# **PHARMACOLOGICAL AND TOXICOLOGICAL STUDIES ON NIGELLA SATIVA**

**Thesis Presented**

**By**

***Hamed Mohamed Nassar***

**M.V.Sc., 1993 (Pharmacology), Alex. University**

**For The Degree of  
Doctor Philosophy of Veterinary Medical Sciences  
(Pharmacology)**

**Submitted to  
Faculty of Veterinary Medicine  
Alexandria University**

**1997**

B-71 9.

## Under The Supervision Of

**PROF. DR.  
ABD EL-SALAM FAWZI  
EL-SAWI**

Professor of Pharmacology  
and Head of Department of  
Physiology, Pharmacology and  
Biochemistry  
Faculty of Veterinary Medicine  
Alexandria University

**PROF. DR.  
MOHAMED MOHAMED  
EL-DAKHAKHNY**

Professor of Pharmacology  
Faculty of Medicine  
Alexandria University

**PROF. DR.  
ABD-EL-DAYEM ZAKARIA  
MOHAMED**

Professor of Physiology  
Faculty of Veterinary Medicine  
Alexandria University

**PROF. DR.  
FAHEMA FAHMY  
KASSEM**

Professor of Pharmacognosy  
Faculty of Pharmacy  
Alexandria University

## APPROVAL SHEET

This is to approve that the dissertation presented by *Hamed Mohamed Nassar* to Faculty of Veterinary Medicine, Alexandria University entitled "Pharmacological studies on *Nigella sativa* in chickens" for the degree of Ph.D. "*Pharmacology*" has been approved by the examining committee:

### THE EXAMINING COMMITTEE:

*Prof. Dr./ Moustafa Abdel Aziz Mohamed*

Professor of Pharmacology

Faculty of Veterinary Medicine - Tanta University

Signature

*Prof. Dr./ El-Sayed Ahmed Abdel Aziz Mohamed*

Professor of Pharmacology

Head of Pharmacology, Forensic Medicine and Toxicology Department

Faculty of Veterinary Medicine - Zagazig University

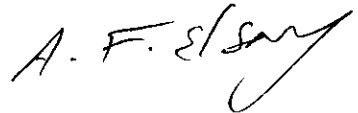

*Prof. Dr./ Abdel Salam Fawsi El-Sawi*

Professor of Pharmacology

Head of Physiology, Pharmacology and Biochemistry

Faculty of Veterinary Medicine - Alexandria University (Supervisor)

*Prof. Dr./ Mohamed Mohamed El-Dakhkhny*

Professor of Pharmacology

Faculty of Medicine - Alexandria University (Supervisor)

*Prof. Dr./ Abdel Dayem Zakaria Mohamed*

Professor of Physiology

Faculty of Veterinary Medicine

Alexandria University (Supervisor)

## ACKNOWLEDGEMENT

First of all, prayerful thanks are to our Merciful GOD who gives us every thing we have.

I would like to express my appreciation and gratitude to Prof. Dr. Abd El-Salam El-Sawi, Professor of Pharmacology, Faculty of Veterinary Medicine, Alexandria University for his supervision, helpful advice, continuous encouragement, guidance and criticism.

Deep appreciation is expressed to Prof. Dr. Mohammed El-Dakhakhny, Professor of Pharmacology, Faculty of Medicine, Alexandria University for his supervision, careful guidance and kind orientation throughout the research work.

My thanks are due to Prof. Dr. Abd El-Dayem Zakaria, Professor of Physiology, Faculty of Veterinary Medicine, Alexandria University for his extreme valuable advices, instructions, guidance, suggestions and encouragement throughout my investigation; under his supervision, this work has been completed.

My thanks also extend to Prof. Dr. Fahema Kassem, Professor of Pharmacognosy Faculty of Pharmacy, Alexandria University for her valuable help suggestions, comments and guidance throughout this study.

I would like to express my gratitude and best thanks to Dr. Ibrahim M. El-Ashmawy, Assistant Professor of Pharmacology, Faculty of Veterinary Medicine, Alexandria University for his assistance during this work.

I wish to express my thanks to Dr. Abd El-Wahab Mandour, Assistant Professor of Biochemistry, and Dr. Mahdy A. Korshom, Assistant Professor of Biochemistry, Faculty of Veterinary Medicine, Alexandria University for their help in the biochemical analysis.

Thanks are due to Dr. Sameh Yousef, Lecturer of Pathology, Faculty of Veterinary Medicine, Alexandria University for his help in the histopathological examination.

*To*

*My Parents*

*and My Wife*

## TABLE OF CONTENTS

1. INTRODUCTION .....	1
2. REVIEW OF LITERATURE .....	4
2.1. Taxonomy .....	4

## LIST OF TABLES

Table (1): Ingredients of the commercial balanced ration from El-kahira poultry diet company for balady chickens (for one kg ration). . . . .	37
Table (2): The experimental design used for studying the effects of different forms of <i>Nigella sativa</i> in the cockerels. . . . .	43
Table (3): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the body weight (gm) of balady cockerels. . . . .	52
Table (4): Effect of different forms of <i>Nigella sativa</i> L at different levels mixed with the ration for 4 months on the daily weight gain (gm/day) of balady cockerels. . . . .	54
Table (5): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the feed conversion ratio of balady cockerels. . . . .	55
Table (6): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the heart weight (gm) of balady cockerels. . . . .	58
Table (7): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the liver weight (gm) of balady cockerels. . . . .	59
Table (8): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the spleen weight (gm) of balady cockerels. . . . .	60
Table (9): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the pancreas weight (gm) of balady cockerels. . . . .	61
Table (10): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the bursa weight (gm) of balady cockerels. . . . .	62

Table (11): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the testes weight (gm) of balady cockerels. . . . .	63
Table (12): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the RBCs count ( $\times 10^6/\text{cmm}$ ) of balady cockerels. . . . .	66
Table (13): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the haemoglobin (g/dl blood) of balady cockerels. . . . .	67
Table (14): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the PCV (%) of balady cockerels. . . . .	68
Table (15): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the WBCs count (thousands/ml) of balady cockerels. . . . .	69
Table (16): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the basophils % of balady cockerels. . . . .	70
Table (17): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the eosinophils % of balady cockerels. . . . .	71
Table (18): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the monocytes % of balady cockerels. . . . .	72
Table (19): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the lymphocytic % of balady cockerels. . . . .	73
Table (20): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the neutrophils % of balady cockerels. . . . .	74
Table (21): The effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum testosterone level (ng/dl) of balady cockerels. . .	76

Table (21): The effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum testosterone level (ng/dl) of balady cockerels. . .	76
Table (22): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the AST ( $\mu$ /L) of balady cockerels. . . . .	79
Table (23): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the ALT ( $\mu$ /L) of balady cockerels. . . . .	80
Table (24): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum bilirubin level (mg/dl) of balady cockerels. . . . .	81
Table (25): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum total protein level (g/dl) of balady cockerels. . . . .	82
Table (26): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum albumin level (g/dl) of balady cockerels. . . . .	83
Table (27): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum globulin level (g/dl) of balady cockerels. . . . .	84
Table (28): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum creatinine level (mg/dl) of balady cockerels. . . . .	85
Table (29): Effect of different forms of <i>Nigella sativa</i> L. at different levels mixed with the ration for 4 months on the serum urea level (mg/dl) of balady cockerels. . . . .	86
