

Chemical and Biological Characterization of Components from *Aloe arborescens* Miller with Biological Modifier Response

Thesis Submitted to

Faculty of Pharmacy
Ain Shams University

In Partial Fulfillment of the Requirements
for The Degree of
Doctor of Philosophy in Pharmaceutical Sciences
(In Pharmacognosy)

By

Jilan Abd-Elaziez Nazeam

B. Pharm. Sci.
Faculty of Pharmacy, October 6th University, 2006

M. Pharm. Sci.
Faculty of Pharmacy, Ain Shams University, 2011

Department of Pharmacognosy,
Faculty of Pharmacy
Ain Shams University
Nasr city, Cairo, Egypt
2016

Under the supervision of

ABD-EINASSER B. SINGAB, Ph.D.

Professor of Pharmacognosy
Dean of Faculty of Pharmacy
Ain Shams University.

HALA M. EL-HEFNAWY, Ph.D.

Assistant Professor of Pharmacognosy, Faculty of Pharmacy
Cairo University.

HAIDY A. GAD, Ph.D.

Lecturer of Pharmacognosy, Faculty of Pharmacy
Ain-Shams University.

AHMED ESMAT, Ph.D.

Lecturer of Pharmacology and toxicology
Faculty of Pharmacy,
Ain-Shams University.

**Department of Pharmacognosy,
Faculty of Pharmacy
Ain Shams University
Nasr city, Cairo, Egypt
2016**

Acknowledgement

First and foremost thanks to “ALLAH” who has granted me all these graces to fulfil this work and blessed me by His power and mercy. To Him I extent my heartfelt thanks.

*It is a great pleasure to get this opportunity to express my deepest appreciation and sincere gratitude to **Prof. Dr. Abdelnaser Singab** for setting an example to what a sincere professor, scientist, and advisor should be. I am deeply grateful to him for giving me this valuable chance to pursue my doctoral research and for the excellent work facilities at the Institute. I would like to express my sincere thanks and gratitude to him for supervising this study.*

*I express my profound and deep sense of gratitude with utmost sincerity and heartfelt respect to my professor **Dr. Hala ElHefnawy** for her extensive efforts and help to solve the daily problems during my master and doctoral studies, her direct guidance, constant encouragement and unforgettable learning and support. My special thanks to **Dr. Haidy Gad** and **Dr. Ahmed Esmat** for their generous considerations, admirable supervision and fruitful discussions during the course of research.*

*I would like to express my profound gratitude to my professors and colleagues from Department of Pharmacognosy, October 6 University, especial thanks to **Dr. Samir Othman, Dr. Osama Elnahas, Dr. Sherien Sameh, Dr. Alaa Elhadad, Dr. Walaa Elsherief, Dr. Dalia Galal and Dr. Sherief Mohamed** for their cooperation, kind advices and support. My appreciation to the sincere collaboration of **Dr. Mohamed Ashor, Dr. Mohamed Elshazly** and **Dr. Ahmed Esam**, Department of Pharmacognosy, Ain shams University.*

*My cordial thanks to **Dr. Mohsen Asker**, Professor of Microbiology, National Research Centre (NRC), for all the help rendered from his side. I would like to extend my thanks to **Dr. Tamer Ragab, Dr. Mahmoud Emam** and **Dr. Mohamed Hassan**, for their kind help in carrying out the analysis of components in NRC institute. Deep thanks to **Mr. Sherief Raouf**, Sector Manager at EBCO Company, for his help in analysis studies using FT-IR instrument.*

Finally, a special debt of gratitude is acknowledged to my great parents for their persistent help, true sympathy, prayers and real sacrifices throughout the course of the thesis.

To All of You, Thank You Very Much!

