# **Microbiological Studies on *E. coli* Isolated From Cultured Fish**

636,0876

*A Thesis*

Presented to Department of post graduate  
Faculty of Veterinary Medicine  
Alexandria University  
In Partial Fulfillment of the Requirements

*For*

The degree of Master of Veterinary Science

*Specialization*

**Bacteriology**

*By*

**RASHA ANEES SONKEL**

(B. V. SC., ALEXANDRIA UNIV. 2004)

(2010)

JPVSE

- SUPERVISOR'S COMMITTEE :

**Prof. Dr. Mohamed Ali Akeila**  
**Professor and Head of Microbiology Dept.**  
**Fac. Of Vet. Med. Alexandria University**

**Prof. Dr. Riad Hassan Khalil**  
**Professor of fish Diseases and Hygiene.**  
**Fac. of Vet. Med. Alexandria University**

**Prof. Dr. Hamed Abd El-Tawab Samaha**  
**The head of general association**

# Microbiological studies on *E. coli* isolated from cultured fish

Thesis Presented  
By  
**Rasha Anees Sonkel**

To  
Alexandria University  
Faculty of Veterinary Medicine,  
Department of Microbiology  
For  
The Degree of M.V.Sc.  
Specilization  
( Microbiology )

Members of Committee:

Approved

Prof. Dr. Thanaa El-Shayeb

Professor of Microbiology

Fac. of Vet. Med., Kafr El-Sheikh University.

Prof. Dr. Helmy Ahmed Torky

Professor of Microbiology,

Fac. of Vet. Med., Alexandria University.

Prof. Dr. Mohamed Ali Akeila

Professor and Head of Microbiology Dept.

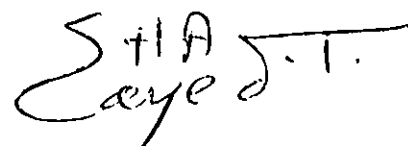

Fac. Of Vet. Med. Alexandria University

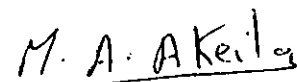

Prof. Dr. Riad Hassan Khalil

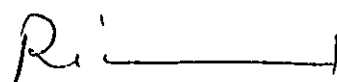

Professor of fish Diseases and Hygiene.

Fac. of Vet. Med. Alexandria University

 Thanaa

 H. A. Torky

 M. A. Akeila

 Riad

# **ACKNOWLEDGEMENT**

## **ACKNOWLEDGEMENT**

First of all deepest thanks for our merciful God, who gave us every things.

I am deeply grateful and wish to express my sincere appreciation and heartily thanks to the supervisor *Prof. Dr. Mohamed Ali Akeila*, Professor and Head of Microbiology Dept. Fac. Of Vet. Med. Alexandria University for his constant help, kind advice, unfailing interest and valuable discussion.

Special thanks and full appreciation are due to *Prof. Dr. Riad Hassan Khalil*, Professor of fish Diseases and Hygiene. Fac. Of Vet. Med. Alexandria University, for his supervision, direct and effective advices during the course of this study especially.

My thanks are also due to the *Staff members* of the Department of Microbiology and Fish Diseases, Fac. Vet. Med., Alexandria University, for their great encouragement and facilities provided during this work.

**DEDICATION**

# **DEDICATED TO**

**To     My Father**

**To     My mother**

**To     My Sister**

**and**

**To     My brothers**

# CONTENTS

ITEM	PAGE
<b>I. INTRODUCTION</b>	1
<b>II. REVIEW OF LITERATURE</b>	2
What is <i>E. coli</i> and <i>E. coli</i> 0157: H7 ?	2
Economic importance of <i>E. coli</i> in fish	6
History of <i>E. coli</i> infection in fish	6
Susceptable fish	7
Predisposing factors for infection	8
Source and route of infection	10
Symptoms and P.M lesions in fish	12
Laboratory Diagnosis	12
Serological characterization of <i>E. coli</i> isolates	17
Molecular typing of <i>E. coli</i> isolates by random amplified Polymorphic DNA (RAPD -PCR)	18
Zoonotic importance	19
Antibiotic sensitivity of <i>E. coli</i>	21
Treatment	22
<b>III. MATERIAL AND METHODS</b>	24
<b>IV. RESULTS</b>	35
<b>V. DISCUSSION</b>	45
<b>VI. CONCLUSION</b>	48
<b>VII. ENGLISH SUMMARY</b>	49
<b>VIII. REFERENCES</b>	51
<b>ARABIC SUMMARY</b>	

## LIST OF TABLES

TABLE	PAGE
<b>Table (1) :</b> Fish samples called for the bacterial examination .	24
<b>Table (2) :</b> Polyvalent and monovalent antisera used for serogrouping of isolated <i>E. coli</i> .	26
<b>Table (3) :</b> Different types of antimicrobial discs with variable concentration :	26
<b>Table (4) :</b> List of Nucleotide sequence of RAPD-PCR primers .	27
<b>Table (5) :</b> Showing number of fish samples among different fish species apparently healthy and diseased fish	35
<b>Table (6) :</b> Showing the incidence of bacterial isolates according to species affected in El-Behera Governorate .	36
<b>Table (7) :</b> Showing the incidence of bacterial isolates according to species affected in Kafr El-Sheikh Governorate.	37
<b>Table (8) :</b> Showing the incidence of bacterial isolates according to species affected in Domiate .	38
<b>Table (9) :</b> Number of bacterial isolation from different organs fish samples .	38
<b>Table (10) :</b> Number and percentage of <i>E. coli</i> isolates from different organs .	39
<b>Table (11) :</b>	39
<b>Table (12) :</b>	40
<b>Table (13) :</b> Biochemical characters of <i>Escherichia coli</i> .	41
<b>Table (14) :</b> Intepreation of results of antibiotic sensitivity assay .	42
<b>Table (15) :</b> Results of <i>E. coli</i> serotypes isolates from fish sample (liver, intestine, kidney and spleen) :	42

## LIST OF FIGURES

FIGURE	PAGE
<b>Fig. (1)</b> : Finger printing of <i>E. coli</i> isolates of six groups (RAPD D-PCR) amplified poly morphic DNA above lanes 1-6 corresponds to <i>E. coli</i> strain groups respectively, size is strand 1- kb ladder in lane marker (L); size (in bps) was indicated at right . Number of bands ranging from 7-10 bands with Molecular size ranging from 500 bps to approximately 1500 bps .	43
