**Studies on Some Physicochemical, Surface and
Catalytic Properties of CuO Supported on Different
Carriers under varying Conditions**

A Thesis
Presented By

Ayman Abd El-Moemen Mohamed

B. SC. Chemistry

In Partial Fulfillment of the Requirements for the
Degree of Master of Science in Chemistry

Department of Chemistry
Faculty of Science
Suez Canal University

B.A.N

2003

Suez Canal University
Faculty of Science

Approval Sheet

Degree: The Master of Science in Chemistry

Title: Studies on Some Physicochemical , Surface and Catalytic Properties
of CuO Supported on Different Carriers under Varying Conditions

Candidate: Ayman Abd El-Moemen Mohamed Mostafa

Thesis Referees

Prof. Dr. Mohamed Mohamed Abd El-Moneim Selim

Professor of Physical Chemistry, National Research Centre , Cairo .

Prof.Dr. Nadia Abd El-Hakim Youssef

Professor of Physical Chemistry, Faculty of Girls, Ain Shams University, Cairo .

Prof. Dr . Gamil Aly Aly El-Shobaky

Professor of Physical Chemistry, National Research Centre , Cairo .

Dr. Farouk Mohamed Ahmed Radwan

Assoc. Prof. of Physical Chemistry, Faculty of Science, Suez Canal University, Ismaillia

Suez Canal University
Faculty of Science

Approval Sheet

Degree: The Master of Science in Chemistry

Title: Studies on Some Physicochemical, Surface and Catalytic Properties
of CuO Supported on Different Carrier under varying Conditions

Candidate: Ayman Abd El-Moemen Mohamed

Advisory Board

Prof. Dr. Gamil A. El-Shobaky

G. A. El-Shobaky

Professor of Physical Chemistry, National Research Center, Cairo

Dr. Farouk M. Radwan

F. M. Radwan

Assoc. Prof. of Physical Chemistry, Faculty of Science, Suez Canal University, Ismailia

Dr. Abd El-Mohsen M. Turkey

A. M. Turkey

Lecturer of Physical Chemistry, Faculty of Science, Suez Canal University, Ismailia

ACKNOWLEDGEMENT

Thanks are always due to God.

I would like to express my deep gratitude and sincere appreciation to Professor Dr. Gamil A.EL- Shobaky , Professor of Physical Chemistry, National Research Center, Cairo; for suggesting, supervision, continuous guidance and for facilitation the accomplishment of this work.

I would like to offer my indebtedness and gratitude to Dr. Farouk Radwan, Associate Professor of Physical Chemistry, Faculty of Science, Suez Canal University, for his supervision, valuable discussions, keen interest throughout the present work as well as critical reading and revising of the manuscript

I would like to express my thanks to Dr. Abd El-Mohsen Turkey, Lecturer of Physical Chemistry, Department of Chemistry, Faculty of Science, Suez Canal University for supervising and facilitation the accomplishment of this work.

I am grateful to all the staff members of the Department of Chemistry, Faculty of Science, Suez Canal University, as well as my colleagues, particularly Mr. Hassan Mohamed Ahmed for their kind support.

Deeps thanks are also addressed to the staff members of the Laboratory of Surface Chemistry and Catalysis, National Research Center, Cairo, specially Dr. Mohamed Mokhtar, Lecturer of Physical Chemistry, for the cooperation and technical assistance in CO oxidation measurements.

Ayman Abd El - Moemen

Contents

1- List of Figures.....	i
2- List of Tables.....	vii
3- Chapter I : Introduction.....	1
4- Chapter II : Literature Survey.....	7
5- Aim and Plan of the work	20
6- Chapter III : Materials and Experimental Techniques	21
<i>III. Materials</i>	21
<i>III.1.1-Preparation of Catalyst systems</i>	21
III.1.1.1–preparation of the systems of copper oxide loaded on γ -Al ₂ O ₃	21
III.1.1.2– preparation of the systems 0.2CuO/ZrO ₂ and 0.2CuO/CeO ₂	21
III.1.1.3 – Preparation of the variously doped 0.2CuO/Al ₂ O ₃ systems	22
III.1.1.4 Preparation of different γ -irradiated 0.2CuO/Al ₂ O ₃	23
<i>III.1.2- Preparation of the Employed Hydrogen Peroxide</i>	23
<i>III. 1.3- Preparation of the Employed Gases CO and O₂</i>	23
<i>III. 2-Experimental Techniques</i>	24
2.1- Apparatus for Measuring H ₂ O ₂ Decomposition	24
2.2- Apparatus for Measuring the CO-Oxidation by O ₂	26
2.3- X-Ray Diffraction (XRD)	26
2.4- IR Transmission Spectrum	26
2.5- Apparatus for Measuring Specific Surface Area	28
2.6- Thermal Analysis	28
6- Chapter IV: Physicochemical Characterization of the Prepared Systems	
Introduction	30
<i>IV. 1-Thermal Analysis</i>	30

<i>IV.2. Fourier Transform Infrared spectroscopic investigation of the prepared systems</i>	39
<i>IV.3- XRD Investigation of the prepared systems</i>	53
<i>IV.4- Assessment of Surface Areas of the Prepared Systems</i>	86
7- Chapter V: Catalytic Properties of the Prepared Systems	
<i>V.1. Catalytic decomposition of H_2O_2 over the systems 0.2CuO/Al_2O_3, 0.2CuO/ZrO_2 and 0.2CuO/CeO_2.....</i>	95
<i>V.1.1. Testing of Catalytic Activity of Unsupported CuO and the Employed Support Materials Al_2O_3, ZrO_2 and CeO_2.....</i>	95
<i>V.1.2. Effect of Copper Oxide Content on the Catalytic Activity of the System $xCuO / Al_2O_3$ towards Liquid Phase H_2O_2 Decomposition.....</i>	96
<i>V.1.3. Effect of Precalcination Temperature of Alumina Support on the Catalytic Activity towards H_2O_2 Decomposition of 0.2 CuO/Al_2O_3 System Calcined at 500°C</i>	99
<i>V.1.4. Effect of Calcination Temperature on the Catalytic Activity of the System 0.2CuO/Al_2O_3</i>	102
<i>V.1.5. Testing of Initial Order of the Catalytic Decomposition of H_2O_2 over the System 0.2CuO/Al_2O_3 Calcined at 500°C.....</i>	104
<i>V.1.6. Determination of Apparent activation Energy E_a for the Catalytic H_2O_2 Decomposition over the System 0.2CuO/Al_2O_3 Calcined at 500°C</i>	107
<i>V.1.7. Catalytic Activity of the Systems 0.2CuO/ZrO_2 and 0.2CuO/CeO_2 towards H_2O_2 Decomposition</i>	108
<i>V.2. Effect of the Nature of the Catalyst Support on the Catalytic Activity of CuO towards H_2O_2 Decomposition and CO -oxidation</i>	112
<i>V.2.1. Comparison between the Catalytic Activity of the Systems 0.2CuO/Al_2O_3, 0.2CuO/ZrO_2 and 0.2CuO/CeO_2 towards H_2O_2 Decomposition</i>	112