Jilan

Arabic summary

List of Tables

1	Different extractions conditions of low molecular weight compounds isolated from <i>A. arborescens</i>	11
2	Chemical structures of low molecular weight compounds previously isolated from <i>A. arborescens</i>	12
3	Spectroscopic analysis data of low molecular weight compounds previously isolated from <i>A. arborescens</i>	15
4	Chromatographic methods used in qualitative and quantitative analysis of <i>A. arborescens</i> components.....	18
5	Polysaccharides of different molecular weight isolated from skin juice, gel juice and flowers of <i>A. arborescens</i> (Chang et al. 2011).....	25
6	Sugar composition (mol%) of the polysaccharides from skin juice, gel juice and flower of <i>A. arborescens</i>	28
7	Infrared absorption band assignments of different polysaccharides previously isolated from <i>A. arborescens</i>	30
8	¹³ C-NMR spectral assignments of polysaccharides A (0.3 M NaCl), B (D ₂ O), and C (0.1M NaCl), Neutral fraction (D ₂ O), Arboran (D ₂ O).....	31
9	Polysaccharides previously isolated from <i>A. arborescens</i> extracts.....	32
10	Comparison of sample preparation methods for carboxypeptidase isolation from <i>A. arborescens</i>	40
11	<i>In-vivo</i> experimental models of antitumor effect <i>A. arborescens</i> plant.....	46
12	Antitumor effect of different extracts (NPQ, POQ, WAP, ACP and ALP) against PC3, HepG2 and MCF-7.....	88
13	Effect of WAP and ALP on phagocytic activity and diameter of PBMC.....	93
14	Cytokines ELISA assay (IL-2, IL-12, TNF- α and INF- γ) of isolated polysaccharides...	94
15	Compounds isolated from <i>A. arborescens</i>	144
16	Phenol sulphuric screening test of water soluble polysaccharides (WAP) fractions separated from Diaion column chromatography.....	148
17	Results of phenol sulphuric assay for (ALP) fractions separated by Diaion column chromatography.....	149
18	Paper chromatography results of different purified (WAP) fractions.....	152
19	Paper chromatography results of different isolated sub-fractions from (WAP).....	153
20	Gel filtration chromatography results of APB sub-fractions separated from ALP fraction	156
21	Concentration of mannose and glucose in different polysaccharide extracts	157
22	Sugar composition (molar ratio) of different bioactive polysaccharide extracts	158
23	Molar ratio of sugar alcohols for WAP and ALP polysaccharides.....	160
24	Weight-average (M _w), (M _w) and number-average (M _n) molecular weights, and polydispersity (M _w /M _n) of isolated polysaccharides components from WAP.....	163
25	Weight-average (M _w), (M _w) and number-average (M _n) molecular weights and polydispersity (M _w /M _n) of isolated polysaccharides components from ALP.....	163
26	Characteristic IR signals of isolated WAP components.....	167
27	Characteristic IR signals of isolated ALP components.....	168
28	Chemopreventive effect of different isolated quinone compounds against HepG2 cancer cell.....	173

29	Effect of different bioactive quinone compounds against normal human epithelial amnion cells (Wish).....	174
30	Free radical scavenging activity of different potent cytotoxic quinone compounds using DPPH photometric method.....	177
31	The effect of WAP, ALP subfractions on phagocytic activity and lymphocyte diameter	179
32	Cytokines ELISA assay (IL-2 and IL-12) of isolated polysaccharides compounds.....	180
33	Cytokines ELISA assay (TNF- α and INF- γ) of isolated Polysaccharides compounds...	181

