THE ROLE OF HAEMATOPOIETIC CYTOKINES IN NORMAL AND ABNORMAL HAEMOPOIESIS

Essay

**Submitted for Partial Fulfillment of
Master Degree in Clinical Pathology**

By

Nermine Talaat Sami

M.B., B.Ch.

Supervised By

Prof. Dr. Bassima Mahmoud El-Essawy

Professor of Clinical Pathology

Faculty of Medicine, Ain Shams University

Dr. Affaf Abd El-Aziz Abd El-Ghafar

Assistant Professor of Clinical Pathology

Faculty of Medicine, Ain Shams University

Dr. Nashwa Abd El-Moneim Ezzat

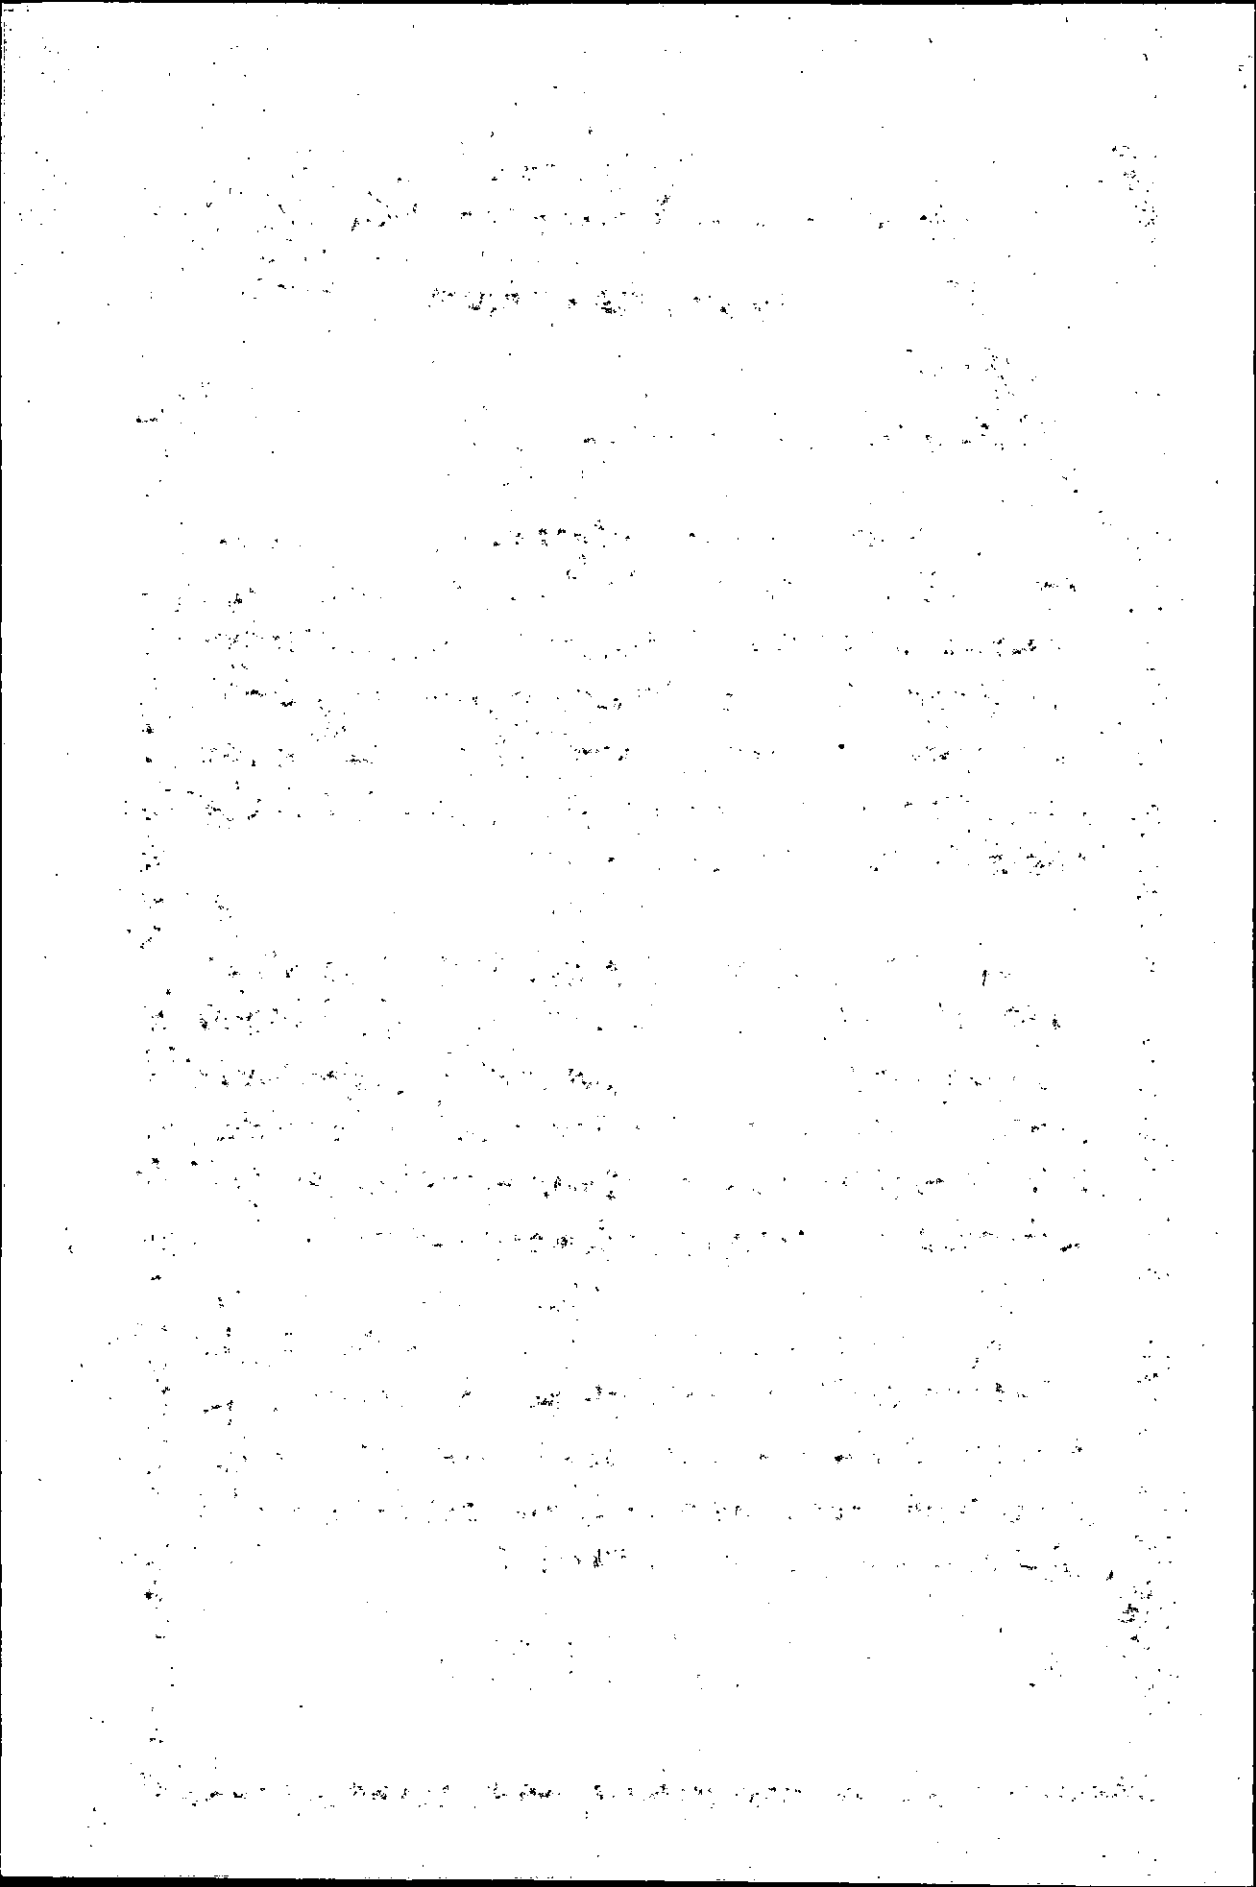

Lecturer of Clinical Pathology

