

Faculty of Science
Chemistry Department

Synthesis of gold nanoparticles capped with constituents of some medicinal plants and its biological activity

A Thesis

"Submitted for the degree of Master of Science as a partial
fulfilment for requirements of the master of Science"

By

Mariam Osama Abd-Allah Hamed

(B.Sc. Biochemistry/Chemistry, 2008)

Supervisors

Prof. Dr. Mostafa M. H. Khalil

*Professor of Chemistry
Chemistry Department,
Faculty of Science,
Ain Shams University*

Prof. Dr. Ibrahim I. Mahmoud

*Professor of Pharmacognosy
Pharmacognosy Department,
Faculty of Pharmacy,
Helwan University*

2015

Faculty of Science
Chemistry Department

Synthesis of gold nanoparticles capped with constituents of some medicinal plants and its biological activity

Thesis submitted by

Mariam Osama Abd-Allah Hamed

For the degree of M.Sc of science in
Inorganic chemistry

To

Department of Chemistry
Faculty of Science
Ain Shams University

2015

Faculty of Science
Chemistry Department

Approval sheet

Name of candidate: **Mariam Osama Abd-Allah Hamed**

Degree: M.Sc. Degree in Chemistry

**Thesis Title: Synthesis of gold nanoparticles capped
with constituents of some medicinal
plants and its biological activity**

This Thesis has **been approved by:**

1-Prof. Dr. Mostafa M. H. Khalil

2-Prof. Dr. Ibrahim I. Mahmoud

Approval

Chairman of Chemistry Department

Prof. Dr. Hamed Ahmed Younis Derbala

2015

Statement

This thesis is submitted in partial fulfillment of the M.Sc Degree,
Faculty of Science, Ain Shams University

In addition to the work carried out in this thesis the candidate,
Mariam Osama Abd Allah Hamed, has attended postgraduate studies in
the following topics and passed successfully in the final examination in
the academic year 2009-2010:

621	Coordination Chemistry
622	Radiochemistry and Separation Techniques
623	Electrochemistry and Electrochemical Analysis
624	Group Theory and Computer Programming
625	Spectroscopic Methods for Structural and Analytical Chemistry
---	TOEFL

Prof. Dr. Hamed A. Younis Madian

Chairman of Chemistry Department
Faculty of Science-Ain Shams University

Dedication

To my parents Mr. and Mrs. Osama A. Hamed

The reason for what I am today.
Thanks for your continuous endless
love, support and care. Thanks because
you never stopped believing in me.

To my wonderful husband, Ali and my
beautiful son, Fares

I am truly thankful for having you in
my life. Thanks for your love, patience,
wisdom and support during this work.

To my friend, Amal

Without your support I could not
complete this task. Your encouragement
have meant to me so much.

I also give special thanks to my brother and
sister, for their kind support and contribution to
the success of my studies.

Mariam Osama

Acknowledgement

First of all, I deeply grateful to Allah for giving me the wisdom, knowledge and strength to complete this work successfully.

*I would like to express my deepest gratitude to my supervisor, **Prof. Dr. Mostafa M. H. Khalil**, Professor of Inorganic and Analytical, Faculty of Science, Ain Shams University, for giving me the opportunity to work in this field and for giving me the chance to be one of his students. I learned from his insight a lot. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my master study. He did not only guide this work and find time to discuss with me but also gave me the confidence to express my ideas freely. His leadership, support, attention to detail, hard work have set an example I hope to match some day. Actually he was more than a supervisor, he was a teacher who inspired me and pushed me forward.*

*Many thanks to **Prof. Dr. Ibrahim I. Mahmoud**, Professor of Pharmacognosy, Faculty of Pharmacy, Helwan University, for his help, supervising and support in the thesis.*

I would also like to thank my Colleagues in the Chemistry Department, Faculty of Science, Ain Shams University for their help.

Abstract	x
Chapter I : Introduction	
1.1. What is Nanotechnology?	1
1.2. Classification of nanomaterials	3
1.3. Metallic nanoparticles	7
1.3.1. Properties of metallic nanoparticles	9
1.3.2. Origin of surface plasmon resonance in noble metal NPs	11
1.3.3. General synthetic routes of metallic nanoparticles	17
I. Physical methods	20
II. Chemical methods	21
III. biological methods	26
1.4. Biosynthesis of gold nanoparticles using plant extracts	27
1.4.1. mechanisms of AuNPs formation using plant extracts	33
1.5. Rhus coriaria L. (sumaq fruits) aqueous extract	43
1.6. Laurus nobilis L. (laurel leaves) aqueous extract	45
Aim of work	47
Chapter II: Materials and Methods	
2.1. Material	48
2.2. Analytical instruments	48
2.2.1. UV–visible spectral analysis	48

2.2.2. Transmission electron microscopy (TEM)	48
2.2.3. X-Ray Diffraction	49
2.2.4. Fourier transform infrared spectroscopy	49
2.2.5. Thermogravimetric analysis	49
2.2.6. Dynamic light scattering (DLS)	50
2.2.7. Antimicrobial activity assay	50
2.3. Sample preparation	52
2.3.1. Preparation of sumaq extract	52
2.3.2. Preparation of laurel extract	52
2.4. One-step synthesis of gold nanoparticles using extract	52
2.5. Study of different variables on AuNPs synthesis	53
2.5.1. Effect of sumaq extract concentrations	53
2.5.2. Effect of laurel extract concentrations	53
2.5.3. Effect of pH of sumaq extracts	54
2.5.4. Effect of pH of laurel extract	55
2.6. Samples preparation for antimicrobial assay	55
2.6.1. Using sumaq extract	55
2.6.2. Using laurel extract	56

Chapter III : Synthesis of gold nanoparticles using *Rhus Coriaria*

L. aqueous fruit extract

3.1. UV–visible spectral analysis	57
3.1.1. Effect of extract concentration	57
3.1.2. Effect of contact time	64
3.1.3. Effect of extract pH	65
3.2. Dynamic light scattering (DLS)	73
3.3. The x-ray diffraction study	74
3.4. Fourier transform infra-red spectroscopy (FTIR)	75

3.5. Thermal gravimetric analysis	78
3.6. Antimicrobial activity	79
Chapter IV : Synthesis of gold nanoparticles using <i>Laurus Nobilis</i>	
<i>L. aqueous leaf extract</i>	
4.1. UV–visible spectral analysis	83
3.1.4. Effect of extract concentration	83
3.1.5. Effect of contact time	90
3.1.6. Effect of extract pH	90
4.2. Dynamic light scattering (DLS)	97
4.3. The x-ray diffraction study	98
4.4. Fourier transform infra-red spectroscopy (FTIR)	99
4.5. Thermal gravimetric analysis (TGA)	102
4.6. Antimicrobial activity	102
Conclusion	108
