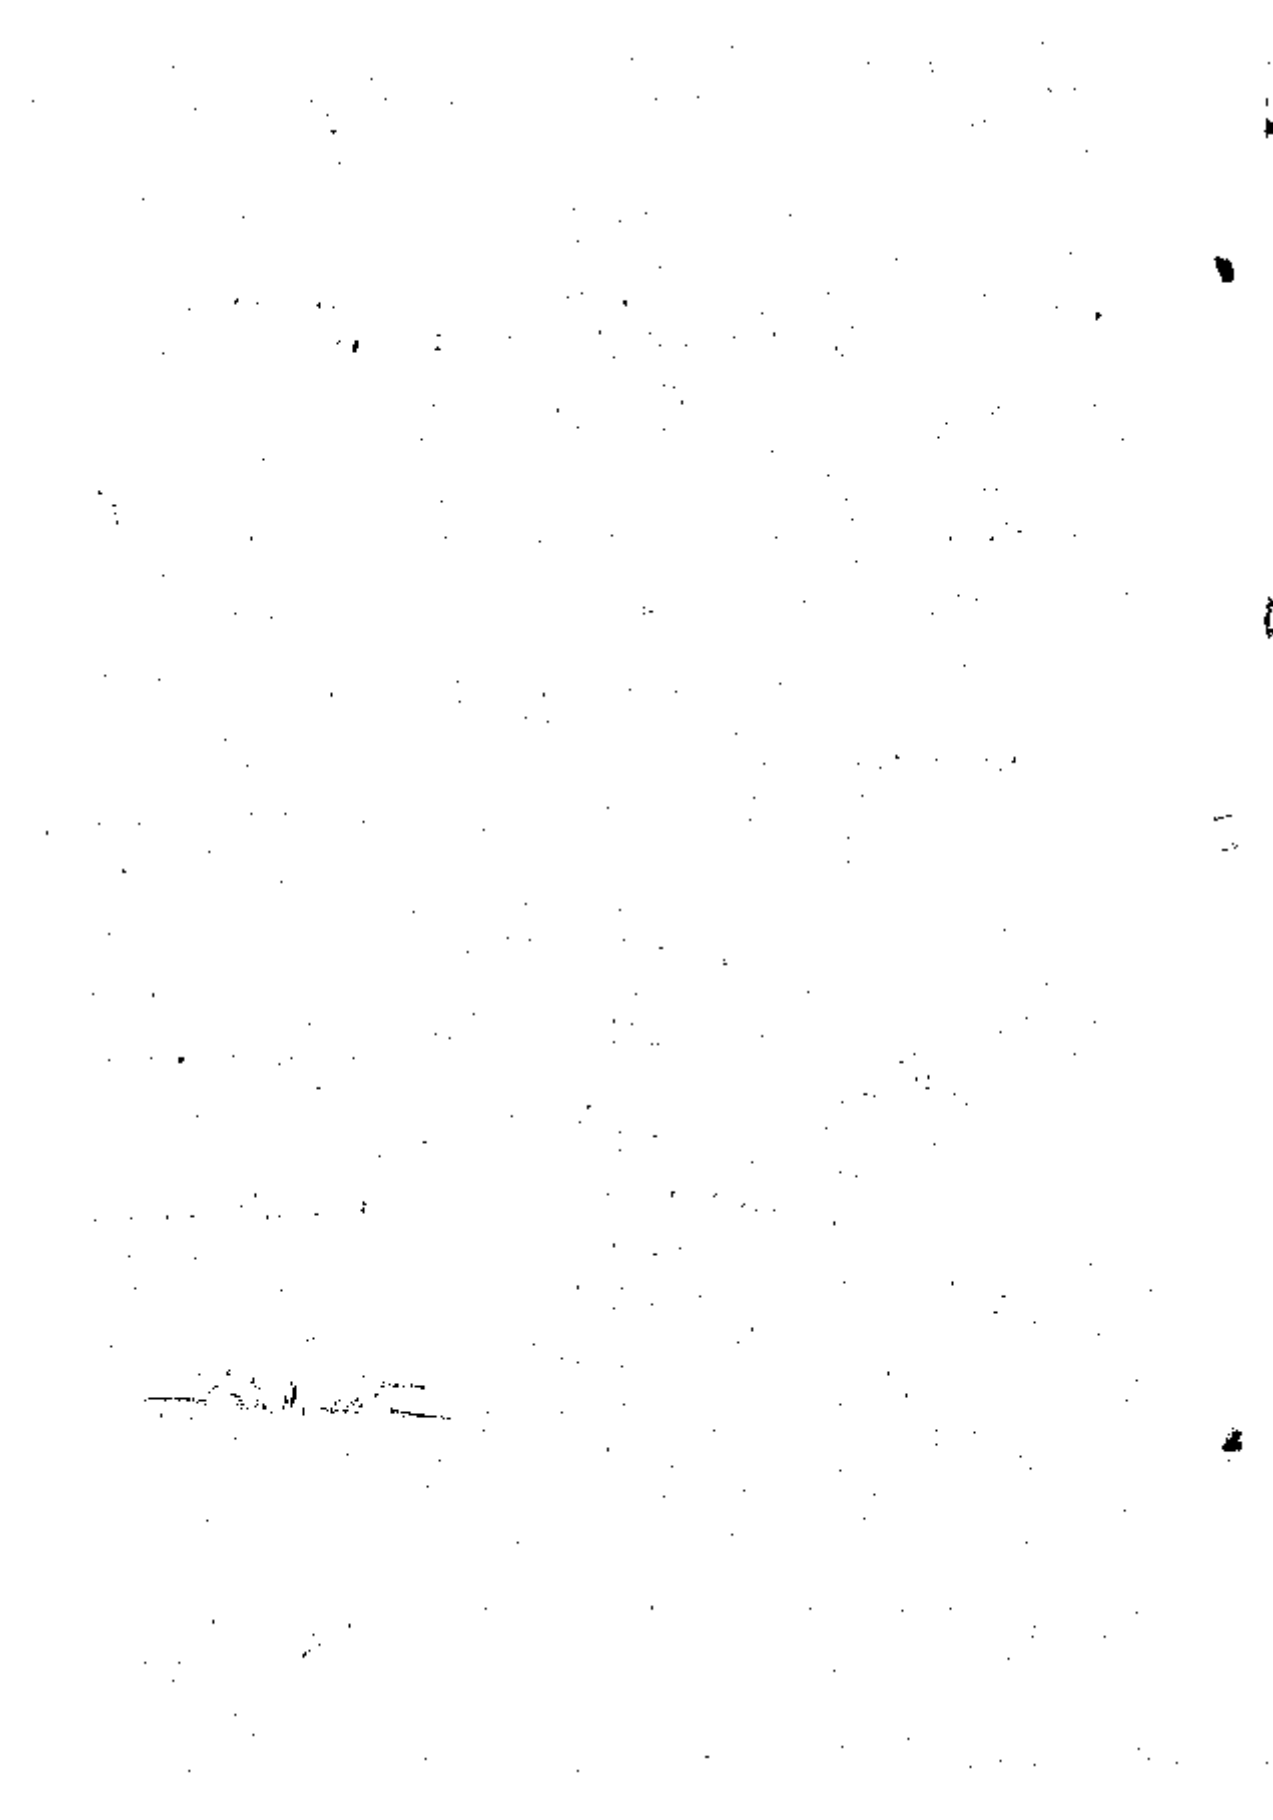

Prof. Dr. Ismail A. Abd El-Motaleb.....

Professor of Agric. Eng., Agric. Mech. Dept.,
Faculty of Agric., Kafr El-Sheikh,
Tanta University.

Dr. Samir M. Gomaa.....

Associate professor of Agric. Eng.,
Agric. Mech. Dept., Faculty of Agric.,
Kafr El-Sheikh, Tanta University.

Date: 30 / 12 / 2002

ACKNOWLEDGMENT

First and foremost, I would thank the Almighty ALLAH for giving me the strength and determination to complete this research.

The author wishes to express his deep and sincere thanks and appreciation to Prof. Dr. Mamduh Abbas Helmy, professor and head of Agricultural Mechanization Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University for his continuous encouragement valuable consultation, constant interest shown, supervision, scientific help, kind guidance, and revising the manuscript.

