Immunopathological Study Of Expressions P53 And PCNA In Oral Premalignant Lesions.

*Thesis
Submitted to the Faculty of Dentistry
Alexandria University
in Partial Fulfillment of the Requirements
for the master degree in*

ORAL PATHOLOGY

By
Amani Nour El Din Abd Ellatif

(M.B.B.Ch., Alexandria)

**Faculty of Dentistry
Alexandria University**

1999

Supervisors

Prof. Dr. Maged H. El Abany

*Professor of oral Pathology
Faculty of Dentistry
Alexandria University*

Dr. Mohamed M. Fata

*Assistant Professor of Maxillofacial
Faculty of Medicine
Alexandria University*

Dr. Manal I. El-Nouaem

*Lecturer of oral Pathology
Faculty of Dentistry
Alexandria University*

Dr. Layla K. Younnis

*Assistant Professor of Pathology
Faculty of Medicine
Alexandria University*

Acknowledgement

I would like to express my profound gratitude to Prof. Dr. Maged El Abany, professor of oral pathology, Faculty of Dentistry, Alexandria University for his helpful guidance during the entire period of the study.

I am greatly indebted to DR. Mohamed M. Fata professor of Maxillofacial, Faculty of Medicine, Alexandria University for his great and continuous help.

I am grateful to Dr. Manal El Nouaem , lecturer of oral pathology, Faculty of Dentistry, Alexandria University for her constant advice and kind supervision during the course of the study.

My sincerest and deepest gratitude to Dr. Layla Younis, Assistant professor of general pathology, Faculty of Medicine, Alexandria University for her constant concern and her great help in my immunologic work.

Special thanks to Prof. Dr. Sanaa Abou El Azm, Professor and head of oral pathology . Faculty of Dentistry, Alexandria University for her continuous encouragment for which I shall remain grateful.

I am deeply grateful to Dr. Evelyn Honan, Professor and former head of oral pathology department, Faculty of Dentistry, Alexandria University for her willing help.

I feel particularly indebted to Dr. Amna Gihad, for her willing help and kindness.

My deepest gratitude to alexandria center of dental research for supplying me with the material of my work.

Special thanks to Dr. Sawsan El Tabach and my very deepest gratitude to Dr. Magdy Aboul El Abass for their continuous encouragement during the course of the study.

I am grateful to my mother ,my husband and all my family for their support and encouragement.

Lastly, my thanks to all the staff members of the oral pathology department, Faculty of Dentistry, Alexandria University, my colleagues, all the technicians and all those who helped in making this work possible.

Dedication

*I dedicate this research to my
sons Omar El Zayat &
Sherif El Zayat hoping that
they will achieve all the best
in their life and to the soul of
my father Dr. Nour El Din
Abdel Latif.*

List of Tables

Table No.		Page
1	Distribution of sample by type of lesion.	26
2	Distribution of sample by type of lesion and severity.	32
3	Distribution of the sample according to anatomical location.	33
4	Distribution of sample by type of lesion and p53 immunostaining.	35
5	Distribution of sample by type of lesion using PCNA immunostaining.	42
6	Oneway ANOVA for Mean PCNA by type of lesion.	43
7	Distribution of sample by PCNA and P53 immunostaining.	55
8	Correlation between PCNA and P53.	56
9	Correlation of PCNA and P53 with severity.	57

List of Figures

Fig. No.		Page
1	Cell cycle phases.	13
2	Schematic diagram of p53 gene structure.	16
3	Schematic diagram of p53 protein.	17
4	A model for the function of p53.	19
5	Distribution of sample by type of lesion	27
6	A case of leukoplakia with moderate dysplasia showing basilar hyperplasia, loss of polarity of basal cells, hyperchromatism of the nucleus.	28
7	Another case of leukoplakia with moderate dysplasia showing basilar hyperplasia, loss of polarity, individual cell keratosis.	28
8	A case of verrucous leukoplakia using H&E stain showing keratin plug.	29
9	A case of squamous cell papilloma using H&E stain.	29
10	Distribution of sample by severity	30
11	Clinical picture showing a case of verrucous leukoplakia in cheek mucosa.	36
12	Clinical picture showing leukoplakia in cheek mucosa.	36
13	A case of erosive lichen planus using H&E stain.	37

List of Figures con.

Fig. No.		Page
14	The previous case using P53 antibody showing the severe reaction of P53 antibody in the epithelium.	37
15	Another field of the previous case	38
16	A case of leukoplakia with dysplasia showing focal reaction of p53 antibody.	38
17	Another view of the same case using oil immersion showing intranuclear reaction of p53 antibody.	39
18	A case of carcinoma in situ showing p53 reaction in the basal and parabasal layers.	39
19	Another field of the previous case showing focal reaction of p53 antibody.	40
20	Another view of the previous case using oil immersion.	40
21	A case of atrophic lichen planus showing PCNA reaction especially the basal and parabasal layers.	45
22	Another view of the previous case using higher magnification.	45
23	The previous case of atrophic lichen planus using oil immersion showing the intranuclear reaction of PCNA antibody.	46

List of Figures con.

Fig. No.		Page
24	A case of erosive lichen planus showing nuclear PCNA reaction.	46
25	Another field of the previous case	47
26	Another view using oil immersion	47
27	A case of erosive lichen planus using using PCNA antibody showing PCNA reaction in the cells of surface epithelium and in the connective tissue cells.	48
28	Another field of the previous case	48
29	A case of leukoplakia with severe dysplasia showing PCNA reaction in its cells.	49
30	The previous case using oil immersion.	49
31	A case of leukoplakia with moderate dysplasia showing PCNA reaction in the surface epithelium.	50
32	Another view of the previous case using oil immersion to show intra nuclear reaction of the p53 antibody.	50
33	A case of leukoplakia with moderate dysplasia showing PCNA reaction in the surface epithelium.	51
34	Another view of the previous case showing PCNA reaction in the connective tissue cells.	51
