**IMPROVING PRODUCTIVITY OF BARKI GOATS  
AND THEIR CROSSES WITH DAMASCUS FROM  
MILK AND KIDS USING  
FATTY CALCIUM SALTS**

**A thesis**

*M. T. A. P.*

**Presented To The Graduate School  
Faculty of Agriculture (Saba Basha), Alexandria University  
In Partial Fulfillment of the Requirements for the Degree of**

**DOCTOR OF PHILOSOPHY OF AGRICULTURAL  
SCIENCES**

**In**

**Animal Production**

**By**

**El Saeed Ahmed Ahmed Hammad El Wakeel**

**2010**

# **IMPROVING PRODUCTIVITY OF BARKI GOATS AND THEIR CROSSES WITH DAMASCUS FROM MILK AND KIDS USING FATTY CALCIUM SALTS**

*Presented by*

**EL SAEED AHMED AHMED HAMMAD EL -WAKEEL**

For the degree of  
**Ph.D. OF AGRICULTURAL SCIENCE**  
In  
**Animal Production**

## **Examiner's Committee**

**Prof. Dr. Fayek Hossne Hussein Farrag**

Professor of Animal Husbandry,  
Faculty of Agriculture,  
Mansoura university

**Prof. Dr. Soliman Mohamed Zahran**

Professor of Animal Nutrition,  
Head of Animal and Fish Production Department,  
Faculty of Agriculture (Saba Basha),  
Alexandria University

**Prof. Dr. Mohamed Hassan Ahmed**

Professor of Animal Nutrition,  
Animal and Fish Production Department,  
Faculty of Agriculture (Saba Basha),  
Alexandria University

**Prof. Dr. Magdy Mohamed Abdelsalam**

Professor of Animal Husbandry,  
Faculty of Agriculture,  
Alexandria university

**Dr. Mohamed Eissa Mohamed**

Chief researcher of Sheep & Goat Husbandry,  
Animal Production Research Institute,  
Agriculture Research Center,  
Ministry of Agriculture

**Approved**

Mohamed Eissa

## ACKNOWLEDGEMENT

My great debt which is pleasure to be recorded here is to our almighty **God** who gives us every thing that we have through our life.

Gratitude and appreciation is expressed to **Prof. Dr. Mohammed Hassan Ahmed**, Professor of Animal Nutrition, Faculty of Agriculture (Saba Bacha), Alexandria University for his guidance, supervision and useful suggestions during writing this thesis.

My sincere thanks and gratitude **Prof. Dr. Magdy Mohammed AbdelSalam**, Professor of Animal Husbandry, Faculty of Agriculture, Alexandria University for his kind advice, helping to analysis thesis data and his helping for writing this thesis.

I wish to express my sincere appreciation to **Prof. Dr. Mohammed Eissa Mohammed**, Professor of Animal Husbandry, Department of Sheep and Goat Research, Animal Production Research Institute, Agriculture Research Center for his continuous interest, unlimited assistance and kind help in performing this thesis.

I am extremely thankful to the general manager of the animal production Research Station at Borg El-Arab **Prof. Dr. Gamal Mohammed Maharem**, Professor of Animal Breeding, Department of Sheep and Goat Research, Animal Production Research Institute, Agriculture Research Center.

I wish to express my deep gratitude to **Dr. Mohammed Anour Mohammed**, senior of Animal Physiology, Department of Sheep and Goat Research, Animal Production Research Institute, Agriculture Research Center for his kind help for learning some blood analysis and supporting me during experimental work.

My deepest thanks are due to my **beloved parent**, for their kind help, encouragement and interest. Lovely greetings are due to **my wife and to my beloved sons** for their endurance and patience throughout my engagement in this study.

	Page no.
<b>1. INTRODUCTION.....</b>	<b>1</b>
<b>2. REVIEW OF LITERATURE.....</b>	<b>3</b>
2.1. Fatty calcium salts (FCS).....	3
2.2. Feed intake .....	3
2.2.1. Effect of Genotype on feed intake.....	3
2.2.2. Effect of dietary fatty calcium salts (FCS) supplementation on feed intake.....	4
2.3. Nutrient digestibilities .....	5
2.3.1. Effect of Genotype on nutrient digestibilities .....	5
2.3.2. Effect of dietary fatty calcium salts supplementation on nutrient digestibilites.....	5
2.4. Milk yield .....	7
2.4.1. Effect of genotype on milk yield .....	7
2.4.2. Effect of dietary fatty calcium salts supplementation on milk yield .....	8
2.5. Milk composition .....	10
2.5.1. Effect of genotype on milk composition.....	10
2.5.2. Effect of dietary fatty calcium salts supplementation on milk composition. ....	10
2.6. Milk fatty acids composition .....	12
2.6.1. Effect of genotype on milk fatty acids composition .....	12
2.6.2. Effect of dietary fatty calcium salts supplementation on milk fatty acids composition .....	13
2.7. Somatic cell counts (SCC).....	14
2.7.1. Effect of genotype on somatic cell counts (SCC).....	14
2.7.2. Effect of fatty calcium salts supplementation on somatic cell counts (SCC) .....	14
2.8. Birth weight, weaning weight and daily gain of kids.....	15
2.8.1. Effect of genotype on birth weight, weaning weight and daily gain of kids .....	15
2.8.2. Effect of dietary fatty calcium salts (FCS) supplementation on birth weight, weaning weight and daily gain of kids: .....	16
2.9. Effect of genotype on body weight of does .....	17
2.10. Blood components.....	18
2.10.1. Effect of genotype on blood component:.....	18
2.10.2. Effect of dietary fatty calcium salts (FCS) supplementation on blood component.....	18
<b>3. MATERIAL AND METHODS .....</b>	<b>20</b>
3.1. Animal and management.....	20
3.2. Experimental design.....	20