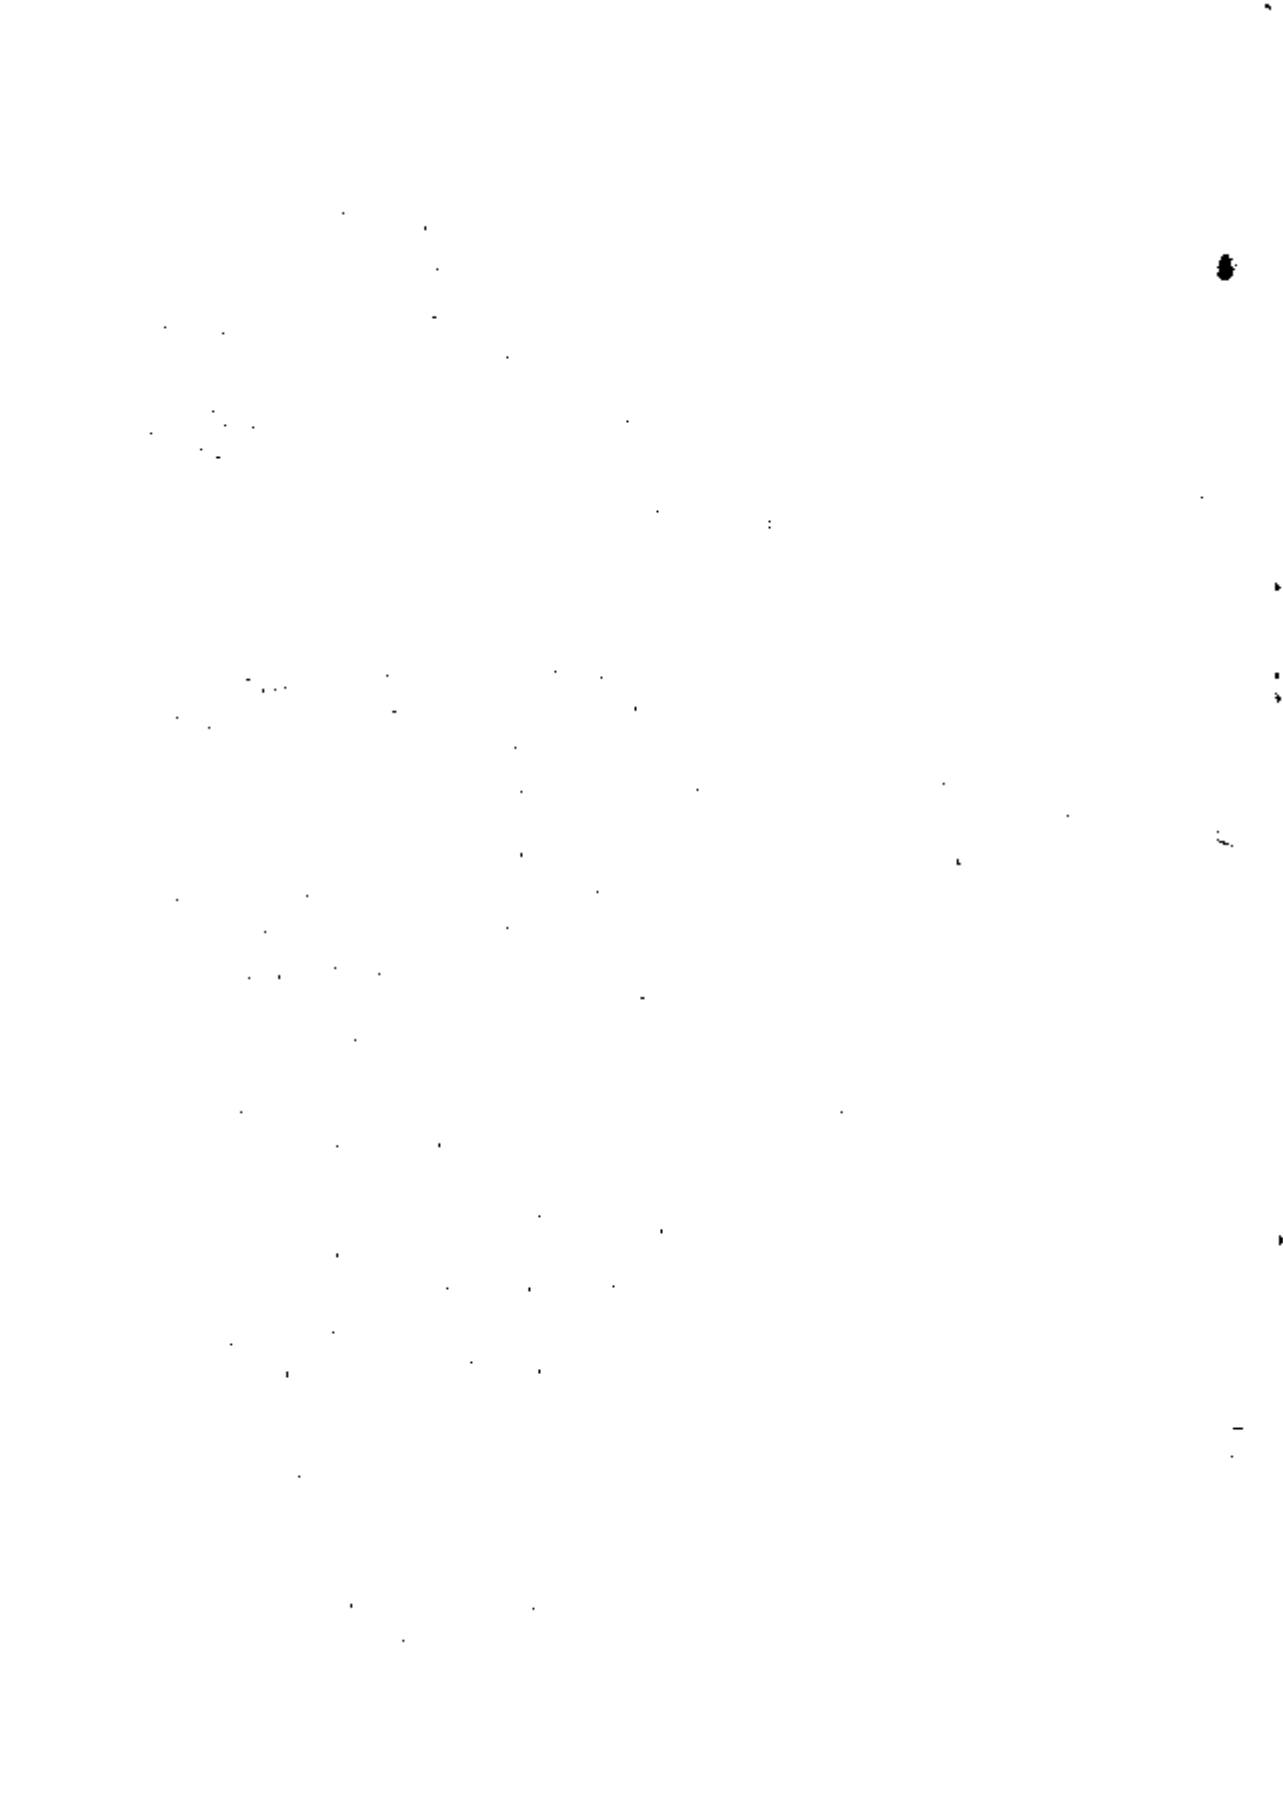

The author also wishes to express his deep and sincere thanks to Dr. Samir Mahmoud Goniaa, Associate professor of Agricultural Engineering, Agricultural Mechanization Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University for his supervision, suggesting the problem and continuous scientific help.

The author also wishes to express his deep and sincere thanks to Dr. Fathey Ibrahim Hindy, Associate professor of Agricultural Engineering, Agricultural Mechanization Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University for his supervision, suggesting the problem and continuous scientific help.

Special thanks are extended to all who have helped me in providing the equipment and facilities, through carrying out this work.

Finally gratefulness and thanks are due to my parents, especially my father, my wife, Mona, my children, Abd Allah, Nezam, Deiaa El-Dein and Ahmed and my sisters, Zouzou and their sons and daughters, Fifi and their sons and daughters, Wafuu and their sons and daughters, Maha and their sons and daughters for their patience and encouragement and the facilities they provide to me during this work.

At the end it is a good time to provide a great thanks and encouragement to my mother's soul.

