

Ain Shams University, Faculty of Science
Chemistry Department

**Preparation of Some Fluorescent
Nanostructured Doped Compounds and Their
Applications in Cellulosic-Based Manufactured
Materials.**

Thesis submitted

By

Saeed El-Sayed Mohamed Saeed

Bachelor of Science (1999)

Master of Science (2008)

Submitted for

The Degree of Doctor of Philosophy of Inorganic
Chemistry

Presented to

Chemistry Department,
Faculty of Science, Ain Shams University

2013

Acknowledgement

I would like to express my deepest gratitude and sincerest appreciation to ***Prof. Dr. Mohamed Sabry Abdel-Mottaleb***, Professor of Inorganic and Photochemistry, Faculty of Science, Ain Shams University, for suggesting the point of research, directing the research work, and for continuous guidance, supervision, support, encouragement, help and enlightening discussions.

Deepest thanks and sincere gratitude are expressed to ***Prof. Dr. Mohamed Mabrouk El-Molla***, Professor of Dyeing and Printing Chemistry, Textile Research Division, National Research Centre, for his continuous guidance, help, supervision and enlightening discussions.

I would like to express my appreciation and gratitude to ***Prof. Dr. Mohamed Lotfy Hassan***, Prof. of Cellulose Chemistry & Technology, Cellulose and Paper Division, National Research Centre for his capable supervision and enlightening discussions.

I would like to express my gratitude to ***Dr. Mohamed Mohamed Abdel-Mottaleb***, Assistant Professor, Director of Nanotechnology Program, Nile University, Egypt for his capable supervision and enlightening discussions.

I would also like to extend my appreciation to ***Dr. Esam Mohamed Adly Bakeir***, Lecturer of inorganic and Photochemistry, Faculty of Science, Ain Shams University for his help and interest.

Contents

Aim of Work.....	1
Chapter 1: Introduction.....	5
1.1.Nanoscience and nanotechnology.....	5
1.2. Properties of nanomaterials.....	7
1.3. Semiconductors nanomaterials.....	10
1.3.1. II-VI Semiconductors.....	12
1.3.1.1. Zinc oxide.....	13
1.3.1.2. Zinc sulfide.....	15
1.3.1.3. Cadmium sulfide.....	18
1.4. Nature of light.....	19
1.4.1. Fluorescence.....	21
1.4.2 Photoluminescence.....	24
1.5. Cellulosic-based manufactured materials.....	27
1.5.1. Paper.....	29
1.5.1.1. Historical development of the pulp and paper industry.....	29
1.5.1.2. Fibrous Raw Materials for Paper Manufacture	32
1.5.1.2.1. Straw as a source for paper manufacture	35
1.5.1.2.2. Bagasse as a source for paper manufacture.....	36
1.5.2. Textile fabrics.....	37
1.5.2.1.Cotton.....	38
1.5.2.1.1. Structural properties of cotton.....	38
1.5.2.1.2. Physical properties of cotton.....	40
1.5.2.1.3. Chemical properties of cotton.....	41
1.5.2.2.Flax.....	43
1.5.2.2.1.Structural properties of Flax.....	44
1.5.2.2.2.Physical properties of Flax.....	44
1.5.2.2.3.Chemical properties of Flax.....	45
1.6. Printing.....	46
1.6.1. Block printing.....	46
1.6.2. Roller printing.....	47
1.6.3. Screen printing technique.....	47
1.7. Cellulose luminescent tagging	48

2. Experimental

2.1. Cellulosic materials.....	52
2.2. Chemicals.....	52
2.3. Methods.....	53
2.3.1 Synthesis of metal ions (Pb^{2+} , Tb^{3+} , Eu^{3+} or Li^{+}) - doped ZnO as luminescent nanomaterials	53
2.3.2. Novel one step synthesis and characterization of monodoped divalent transition metal ion and tri- doped CdS as luminescent nanomaterials.....	54
2.3.3 Novel one step synthesis and characterization of monodoped divalent transition metal ion and tri- doped ZnS as luminescent nanomaterials.....	55
2.3.4 Synthesis of Novel Nanocomposites Based on Chitosan-ZnO as Luminescent Tags for Cellulosic Materials.....	56
2.3.4.1. Synthesis of chitosan-ZnO Nanospheres (CS- ZnO NS)	57
2.3.4.2. Synthesis of chitosan-ZnO Quantum dots (CS- ZnO QD).....	57
2.3.4.3. Synthesis of the CS- ZnO-oleic: Eu^{3+} composite.....	58
2.3.5. Printing.....	58
2.3.5.1 Printing paste preparation.....	58
2.3.5.2 Screen printing technique.....	59
2.4. Instrumentation	59
2.4.1. X-ray diffraction.....	59
2.4.2. Fourier transform infrared spectroscopy.....	59
2.4.3. Scanning electron microscopy and energy dispersed X-ray spectroscopy.....	60
2.4.4. Transmission electron microscopy.....	60
2.4.5. Photoluminescence spectroscopy.....	61
2.4.6. The colorimetric parameters.....	61
2.4.7. Luminescence images of the printed samples.....	61

