MAXIMIZATION OF THE CAPACITY OF DISPATCHABLE DG UNITS TO BE INSTALLED ON RADIAL DISTRIBUTION SYSTEM

By

Taha Abdel Hady Abdel Baseer Hussein

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
Master of Science
in
Electrical Power and Machines Engineering

Approved by the
Examining Committee:

Prof. Dr. Mahmoud A. M. Farrag **Thesis Advisor**

Prof. Dr. Zeinab Hanem Mohamed Osman **Internal Examiner**

Prof.Dr.Ebtisam Mostafa Mohamed Saied **External Examiner**
(Electrical Power Department, Faculty of Engineering
Benha University, Shoubra)

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
2015

ACKNOWLEDGMENTS

Firstly, I would like to thank Allah for guiding and helping me to accomplish this thesis.

I would like to extend my sincerest gratitude and thanks to Prof. Dr. Mahmoud Ali Farrag for his excellent supervision, encouragement, guidance, invaluable advices and support for me throughout this thesis.

I would like to give thanks to my colleagues for their continuous encouragement.

I would like to express my deep appreciation to my mother, sisters and brothers for their continuous encouragement.

To my wife thank you from my heart for endurance, providing understanding and encouragement, and for the moral support you gave which has enabled me to finish this work. Special thanks to my kids (Abdel Rahman and Nour) who are my happiness forever, I present this work to the spirit of my dear father.

ABSTRACT xv

CHAPTER 1 : INTRODUCTION 1

1.1. OVERVIEW 1

1.2. DG UNIT DEFINITIONS 1

1.3. BENEFITS OF DG UNITS 3

1.4. IMPORTANT CLASSIFICATION OF CONVENTIONAL DG UNITS 4

1.5. OPERATION MODES OF DG UNITS 6

1.5.1. Base load operation mode 6

1.5.2. Peak shaving operation mode 7

1.5.3. Export/Import operation mode 8

1.6. SITES OF DG UNITS ON POWER SYSTEM 8

1.7. STANDARD SIZES AND COSTS OF DG UNITS 8

1.7.1. Standard Sizes of DG Units 8

1.7.2. Capital costs of DG units as compared with capital cost of central power plants 9

1.8. OWNERSHIP OF DG UNITS IN POWER SYSTEM 12

1.9. THESIS OBJECTIVES AND ORGANIZATION 12

CHAPTER 2 : BASIC CHARACTERISTICS OF CONVENTIONAL DG UNITS FROM PLANNING POINT OF VIEW 14

2.1. INTRODUCTION 14
2.2. TECHNICAL IMPACTS OF DG UNITS 14
2.2.1. Impact of DG on voltage profile 14
2.2.2. Impact of DG on voltage flicker 14
2.2.3. Impact of DG on Losses 15
2.2.4. Impact of DG on Harmonics 15
2.2.5. Impact of DG units on, protection system 15
2.2.6. Impact of DG units on reliability 16
2.3. BASIC IMPORTANT CHARACTERISTICS OF DG FROM PLANNING POINT OF VIEW 16
2.3.1. Internal consumption engines 17
2.3.1.1. Reciprocating engines 17
2.3.2. Gas Turbines 19
2.3.3. Combined Cycle Gas Turbines 19
2.3.4. Micro –turbines 20
2.3.5. Fuel- Cell 22
2.3.6. Biomass 24
2.4. Connection Methods of DG Units to the Grid 25
CHAPTER 3 : IDENTIFICATION OF PLANNING PROBLEM FOR CONVENTIONAL DG UNITS AND LITERATURE SURVEY 28
3.1. INTRODUCTION 28
3.2. GENERAL DG PLANNING PROBLEM DEFINITION 28
3.3. PLANNING OF PRIVATELY OWNED DG UNITS 28
3.4. PLANNING OF UTILITIES OWNED DG UNITS 28
3.4.1. Economical approach 28
3.4.2. Technical approach 29
3.5. SOLUTION ALGORITHMS 30

3.6. LITERATURE SURVEY ON MAXIMIZATION OF DG CAPACITY 30

CHAPTER 4 : A Mathematical Planning Model For Maximization Of DG Capacity On Distribution Feeders 32

4.1. INTRODUCTION 32

4.2. MATHEMATICAL PLANNING MODEL 32

4.3. MODEL VERIFICATION 36

4.3.1. System description 36

4.3.2. Base case study results 37

4.3.3. Optimum planning results: case one 40

4.3.4. Optimum planning results: case two 59

4.4. CONCLUSION 77

CHAPTER 5 : Model Application on 31-Bus System 78

5.1. INTRODUCTION 78

5.2. MODEL APPLICATION 78

5.2.1 System description 78

5.2.2 Base case study results 80

5.2.3. Optimum planning results: case one 84

5.2.4. Optimum planning results: case two 104

5.3 CONCLUSION 124

CHAPTER 6 : CONCLUSION AND FUTURE WORKS .. 125

6.1. **CONCLUSION** 125

6.2. **RECOMMENDATION AND FUTURE WORKS** 125

REFRENCES 126

APPENDICES 131

Appendix A : **Single Line Diagram for 12 Buses Radial System** 132

Appendix B : **Bus load data for 12 Buses Radial System** 133

Appendix C : **Branch data for 12 Buses Radial System** 134

Appendix D : **Single Line Diagram For 31 Buses Radial System** 135

Appendix E : **Bus Load Data For 31 Buses Radial System** 136

Appendix F : **Branch Data For 31 Buses Radial System** 137
