Surveillance cultures in neutropenic cancer patients

Thesis

Submitted for partial fulfillment
Of the master degree in Internal Medicine

2.05 up

By

Adel Gomaa Mohammed Gabre
M.B.B.CH.-Faculty of Medicine

Supervised by

Prof.Dr.Ahmed Mohammed Abd EL-Warith

Professor of Medical Oncology
National Cancer Institute-Cairo University

Prof.Dr.Noor El Deen Abd El-Azeem M. El Hefny

Professor of Internal Medicine
Faculty of Medicine-Assuit University

Dr.Ashraf Zeidan Abd Allah

Assistant professor of Clinical Oncology
South Egypt Cancer Insititute-Assuit University

Dr.Salwa Sayed Ahmed

Lecturer of Microbiology and Immunology
Faculty of Medicine-Assuit University

Acknowledgments

This work would never be crowned without the blessing of Allah to whom loyalty will remain forever.

It is with great pleasure that I take this opportunity to express my great indebtedness and supreme gratitude to prof. Dr Ahmed Mohammed Abd El Warith, prof. Dr. of Medical oncology, National Cancer Institute (NCI), Cairo University for this support throughout this work, instructions, wise advice, fruitful criticism and meticulous supervision.

Also I would like to express my thanks and deepest gratitude to prof. Dr. Noor Eldin Abd Elazeem Mohammed, prof. Dr. of Internal Medicine, Faculty of Medicine, Assuit University, for his kind supervisions, his precious remarks, constant encouragement and instructions at all steps of this work.