CONTENTS	Page No.
3. Results and Discussion	62
<i>Part I: Metal ions (Pb^{2+}, Tb^{3+}, Eu^{3+} or Li^{+})-doped ZnO as luminescent materials</i>	62
3.1. Structure and morphology	62
3.1.1. X-ray diffraction	62
3.1.2. Transmission electron microscopy	66
3.2. Growth mechanism	70
3.3. Photoluminescence spectroscopy	72
<i>Part II: Novel one step synthesis and characterization of monodoped divalent transition metal ion and tri-doped CdS as luminescent nanomaterials</i>	75
3.4 Structure and morphology	75
3.4.1 X-ray diffraction	75
3.4.2 Transmission electron microscopy	78
3.4.3 Energy dispersed X-ray spectroscopy	80
3.5. Growth mechanism	82
3.6. Photoluminescence spectroscopy	83
<i>Part III: Novel one step synthesis and characterization of monodoped divalent transition metal ion monodoped and tri-doped ZnS as luminescent nanomaterials</i>	86
3.7. Structure and morphology	86
3.7.1. X-ray diffraction spectrometry	86
3.7.2. Transmission electron microscopy	88
3.7.3. Energy dispersed X-ray spectroscopy	91
3.8. Growth mechanism	92
3.9. Photoluminescence spectroscopy	93
<i>Part IV:Novel nanocomposites based on chitosan-ZnO as luminescent tags for cellulosic materials</i>	97
3.10. Structure and morphology	97
3.10.1. X-ray diffraction spectrometry	97
3.10.2. Fourier Transform Infrared Spectroscopy	99

<i>CONTENTS</i>	Page No.
3.10.3. Transmission electron microscopy.....	101
3.10.4. Energy dispersed X-ray spectroscopy.....	103
3.11. Photoluminescence spectroscopy.....	103
3.12. Colour measurements.....	105
3.13. Scanning electron microscopy.....	110
3.14. Luminescence of the printed samples under ultraviolet light.....	115
Summary and Conclusion.....	117
Summary and Conclusion of Part I	118
Summary and Conclusion of Part II	119
Summary and Conclusion of Part III	121
Summary and Conclusion of Part IV	122

List of Figures

List of Figures

Figure No.		Page No.
1.1	Part of the Periodic Table showing the elements involved in the formation of semiconductors.....	11
1.2	Interaction of a light source, an object, and an eye.....	20
1.3	Electromagnetic spectrum.....	21
1.4	Jablonski energy diagram.....	22
1.5	Structure of cellulose.....	27
1.6	Cotton fiber.....	40
1.7	Flax fiber.....	45
1.8	Security features of 200 Egyptian pounds.....	51
3.1	XRD of ZnO and 1% metal doped ZnO.....	64
3.2	XRD of pure ZnO and 5% metal doped ZnO.....	65
3.3	TEM images of (a) pure ZnO, (b) 1% Eu^{3+} doped ZnO, (c) Pb^{2+} doped ZnO nanodisks, (d) 5 % Pb^{2+} doped ZnO, (e) 5 % Li^+ doped ZnO and (f) 5 % Tb^{3+} doped ZnO.....	68
3.4	Photoluminescence spectra of ZnO and 1% metal ion doped ZnO excited at 360.....	73
3.5	Photoluminescence spectra of ZnO and 5% Metal ion doped ZnO Excited at 360.....	73
3.6	XRD of CdS and metal ions doped CdS.....	75
3.7	TEM pictures of the synthesized pure and doped CdS	80
3.8	EDX spectrum for 10 % Mn-Ni- Co-doped CdS nanoparticles.....	82
3.9	PL emission spectra of undoped CdS and 10 % metal ion doped CdS excited at 360nm.....	85
3.10	XRD of ZnS and metal ions doped ZnS.....	87

Figure No.		Page No.
3.11	TEM images of the synthesized pure and doped ZnS	90
3.12	EDX spectrum for 10 % Mn-Ni- Co-doped ZnS nanoparticles.....	92
3.13	PL emission spectra of undoped ZnS and 10 % Metal ion doped ZnS Excited at 254 nm.....	96
3.14	XRD of (a) chitosan, (b) CS-ZnO, (c) CS-ZnO-oleic and (d) CS-ZnO-oleic- Eu^{3+}	98
3.15	FTIR spectra of (a)Chitosan, (b) Chitosan-Zn, (c) Chitosan-ZnO-Oleic and (d) Chitosan-ZnO-Oleic: Eu^{3+}	100
3.16	TEM image of (a) CS- ZnO 300 X, (b) CS -ZnO-oleic 400X and (c) CS -ZnO-oleic- Eu^{3+} 200X.....	102
3.17	EDX spectrum of the synthesized CS-ZnO-oleic: Eu^{3+} ..	103
3.18	Optimum photoluminescence emission spectra of ZnO, chitosan- ZnO, chitosan-ZnO-oleic, and chitosan-ZnO-oleic- Eu^{3+} excited at 360 nm.....	105
3.19	CIE color space.....	108
3.20	SEM image of (a) unprinted Xerox paper 1000X, (b) printed Xerox paper 1000X, (c) unprinted Quena paper1000X, (d) printed Quena paper 1000X, (e) unprinted Rakta paper 1000X, (f) unprinted Rakta paper 2000X and (g) printed Rakta paper 1000X.....	113
3.21	SEM image of (a) unprinted cotton fabric 1000X, (b) printed cotton fabric 1000X, (c) printed cotton fabric 2000X, (d) unprinted linen fabric 1000X, (e) and printed linen fabric 1000X (f) printed linen fabric 2000X.....	114
3.22	Luminescence logo of the printed Xerox paper under UV lamp 365 nm.....	115
3.23	Luminescence logo of the printed Rakta paper under UV lamp 365 nm.....	115
3.24	Luminescence logo of the printed Quena paper under UV lamp 365 nm.....	116
3.25	Luminescence logo of the printed cotton textile fabric under UV lamp 365 nm.....	116
3.26	Luminescence logo of the printed linen textile fabric under UV lamp 365 nm.....	116