CONTENTS

	Page No.
1. INTRODUCTION.....	1
2. REVIEW OF LITERATURE.....	3
2.1. Physical and mechanical properties of sugar beet.....	3
2.2. Sugar beet harvester.....	11
2.3. Technology of sugar beet harvesting.....	13
2.3.1. Sugar beet topping.....	14
2.3.2. Cleaning mechanism for sugar beet roots.....	14
2.4. Types of sugar beet harvester.....	16
2.4.1. Harvesters lifting the before topping.....	16
2.4.2. A conveying belt's sugar beet harvester.....	16
2.4.3. A spiked-wheel sugar beet harvest.....	18
2.5. Topping accuracy.....	18
2.6. Harvesting losses.....	21
2.6.1. Mechanical damage and injury of tubers.....	22
2.6.2. Topping losses.....	25
2.7. Fuel consumption and power requirements.....	28
2.8. Cost analysis.....	29
3. THEORETICAL CONSIDERATIONS.....	34
3.1. Sweep blade parameters.....	34
3.1.1. Characteristics of roots and ridges.....	34
3.1.2. The sweep blade width.....	35
3.2. Lifter wheel specifications.....	39
3.2.1. Lifter wheel diameter.....	41
3.3. Spinner specification.....	43
3.3.1. Spinner wheel specification.....	43
3.3.2. The arm's width of the spinner wheel.....	47
3.3.3. The optimum operational conditions for beet roots separation.....	49
4. MATERIALS AND METHODS.....	50
4.1. Materials.....	50
4.1.1. Sugar beet crop.....	50
4.1.2. Farming system.....	52
4.1.3. Sugar beet harvesting machine.....	54
4.1.3.1. Topping unit.....	54
4.1.3.2. Digging device.....	54
4.1.3.3. Shank.....	54
4.1.3.4. Digging blade.....	58
4.1.3.5. Root lifting unit.....	58
4.1.3.6. Separation unit (spinner).....	58
4.1.3.7. Frame (chassis).....	60
4.1.3.8. Hitching system.....	60

4.1.3.9. Gear box.....	60
4.1.3.10. Power transmission.....	60
4.1.4. Soil characteristics.....	62
4.1.5. Fuel consumption apparatus.....	62
4.1.6. Tachometer.....	62
4.1.7. Assistant instruments.....	62
4.1.8. Soil penetrometer.....	64
4.1.9. Field layout.....	64
4.2. Methods.....	64
4.2.1. Experimental procedure.....	64
4.2.2. Measurements related to soil.....	67
4.2.2.1. Moisture content.....	67
4.2.2.2. Soil bulk density.....	67
4.2.2.3. Soil hardness.....	68
4.2.3. Measurements related to sugar beet.....	69
4.2.3.1. Dimension of sugar beet plants.....	69
4.2.3.2. Sugar beet mass.....	69
4.2.3.3. Root volume.....	69
4.2.3.4. Root yield in Mg/fed.....	71
4.2.3.5. Sugar yield in Mg/fed.....	72
4.2.3.6. Sucrose percentage.....	72
4.2.4. Measurements related to harvesting machine.....	72
4.2.4.1. Slip ratio to harvesting machines.....	72
4.2.4.2. Field capacity.....	72
4.2.4.2.1. Theoretical field capacity.....	72
4.2.4.2.2. Effective field capacity.....	73
4.2.4.3. Field efficiency.....	73
4.2.4.4. Topping efficiency.....	74
4.2.4.5. Lifting efficiency.....	76
4.2.4.6. Technical examination of sugar beet roots.....	76
4.2.4.7. Cutting force.....	76
4.2.4.8. Lifting force.....	77
4.2.4.9. Power requirement.....	77
4.2.4.10. Total energy required.....	77
4.2.4.11. Cost analysis.....	78
5. RESULTS AND DISCUSSION.....	79
5.1. Physical characteristics of sugar beet plants.....	79
5.2. Field performance of sugar beet harvester.....	79
5.2.1. Topping operation.....	79
5.2.2. Lifting efficiency.....	79
5.2.3. Root damage.....	89
5.2.3.1. Cut roots.....	95
5.2.3.2. Bruise damage.....	100
5.2.4. Undamaged roots.....	105

5.2.5. Effective field capacity.....	108
5.2.6. Field efficiency.....	113
5.2.7. Slip ratio.....	115
5.3. Fuel consumption and power requirements for harvesting.....	117
5.3.1. Fuel consumption in sugar beet harvesting.....	117
5.3.2. Power and energy requirements for sugar beet harvesting.....	121
5.4. Cost analysis and calculation.....	125
6. SUMMARY AND CONCLUSION.....	129
7. REFERENCES.....	137
APPENDIX.....	143
ARABIC SUMMARY.....
