# APPROVAL SHEET

## In Vitro Mass Production of Seedlings Derived From Some Selected Citrus Cultivars

By

**Mokhtar Mamdouh Mohamed Shaaban**

This dissertation for the Ph.D. degree has been approved by:

*M. A. Hussein*

*Issam A. Hassaballa*

*Samir El-Agnaf*

(Committee in charge)

Date: 27/ 2/2000

**Dedicated to the love of my Family,  
Devotion of my wife and  
The Memory of late  
Prof. Shehata El-Kassas**

# **ACKNOWLEDGEMENT**

## ACKNOWLEDGEMENT

I gratefully acknowledge my indebtedness to **Dr. Samir Z. El-Agamy**, Prof. of Pomology, Horticulture Department, Assiut University, who greatly influenced my scientific progress, stimulated my interest in Pomology and who dedicated most of his time and energy helping his research students. I am glad express my sincere appreciation and gratitude to him for his keen supervision, suggesting the problem and following my progress throughout the course of this investigation.

I am also most indebted to **Dr. Mohamed A. Hussein**, Prof. of Pomology and ex-Chairman of Fruit Section for his continuous encouragement, constructive criticism, help and advice throughout the course of study.

Gratitude is also due to **Dr. Farouk M. Mostafa**, Lecturer of Pomology for his participation in supervising this work, most helpful suggestions and invaluable advises.

I must also acknowledge the great encouragement and generous help given to me by **Prof. Dr. Hamdy M. Mahmoud** and **Prof. Dr. Kamelia I. Ahmed-Amen**.

The author would like to thank the staff members of Molecular genetics and genome mapping lab, The Agric. Genetic Engineering Research Institute (AGERI), ARC for performing the DNA extraction and RAPD analysis. Great appreciation is also given to Prof. Dr. A.A. Abou Zeid and Prof. Dr. Maisa A. Awad, Virus Research Section, Plant Pathology Institute, Arc for their technical help for viral detection study.

I am most grateful to all the staff members **Dr. Ahmed Mokhless El-Sese**, **Dr. Abd El-Fatah El-Salehy**, **Dr. Talaat El-Mahady**, Associate Professors and **Dr. Hassan A. Abdel Galil**, **Dr. Raafat A. Ali** and **Dr. Aiman K. A. Mohamed** Lecturer of Pomology and colleagues of Horticulture Department, Assiut University for their continuous help and cooperation.

I wish to express my gratitude and sincere thanks to my family, wife and sons for giving me love, continuous moral support and inspiration, I needed to accomplish successfully this work.

Finally, responsibility for any errors which may have crept into this thesis must remain mine, however.

## LIST OF TABLES

Table No.	Title	Page
A	Number and description of the selected seedling trees.....	41
B	Symbols of fruit texture grades.....	42
1	Fruit number per tree and yield per tree (kg) in some citrus selections at 1995, 1996 and 1997 seasons.....	52
2	Fruit weight, volume, dimensions and index in some citrus selections as the average of three seasons (1995-1997).....	61
3	Fruit weight, volume, dimensions and index in some citrus selections at 1995 season.....	62
4	Fruit weight, volume, dimensions and index in some citrus selections at 1996 season.....	63
5	Fruit weight, volume, dimensions and index in some citrus selections at 1997 season.....	64
6	Rind weight and juice characters, number of seeds and dregs weight in some citrus selections as the average of three seasons (1995-1997).....	77
7	Rind weight and juice characters, number of seeds and dregs weight in some citrus selections at 1995 season.....	78
8	Rind weight and juice characters, number of seeds and dregs weight in some citrus selections at 1996 season.....	79
9	Rind weight and juice characters, number of seeds and dregs weight in some citrus selections at 1997 season.....	80
10	Chemical characters of fruits in some citrus selections as the average of three seasons (1995-1997).....	95
11	Chemical characters of fruits in some citrus selections at 1995 season.....	96
12	Chemical characters of fruits in some citrus selections at 1996 season.....	97
13	Chemical characters of fruits in some citrus selections at 1997 season.....	98
14	Average number of embryos per seed in some citrus selections during 1995, 1996 and 1997 seasons.....	112
15	<i>In vitro</i> germination of embryos in some citrus selections during 1995, 1996 and 1997 seasons.....	115
16	In vitro proliferation of explant in some citrus selections as the average of three seasons.....	116