List of Figure

1	Major cells of the innate and adaptive immune systems and their functions in response to a tumor cell	4
2	Schematic illustration of the activation of immune cells for the destruction of pathogens by polysaccharide BRMs.....	5
3	Schematic illustration of most lectin extractions methods that previously reported.....	36
4	Method of lectin extraction by (Koike et al. 1995).....	37
5	Schematic description of reported biological activity of isolated compounds from <i>A. arborescens</i>	57
6	The wide distribution of genus <i>Aloe</i> in Africa	65
7	(7a) <i>A. arborescens</i> forms dense, apical leaf rosettes simple inflorescences. (7b): small straggly bushes. (7c): Leaves (7d): Leaves become reddish in winter in certain regions, for instance at (7e): Close-up of the raceme from a large yellow-flowered shrub (7f): The characteristic elongated inverted-conical, dense raceme with cylindrical flowers.....	67
8	Schematic diagram for extraction and separation of quinones (Su and Ferguson 1973)	74
9	Schematic diagram for extraction and fractionation of different polysaccharides from <i>A. arborescense</i>	75
10	Schematic diagram for Purification steps of crude polysaccharides from <i>A. arborescense</i>	76
11	Schematic illustration for isolation of lymphocytes from PBMC, phagocytosis assay and lymphocyte transformation assay- Lymphocyte transformation test.....	85
12	Lymphocyte transformation test (a) Negative control; (b) Positive control(Cultured lymphocyte +PHA 4µg/ml); (c) WAP treated group; (d) ALP treated group; *All Cultured lymphocyte fixed with 0.2% paraformaldehyde for four minutes (37° C) and stained with 0.033% Leishman during four minutes (xl000).....	94
13	Fractionation scheme of the non-polar quinone fraction from alcoholic extract	96
14	EI-Mass spectrum of Aloenin-aglycone – (compound 1)	102
15	¹ H-NMR spectrum of Aloenin-aglycone – (compound 1)	103
16	EI-Mass spectrum of Methyl <i>p</i> -Coumarate – (compound 2).....	105
17	¹ H-NMR spectrum of Methyl <i>p</i> -Coumarate – (compound 2)	106
18	EI-Mass spectrum of (3R)-6,8-dihydroxy-3-(6- oxoundecyl)-3,4-dihydroisocoumarin derivatives–(compound 3).....	108
19	¹ H-NMR spectrum of (3R)-6,8-dihydroxy-3-(6- oxoundecyl)-3,4-dihydroisocoumarin derivatives–(compound 3).....	109
20	EI-Mass spectrum of Dihydrocoumarin – (compound 4)	111
21	ESI-Mass spectrum of Aloeresin E– (compound 5).....	113
22	ESI-Mass spectrum of Lacciac acid E derivatives – (compound 6)	115
23	¹ H-NMR spectrum of Lacciac acid E derivatives –(compound 6)	117
24	ESI-Mass spectrum of Lacciac acid C–(compound 7)	119
25	IR-spectrum of Lacciac acid C– (compound 7)	120

26	EI-MS spectrum of 7-hydroxy-2,5-dimethylchromone – (compound 8)	122
27	¹ H-NMR spectrum of 7-hydroxy-2,5-dimethylchromone – (compound 8)	123
28	ESI-Mass spectrum of Neoaloesin A – (compound 9)	125
29	ESI-Mass spectrum of Aloe emodin anthrone – (compound 10)	127
30	¹ H-NMR spectrum of Aloe emodin anthrone – (compound 10)	128
31	ESI-Mass spectrum of Purpurin – (compound 11).....	130
32	EI-Mass spectrum of Tetrahydro-3-furanmethanol – (compound 12)	132
33	¹ H-NMR spectrum of Tetrahydro-3-furanmethanol – (compound 12)	133
34	ESI-Mass spectrum of Aloeresin B – (compound 13)	135
35	¹ H-NMR spectrum of Aloeresin B – (compound 13)	136
36	ESI-Mass spectrum of Aloenin – (compound 14)	138
37	¹ H-NMR spectrum of Aloenin – (compound 14)	140

51	FT-IR spectra of purified ALP polysaccharide.....	165
52	FT-IR spectrum of isolated ALP components	169
53	FT-IR spectrum of isolated WAP components	171