Faculty of Medicine, Ain Shams University

**Faculty of Medicine
Ain Shams University
2001**

B02-0

Wetone Ahmed Hany

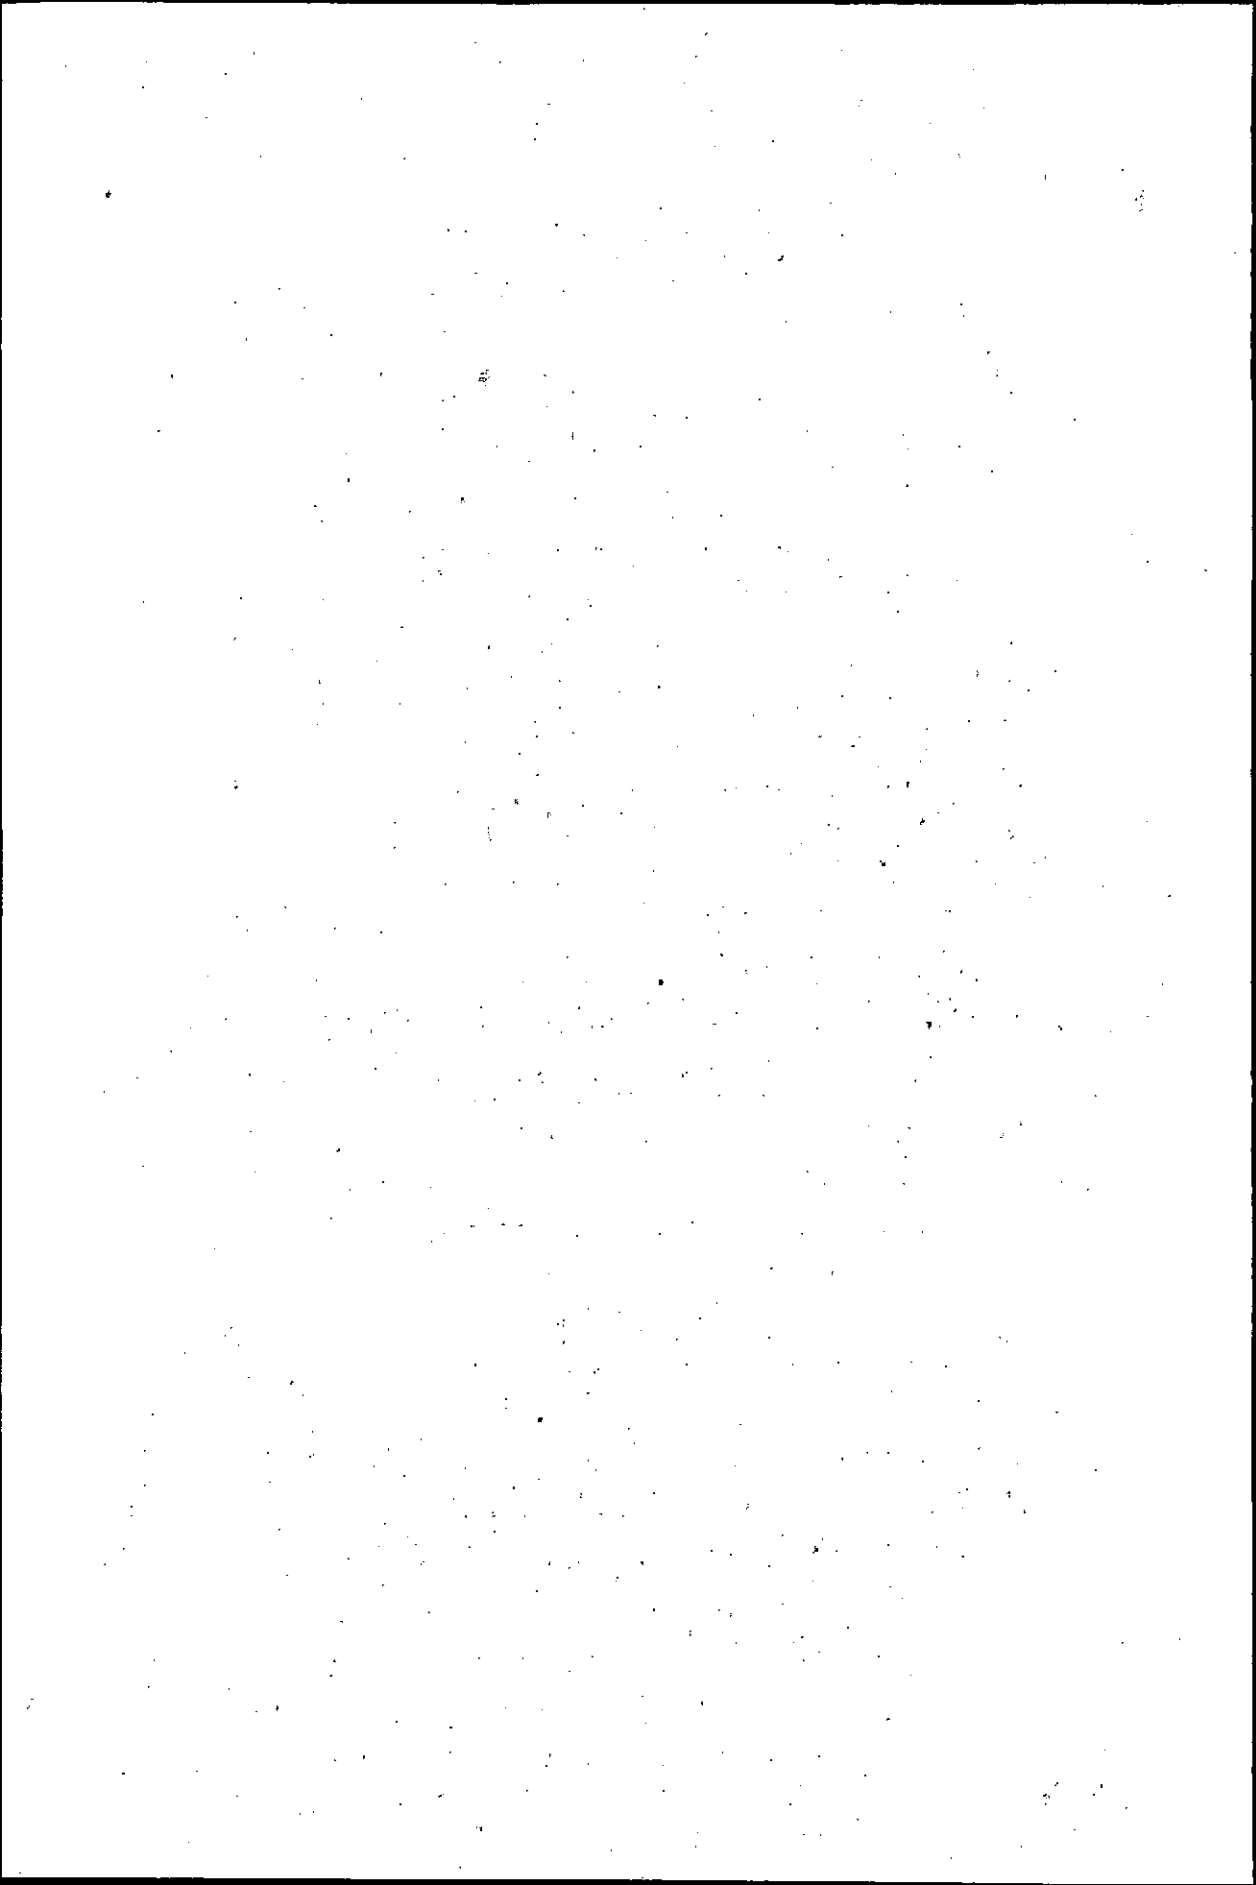

Acknowledgment

First of all, thanks to GOD

*My deepest gratitude and sincere appreciation to **Prof. Dr. Basima Mahmoud El-Essawy**, Professor of Clinical Pathology, Faculty of Medicine, Ain Shams University, for her indispensable guidance and advice; her ever readiness for help and support and for her expert touches. I really had the honor of having her supervise this work.*

