THE INTERACTION OF WHOLE BODY VIBRATION AND NOISE ON THE COCHLEA

Thesis submitted for partial fulfillment of M.D. degree in Audiology

Presented by

Aladin Ahmed Abou-Setta

M.B.B.Ch., M.Sc.

Assistant lecturer of Audiology

Faculty of medicine - Suez Canal University

B7661

Supervised by

Prof. Dr. Salah Soliman

**Professor of Audiology
Dept of Otorhinolaryngology
Faculty of medicine
Ain Shams University**

Prof. Dr. Mohamed El Atreby

**Professor And Head of
Otorhinolaryngology unit
Faculty of medicine
Suez canal University**

Prof. Dr. Somia Tawfik

**Professor & Head of
Audiology unit
Dept of Otorhinolaryngology
Faculty of medicine
Ain Shams University**

Prof. Dr. Ezz El-din Holail

**Professor Of Anatomy &
Head of electron microscope unit
Faculty of medicine
Ain Shams University**

Prof. Dr. Nagy M. Iskandar

**Professor Of Otorhinolaryngology
Faculty of medicine
Suez canal University**

AIN SHAMS UNIVERSITY

2001

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

إنك أنت العليم الحكيم."

صِرَاحُ اللَّهِ الْعَظِيمِ

ACKNOWLEDGEMENT

I would like to express my deepest gratitude and thanks for **Professor Dr. Salah Soliman, professor and leader of audiology, ENT department, Ain Shams University**, he provided me with unlimited support, invaluable advice and continuous encouragement.

Sincere thanks are due to **professor Dr. Mohamed El Atreby, professor & head of ENT department, Suez Canal University**, for his active support and faithful guidance.

No word can express my thanks to **professor Dr. Somia Tawfik, professor and head of audiology unit, Ain Shams University**, for her precious help, sound advice and fruitful guidance.

I am truly appreciative of the precious help given to me by **professor Dr. Ezz El Din Holail professor of anatomy and head of electron microscopy unit, Ain Shams University**, without his active invaluable participation, it would have been difficult to carry out the present work successfully.

I am also thankful to **professor Dr. Nagy Iskandar, professor of ENT, Suez Canal University** for his valuable advices throughout this work.

Acknowledgement

Very special gratitude is due to professor **Dr. Wafaa Shehata Dieler** and **Dr. Ralf Dieler**, ENT department, Würzburg University, Germany for their precious help in electron microscopy technique in this study.

I am also true thankful to my family, especially my wife **Dr. Noha Abd El Hakam**, whose care, patience and sincere help have always been the pounce of light to guide me in my endeavor.

LIST OF CONTENTS

• List of tables	v
• List of figures	ix
• List of abbreviations	xiii
• Introduction	1
• Aims of the work	3
• Review of literature	5
Functional anatomy of the cochlea	5
The effects of combined exposure to whole body vibration and noise on the cochlea	21
Distortion product otoacoustic emissions as a monitor for the cochlear functions	35
• Methodology	47
• Audiological results	59
• Histological results	97
• Discussion	187
• Conclusions	199
• Recommendations	201
• Summary	203
• References	205
• Arabic summary	

LIST OF TABLES

Table (1)	Groups of the study	73
Table (2)	Comparison between DP amplitude in control group and noise subgroup.	74
Table (3)	Comparison between signal to noise ratio in control group and noise subgroup.	75
Table (4)	Comparison between DP amplitude in control group and vibration subgroup.	76
Table (5)	Comparison between signal to noise ratio in control group and vibration subgroup.	77
Table (6)	comparison between DP amplitude in control group and noise & vibration subgroup.	78
Table (7)	Comparison between DP amplitude in noise versus noise& vibration subgroups.	79
Table (8)	Comparison between signal to noise ratio in control group and noise & vibration subgroup.	80
Table (9)	Comparison between signal to noise ratio in noise versus noise & vibration subgroups.	81
Table (10)	Comparison between DP amplitude in noise and recovery noise subgroups.	82
Table (11)	Comparison between DP amplitude in control group and recovery noise subgroup.	83

List of tables

Table (12)	Comparison between signal to noise ratio in noise and recovery noise subgroups.	84
Table (13)	Comparison between signal to noise ratio in control group and recovery noise subgroup.	85
Table (14)	Comparison between DP amplitude in control group and recovery vibration subgroup.	86
Table (15)	Comparison between DP amplitude in vibration and recovery vibration subgroups.	87
Table (16)	Comparison between signal to noise ratio in control group and recovery vibration subgroup.	88
Table (17)	Comparison between signal to noise ratio in vibration and recovery vibration subgroups.	89
Table (18)	comparison between DP in control group and recovery noise & vibration subgroup.	90
Table (19)	Comparison between DP amplitude in noise & vibration and recovery noise & vibration subgroups.	91
Table (20)	Comparison between signal to noise ratio in control group and recovery noise & vibration subgroup.	92
Table (21)	Comparison between signal to noise ratio in noise& vibration and recovery noise & vibration subgroups	93
Table (22)	Comparison between DP amplitude in recovery noise versus recovery noise& vibration subgroups.	94
