**Biochemical Screening of Hepatitis B Virus in
Pregnant Women and Vertical Transmission
from Carrier Mothers to Their Babies**

Thesis

**Submitted in partial fulfillment of the requirement for
Master Degree in Biochemistry**

By

Ataf Abd El-Ghany Kolb Abo El-Khier
M.B. B.Ch.

Supervisors

Prof. Dr.

Mohamed Mohamed Abdel-Fateh *M. M. Abdel Fattah*
**Department of Biochemistry
Faculty of Science
Ain Shams University**

Prof. Dr.

Tahani Mahmoud Maharim
**Department of Biochemistry
Faculty of Science
Ain Shams University**

Dr.

Mohamed Ahmed Abd-El-Azim
**Consultant of Obstetrics & Gynecology
El-Sabet Teaching Hospital**

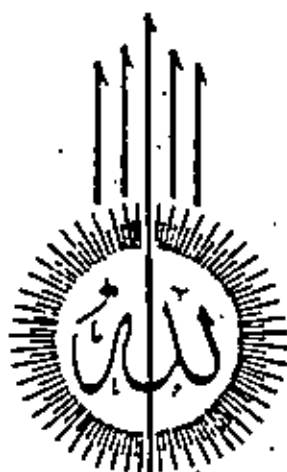

Tahany M. Maharim

M.A.A.

**Faculty of Science
Ain Shams University
1995**

ABBREVIATIONS

5 - NT	5 - nucleotidase
AIDS	Antigen immuno defficiency disease
ALP	Alkaline phosphatase
ALT	Alanine aminotransferase.
Anti HBc	Antibody to hepatitis core Antigen.
Anti HBe	Antibody to hepatitis e Antigen
Anti HBs	Antibody to hepatitis surface Antigen
Anti-H C	Antibody to hepatitis C virus
Anti-HA	Antibody to hepatitis A virus
Anti-HD	Antibody to hepatitis D virus
AST	Aspartate aminotransferase.
ELISA	Enzyme linked immuno sorbent assay
γ- GT	Gamma-glutamyl transferase
H A V	Hepatitis A virus
H B V	Hepatitis B virus.
H C V	Hepatitis C virus.
H D V	Hepatitis D virus.
H E V	Hepatitis E virus.
HBcAg	Hepatitis B core Antigen
HBeAg	Hepatitis B e Antigen

HBIG	Hepatitis B immunoglobulin
HBsAg	Hepatitis B surface Antigen
HIV	Immuno deficiency virus
HRP	horseradish peroxidase
OPD	O-phenylenediamine dihydrochloride
P C R	Polymerase chain reaction
W H O	World Health Organization

LIST OF TABLES

	<i>Page</i>
Table [1]: Age distribution of studied cases	66
Table [2]: Parity among studied cases	67
Table [3]: Occupation percentage of the mothers	68
Table [4]: The prevalence of HBV marker (HBsAg) in 500 pregnant women	69
Table [5]: The relation between absorbance level of the HBsAg test and the positivity of mother	70
Table [6]: The prevalence of HBsAg in 500 pregnant women according to age	72
Table [7]: The prevalence of HBsAg in 500 pregnant women according to parity	73
Table [8]: The prevalence of HBsAg in 500 pregnant women according to employment status	74
Table [9]: Relation between HBsAg positivity in the studied cases with the history of previous surgical operations ..	75
Table [10]: Relation between HBsAg positive and the history of previous blood transfusion in studied cases	76

LIST OF TABLES (CONT.)

	<i>Page</i>
Table [11]: The percentage of HBeAg positive cases through 33 HBsAg positive mothers	77
Table [12]: The results of HBeAg absorbance level of the tested 33 HBsAg positive mothers	78
Table [13]: The percentage of HBsAg positive babies from 33 studied HBsAg positive mothers	81
Table [14]: The relation between absorbance level of HBsAg tests of mothers and HBsAg positivity of their infants	82
Table [15]: The relation between HBeAg positivity of mothers and HBsAg positive babies	83
Table [16]: The relation between the age of mothers, HBsAg positivity of them and HBsAg positivity of their infants	84
Table [17]: The relation between parity of the mothers, HBsAg positivity of them and HBsAg positivity of their babies	85
Table [18]: The liver function tests of HBsAg positive mothers having 20- < 25 years old	87