*My deepest thanks and special regards to **Assist. Prof. Dr. Affaf Abd El-Aziz Abd El-Ghafar**, Assistant Professor of Clinical Pathology, Faculty of Medicine, Ain Shams University, for her generous help, continuous encouragement, and for her precious and valuable guidance throughout the whole work.*

*My sincere appreciation to **Dr. Nashwa Abd El-Moneim Ezzat**, Lecturer of Clinical Pathology, Faculty of Medicine, Ain Shams University, for her great help, honest supervision and constant unlimited guidance throughout the whole work.*

CONTENTS

Subjects	Page
* List of Figures	i
* List of Tables	i
* List of Abbreviations	ii
* Introduction	1
* Aim of The Work	2
* Review of Literature	3-101
• The Cell Cycle	3
- Cell Cycle	3
- Cell Cycle Control	4
1. G1 to S transition	5
2. S phase	7
3. G2 to M transition	7
4. M to G1 transition	8
• Normal and Abnormal Hemopoiesis	9
I. Normal Hemopoiesis	9
A) Granulopoiesis	10
B) Erythropoiesis	11
C) Megakaryopoiesis	12
II. Abnormal Hemopoiesis	13
• Thrombopoietin	20
- Introduction	20
- TPO Gene	21
- TPO Protein	21
- Cellular Sources and Production	24
- TPO Receptor	25
- Biological Activities of TPO	26
- Clinical Applications of TPO	31
• Erythropoietin	34
- EPO Gene	34

CONTENTS(Cont.)

Subjects	Page
- EPO Protein	34
- Regulation of EPO Production	35
- EPO Receptor	36
- Biological Activities of EPO	38
- Clinical Uses of EPO	39
• Granulocyte Colony-Stimulating Factor	42
- The Cytokine Gene	42
- The Protein	43
- Cellular Sources and Production	44
- Receptors	45
- Biological Activities	47
- Clinical Applications	49
• Macrophage Colony-Stimulating Factor	51
- The Cytokine Gene	52
- Cellular Sources and Production	53
- M-CSF Receptor	53
- Cellular and Biological Activities	55
- Clinical Uses of M-CSF	57
• Granulocyte-Macrophage Colony-Stimulating Factor	59
- The Cytokine Gene	59
- The GM-CSF Protein	60
- Cellular Sources and Production	61
- GM-CSF Receptor	61
- Biological Activities	63
- GM-CSF in Disease and Therapy	66
• Flt3 Ligand	68
- The Cytokine Gene	68
- The Protein	68

CONTENTS(Cont.)

Subjects	Page
- Cellular Sources	69
- The Receptor	69
- Biological Activities	70
- Flt3 Ligand in Disease and Therapy	71
• Transforming Growth Factor- β	74
- The Cytokine Gene Family	74
- The Protein	74
- Cellular Sources and Production	75
- The Receptors and Signal Transduction	75
- Biological Activity: Multi-Functional Regulation	77
- TGF- β in Disease and Therapy	78
• Interleukins	81
- Granulopoietic Factors	81
- Megakaryocytopoietic Factors	82
- Lymphopoietic Factors	83
- Multipotential Factors	92
- Indirectly Acting Factors	95
- Clinical Applications of Interleukins	98
* Summary	102
* References	106
* Arabic Summary.	

LIST OF FIGURES

Fig. No.	Title	Page
1	Schematic presentation of cell cycle phases	3
2	Diagram of hematopoietic cell differentiation ..	10
3	The structure of the thrombopoietin gene and its clinical derivatives	22
4	Deduced amino acid sequence of the human TPO	23
5	Model for the TPO receptor	26
6	Oxygen dissociation curve of hemoglobin	36
7	Model for the EPO receptor	37
8	Amino acid sequence of human G-CSF	43
9	Model for the G-CSF receptor	47
10	Model for the M-CSF receptor	54
11	GM-CSF protein sequence	60
12	Model for the GM-CSF receptor	62
13	The structure of the receptors for TGF- β	76

LIST OF TABLES

Table No.	Title	Page
1	Inherited bone marrow failure syndromes	14
