

Spatial variation in vegetation structure of some wadis in Saint Katherine protectorate, South Sinai, Egypt.

Presented By
Ahmed Abd Allah Mohamed Mohamed

B. Sc. (2006), Plant Ecology

**Environmental Researcher – South Sinai Protectorates
Egyptian Environmental Affairs Agency (EEAA)**

**Thesis Submitted in partial fulfillment for the Master Degree of
Science in Botany (Plant Ecology)**

**Botany and Microbiology Department, Faculty of Science,
Al-Azhar University Cairo, Egypt**

2013

Supervisors

Dr. Om - Mohammed Ahmed Khafagi

Emeritus Professor of Ecology,
Botany Department,
Faculty of Science (Girls branch),
Al-Azhar University, Cairo, Egypt.

Dr. El-Blaly El-Sayed Ahmed Hatab

Nature Conservation Sector (NCS),
Egyptian Environmental Affairs
Agency (EEAA).

Dr. Abd El-Monem M. A. Sharaf

Professor of Plant Physiology,
Botany Department, Faculty of Science,
Al-Azhar University, Cairo, Egypt.

Dr. Mahmoud Ramadan Soffy

Lecturer of Plant Physiology,
Botany Department, Faculty of Science,
Al-Azhar University, Cairo, Egypt.

Supervisors Committee

Dr. Om - Mohammed Ahmed Khafagi

Emeritus Professor of Ecology, Botany and Microbiology Department, Faculty of Science (Girl's branch), Al-Azhar University, Cairo, Egypt.

Dr. Abd El-Monem M. A. Sharaf

Professor of Plant Physiology, Botany and Microbiology Department, Faculty of Science, Al-Azhar University, Cairo, Egypt.

Dr. El-Bialy El-Sayed Ahmed Hatab

Nature Conservation Sector (NCS),
Egyptian Environmental Affairs Agency (EEAA).

Dr. Mahmoud Ramadan Soffy

Lecturer of Plant Physiology, Botany and microbiology Department, Faculty of Science, Al-Azhar University, Cairo, Egypt.

Declaration

**This thesis has not been
submitted for a degree at this
University or any other
University**

Ahmed Abd Allah Mohamed

Approval Sheet

Thesis Title:

Spatial variation in vegetation structure of some wadis in Saint Katherine protectorate, South Sinai, Egypt.

NAME OF STUDENT:

Ahmed Abd Allah Mohamed Mohamed

DEGREE:

Master of Science in (Ecology)

This thesis has been supervised by:

Prof. Dr. Abd El-Monem M. A. Sharaf

Prof. Dr. Om - Mohammed Ahmed Khafagi

Dr. El-Bialy El-Sayed Ahmed Hatab

Dr. Mahmoud Ramadan Soffy

Examination Committee:

Prof. Dr. Abd El-Monem M. A. Sharaf
Professor of Plant Physiology, Botany Department,
Faculty of Science, Al-Azhar University, Cairo, Egypt

Prof. Dr. Om - Mohammed Ahmed Khafagi
Emeritus Professor of Ecology, Botany Department,
Faculty of Science (Girls branch), Al-Azhar University.

Prof. Dr. Emad Al-din Abbas Ewais
Professor of Plant Physiology, Botany Department,
Faculty of Science, Al-Azhar University, Cairo, Egypt.

Prof. Dr. Moustafa Sabry El-Hakim
Professor of Ecology and Agro-frosty of Arid Land,
Desert Research Center.

Acknowledgements

Initially, and foremost, I am gratefully indebted to ALLAH by grace for completion of this work.

I would like to extend my thanks to all those who contributed time, suggestions and support during the planning, research and writing of this dissertation. I am personally indebted to:

First, I offer my sincerest gratitude to my supervisor, Prof. Dr. **Om Mohamed Khafagi** Professor of Ecology, Faculty of Science (Girls branch), Al-Azhar University, for the valuable discussions on a wide range of conservational topics and ongoing support; guidance and advice were absolutely invaluable and for active supervision and guidance and creative criticism and continuous encouragement whilst allowing me to work in my own way. One simply could not wish for a better or friendlier supervisor. So I cannot express enough thanks.

Very special thanks are due to Prof. Dr. **Abd El-Monem M. A. Sharaf** Professor of Plant Physiology, Faculty of Science, Al-Azhar University for active supervision, valuable advice, help in presenting the thesis and in discussion on the results and continuous encouragement and lending me his time and expertise in content analysis and critical theory. Without whose knowledge and assistance this study would not have been successful.

Dr. **El-Bialy Hatab**, General Manager of Technical Office at NCS of Egypt for his grateful work on me to build a new person with open mind and for his support for the field, and the time he gave to show me the basics of plant conservation. My senior, my brother and my friend I never meet a person like him. Supporting and encouraging me without waiting for any replay just to be as him.

