ACKNOWLEDGEMENT

First of all, I would like to express my sincere thanks to Professor Dr. **S. M. Mokhtar**, Prof. of Physical Chemistry, Faculty of Womens' for Art's, Science and Education, Ain Shams University, Cairo, Egypt for their kind guidance in my study.

Special thanks want to give to Professor Dr. **T. Siyam**, Prof. of Radiochemistry, and Head of Nuclear Chemistry Department, Atomic Energy Authority, Egypt. He has continuously encouraged me during the research and gave me constant and detailed directions in all my studies.

Deep thanks and sincere gratitude are due to Dr. **A. A. El-Zahhar**, Lecturer of Radiochemistry, Department of Nuclear Chemistry, Atomic Energy Authority, Egypt.

I would like also to express my thanks to my family for their supports, during my study so that I was able to finish this thesis.

LIST OF TABLES.....	ix

CHAPTER 1

INTRODUCTION

1.1. Polymerization by radiation technology.....	1
1.1.1. Radiation sources.....	1
1.1.2. Radiation dose and radiation units.....	1
1.1.3. Absorption of radiation energy.....	1
1.1.4. Radiation-induced processes.....	1
1.1.5. Polymerization reaction initiated by radiations.....	1
1.1.6. Advantages and defects of radiation-induced polymerization.....	1
1.2. Methods of polymerization.....	1
1.2.1. Graft copolymers.....	1
1.2.2. Template polymerization.....	1
1.2.2.1. Chain Template Polymerization.....	1
1.2.2.2. Template Copolymerization.....	1
1.2.2.3. Template radical polymerization kinetics.....	1
1.2.2.4. Products of template polymerization.....	1
1.2.2.5. Interpolymer complexes.....	1

□,□,□,□,□. Polymer- polymer interactions.....	□□
□,□,□,□,□. Monomer polymer interactions.....	□□
□,□,□,□,□. Advantages of polycomplexes prepared by template polymerization.....	□□
□,□,□,□,□. Ladder-type polymers.....	□□
□,□. Uses of acrylamide polymers	□□
□,□. Ion exchange materials	□□
□,□,□. Inorganic ion exchanger.....	□□
□,□,□. Organic ion exchangers.....	□□
□,□,□. Composite ion exchangers.....	□□
□,□,□,□. General concept of clay and clay minerals composites.....	□□
□,□,□,□,□. Intercalation mechanism of polymer clay composite.....	□□
□,□,□,□,□. Monomer intercalation and in-sit polymerization.....	□□
□,□,□,□,□. Polymer intercalation.....	□□
□,□,□,□,□. Restacking of the exfoliated layers over the polymer.....	□□
□,□,□,□,□. Preparation of polymer clay composites.....	□□
□,□,□,□,□. Application of clay-polymer composites.....	□□
□,□,□,□. General concept of ferrocyanide composite.....	□□
□,□,□,□,□. Methods of preparation of ferrocyanides.....	□□

. Simple precipitations.....	
. Precipitation on porous supports.....	
, , , . Preparation of ferrocyanide composite materials.....	
, , , . Mechanism of metal ion sorption on ferrocyanides.....	
, , , . Chemical stability of hexcyano ferrate composite.....	
, , , . Use of polymer ferrocyanide composites.....	
, . Sorption process	
, . Mechanism of interaction of polymeric resins with ions in aqueous solution	

CHAPTER 1

EXPERIMENTAL

, . Chemicals and reagents	
, . Equipments	
, , . Gamma cell.....	
, , . Infrared spectrophotometer.....	
, , . UV/V.Spectrophotometer.....	

□,□,□. diffractometer.....	□□	X-ray
□,□,□. analyzer.....	□□	Thermal
□,□,□. analyzer.....	□□	Single channel
□,□. Technique	□□	Experimental
□,□. . polyacrylamide.....	□□	Preparation of
□,□. . Preparation of Polymer-montmorillonite composite resin.....	□□	
□,□. . Preparation of Polymer-ethylenediaminetetraacetic acid disodium Salt composite resin.....		
□,□,□. Preparation of Polymer-hexacyanoferrate composite resin.....		
□,□. . Preparation of potassium nickel hexacyanoferrate and potassium zinc hexacyanoferrate.....	□□	
□,□,□. Radioactive isotopes.....	□□	
□,□,□. water.....	□□	De-oxygenated
□,□,□. determination.....	□□	Capacity
□,□,□. measurement.....	□□	Swelling

□,□. . Percentage uptake of radioactive isotope.....	
□,□.□□. Batch sorption studies.....	□□
□,□.□□,□. Sorption of Cu (II) and Cr (VI).....	□□
□,□.□□,□. Sorption of Co (II) and Eu (III).....	□□
□,□.□□,□. Complexation of metal ions with polymeric composite resins.....	□□
□,□.□□. The integral procedural decomposition temperature.....	□□

CHAPTER □

RESULTS AND DISCUSSION

□,□. Gamma radiation induced preparation of polymeric composite resins and their structure assignments	□□
□,□,□. Studying the preparation of poly (acrylamide-acrylic acid)-ethylenediaminetetra acetic acid disodium salt composite resin.....	□□
□,□,□. Studying the preparation of poly (acrylamide-acrylic acid)-montmorillonite composite resin.....	□□
□,□,□. Studying the preparation of poly (acrylamide-acrylic acid)-potassium nickel hexacyanoferrate composite resin.....	
□,□. . Poly (acrylamide-acrylic acid)-ethylenediaminetetra acetic acid disodium salt composite structure.....	
□,□,□. Poly (acrylamide-acrylic acid)-montmorillonite composite structure.....	□□
□,□,□. Poly (acrylamide-acrylic acid)-potassium nickel hexacyano-	

ferrate composite structure.....	00
1.1. Characterization behavior of different polymeric composite resins.....	00
1.1.1. Thermal decomposition behavior.....	00
1.1.1.1. Thermogravimetric analysis (TG).....	00
1.1.1.2. Differential thermal analysis (DTA).....	00
1.1.1.3. X-ray diffraction of prepared polymeric composite resins.....	00
1.2. Application of some synthesized polymeric composite resins for removal of some metal ions.....	00
1.2.1. Sorption from complexing agent solution.....	00
1.2.1.1. Variation of polymeric composite weights.....	00
1.2.1.2. Effect of competing ions on sorption of Co(II) and Eu(III) on polymeric composite resins.....	00
1.2.1.3. Effect of pH on Co(II) and Eu(III) sorption.....	00
1.2.1.4. Sorption of Eu(III) and Co(II) from solution containing inorganic salt.....	00
1.2.1.5. Effect of metal ion concentration.....	00
1.2.1.6. Variation of contact time.....	00
1.2.1.7. Effect of ionic strength on sorption of Co (II) and Eu (III) on the prepared polymeric composite resins.....	00
1.3. Kinetics and equilibrium studies for sorption of Cu (II) and Cr (VI) ions onto the prepared polymeric composite resins.....	00
1.3.1. Effect of hydrogen ion concentrations.....	00