List of Abbreviations

5-FU	5-fluorouracil
ACP	Acid soluble polysaccharide fraction
ALT	Alanine transferase
ALP	Alkaline soluble polysaccharide fraction
AOM	Azoxymethane
BAW	Solvent system; butanol: acetic acid: water
BOP	N-nitrosobis (2-oxopropyl)amine
CC	Column chromatography
COSY	Correlation spectroscopy
CPase	Carboxypeptidase
D	Polydispersity index
Da	Dalton
DB	Degree of branch
DCM	Dichloromethane
DEAE-cellulose	Diethylaminoethyl cellulose
DEAE-sephadex	Diethylaminoethyl sephadex
DEAE-toyopearl	Diethylaminoethyl toyopearl
DEMISO	Dimethylsulphoxide
Dept-C¹³-NMR	Distortionless enhancement by polarization transfer C ¹³ -NMR
DMH	Dimethylhydrazine
DMN	Dimethylnitrosamine
DPPH	2,2-diphenyl-1-picrylhydrazyl
DS	Degree of substitute (DS)
ELISA	Enzyme linked immunosorbent assay
ENNG	Ethyl-N'-nitro-N-nitrosoguanidine
ESI-MS	Electrospray ionization mass spectrometry

List of Abbreviations

FID	Flame ionization detector
FT-IR	Fourier transform infrared spectroscopy
GC	Gas chromatography
GC-MS	Gas chromatography-mass spectrometry
GLC	Gas liquid chromatography
GPC	Gel permeation chromatography
GSH	Glutathione
Hb	Haemoglobin
HepG2 cell line	Human liver cancer cell line
HCOOH	Formic acid
HIO₄	Periodic acid
HMBC	Heteronuclear multiple bond correlation
HPGPC	High performance gel permeation chromatography
HPLC	High performance liquid chromatography
HPTLC	High performance thin layer chromatography
HSQC	Heteronuclear single quantum coherence
Hz	Hertz
IC₅₀	Lethal concentration of the sample, which causes the death of 50%
IFN-γ	Inferon-gamma
IL- 2	Interleukin 2
IL-10	Interleukin 10
IL-12	Interleukin 12
IL-6	Interleukin 6
KDa	Kilo-dalton
LC/ESI/MS/MS	Liquid chromatography-electrospray ionization- tandem mass spectrometry
LPS	lipopolysaccharides

List of Abbreviations

MALDI	Matrix-assisted laser desorption/ ionization spectroscopy
MCF7 cell line	Human breast adenocarcinoma cell line
Mn	Number-average molecular weight
MTT	(3-(4, 5-dimethylthiazol)-2, 5-diphenyl tetrazolium bromide
M.wt	Weight-average molecular weight
NaBH₄	Sodium borohydride
NBT	Nitroblue tetrazolium chloride
NK	Natural killer cells
O6-MeG	O-6-methylguanine
One-way ANOVA	One-way analysis of variance
ORAC assay	Oxygen-radical absorbing capacity
PC3 cell line	Human prostate cancer cell line
PBS-BSA-EDTA	Phosphate buffer-bovine serum albumin ethylene diaminetetraacetic acid
PHA	Phytohaemagglutinin
PMBC	Peripheral blood mononuclear cell
QR	Quinone reductase
R_f	Retardation factor
SEM	Scanning electron microscopy
SPhMs	Secondary phenol metabolites
SRB	Sulphorhodamine
Sz	Streptozotocin
TEARS	Thiobarbituric acid reactive substances
TEM	Transmission electron microscopy
TFA	Trifluoroacetic acid
TGF-β	Transforming growth factor beta
TLC	Thin layer chromatography

List of Abbreviations

TNF-α	Tumor necrosis factor-alpha
TPA	Tetradecanoylphorbol-13-acetate
UV-Vis	Ultraviolet-visible spectrophotometer
spectrophotometer	
VLC	Vacuum liquid chromatography
WAP	Water soluble polysaccharide fraction
WBCs	White blood cells
WHO	World health organization
WISH	Normal epithelial cells

Introduction