Special thanks also to Dr. **Mohmoud Ramadan Soffy** Lecture of Plant Physiology, Faculty of Science, Al-Azhar University, for grateful advices within this study and for giving me the chance to express my hard work without any stress and constant encouragement throughout this thesis.

I take this opportunity to express my profound gratitude and deep regards to Prof. Dr. **Emad Al-din Abbas Ewais** The former Head of Botany and Microbiology Department, Faculty of Science, Al-Azhar University for his flexibility and Routine breaks and for his great trust and sufficient support.

I really appreciate the great effort by my friend and my real brother **Dr. Karim Omar**, Environmental researcher / GIS specialist at Nature Conservation Sector (NCS), Egyptian Environmental Affairs Agency (EEAA) for his continuous support, advices, encourage, applying new technics and watching me moment by moment during this research.

Deep thanks are due to my former colleague Mr. **Mohamed Metwaly** and to my current colleague Mr. **Hatem Shabana** for their support in fieldwork and laboratory analysis.

Special thanks are due to Prof. Dr. **Mohamed Salem**; General Manger of South Sinai Protectorates for his fruitful advices and his support.

I would like to express my deepest grateful to my friends and other family in the south Sinai protectorates, Mr. **Gamal El-Gohary**, Mr. **Alaa Ismail**, Mr. **Abd allah Nagi**, Mr. **Ahmed El Sadeq**, Mr. **Ahmed Salem**, Mr. **Mohamed Ali**, **Helmy Abd El Sabour**, **Gamal Osman** and **Soilam Gomaa**.

I wish to express my deepest gratitude to Eng. **Mohamed Kotb**, General Manger of Saint Katherine protectorate and Eng. **Bakr Mohamed** General Manger

of Taba protectorate for their support, and I am grateful for their cooperation during the period of my assignment.

I would like to give my appreciation to my lovely family Mr. **Abd El-Aaty Abdallah**, Miss. **Asmaa Fathy**, Mr. **Ashraf Abd El Sattar** and **Mr., Said Fathy** for their support without waiting for anything just to help me to take my rights.

Special thanks are due to staff members and all my colleagues in Botany and Microbiology Department, Faculty of Science, Al-Azhar University, especially to Mr. **Abd El Ghany Sobhy**, And Mr. **Mahmoud Saqr** for their support.

Ahmed Abd Allah Mohamed

DEDICATION

I would like to dedicate the work on this dissertation to my father and my mother who were with me every step on the way, And to my future wife who gives her sincerity and her pure support at hard situations and to my Sisters and Brothers and to all of my family.

Ahmed Abd Allah Mohamed

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

{ سُبْحَانَ الَّذِي خَلَقَ الْأَزْوَاجَ كُلَّهَا مِمَّا تُنْبِتُ الْأَرْضُ وَمِنْ أَنْفُسِهِمْ
وَمِمَّا لَا يَعْلَمُونَ }

حَسْبُكَ اللَّهُ الْعَظِيمُ

(سورة يس - آية ٣٦)

➤ Abstract	1
➤ Introduction	3
➤ Aim of Study	9
➤ Review of Literature	11
- Species distribution and spatial concept	11
- Spatial heterogeneity importance and effect	13
- Scale and conservation efforts	17
- Climate and plant distribution	19
- Spatial variation and Vegetation structure	20
- Spatial variation and Soil properties	22
- Threat factors	23
- Topography and Species diversity	27
- Eco- physiology and biochemical responses	39
➤ Study area	38
- Geology of study area	41
- Hydrology of study area	43
- Climate of study area	45
- Location description	47
➤ <u>MATERIAL AND METHODS</u>	
Part I : (Phytosociological & Ecological studies)	
1. Vegetation analysis	52
2. Soil Analysis	56
3. Threats Analysis	59

Part II: (Spatial Analysis)

1.Geographical attributes analysis	61
2.Climatic variables analysis	63

Part III: (Physiological studies - Plant chemical analysis)

1.Study area	66
2. Plant materials	67
3.Plant species that have been chemically analyzed	68
4.Measurements of metabolites	71

➤ RESULTS AND DISCUSSION**Part I : (Phytosociological & Ecological studies)**

1. Vegetation Analysis	77
2. Soil Analysis	133
3. Threat Analysis	140

Part II: (Spatial Analysis)

1.Geographical attributes analysis	145
2.Climatic variables analysis	161
3.Conoco analysis	164
4.General Discussion	170

Part III: (Physiological studies - Plant chemical analysis)

1. Plant chemical analysis within location	178
2. Plant chemical analysis within species	218
3. General Discussion	251