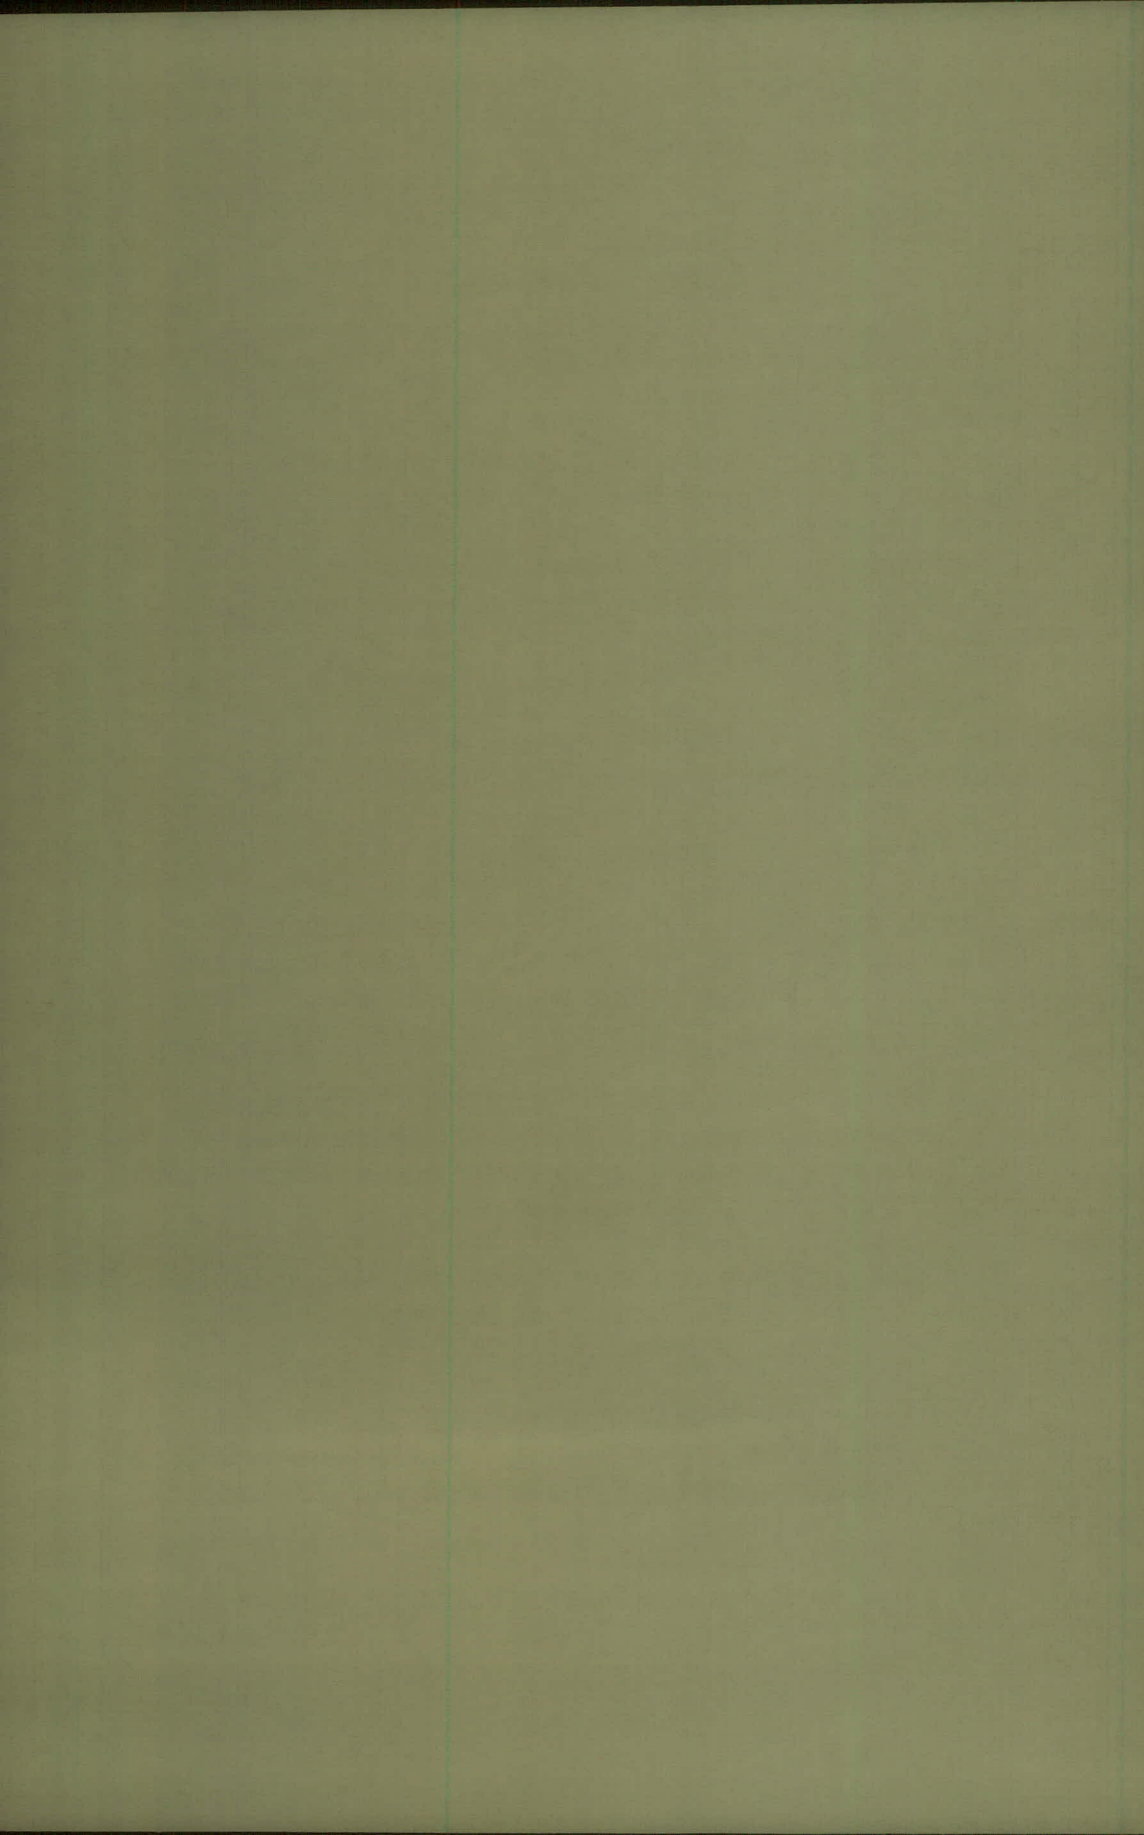

I am greatly indebted to Dr. Ashraf Zeidan Abd Alla, Assistant prof. of Clinical Oncology, South Egypt Cancer Institute, Assuit University, for his continues help, encouragement and for his continues help, cooperation and support during carrying out this work.

I am also grateful to Dr. Salwa Sayed Ahmed, lecturer of Microbiological and Immunology, Faculty of Medicine, Assuit University, for her continues help, encouragement and expert guidance to the laboratory part of this work.

I am also grateful to express my thanks and deepest gratitude to prof. Dr. Youseria A. El-Rahman, prof. Dr. of Internal Medicine for his help and continues support during carry this work .

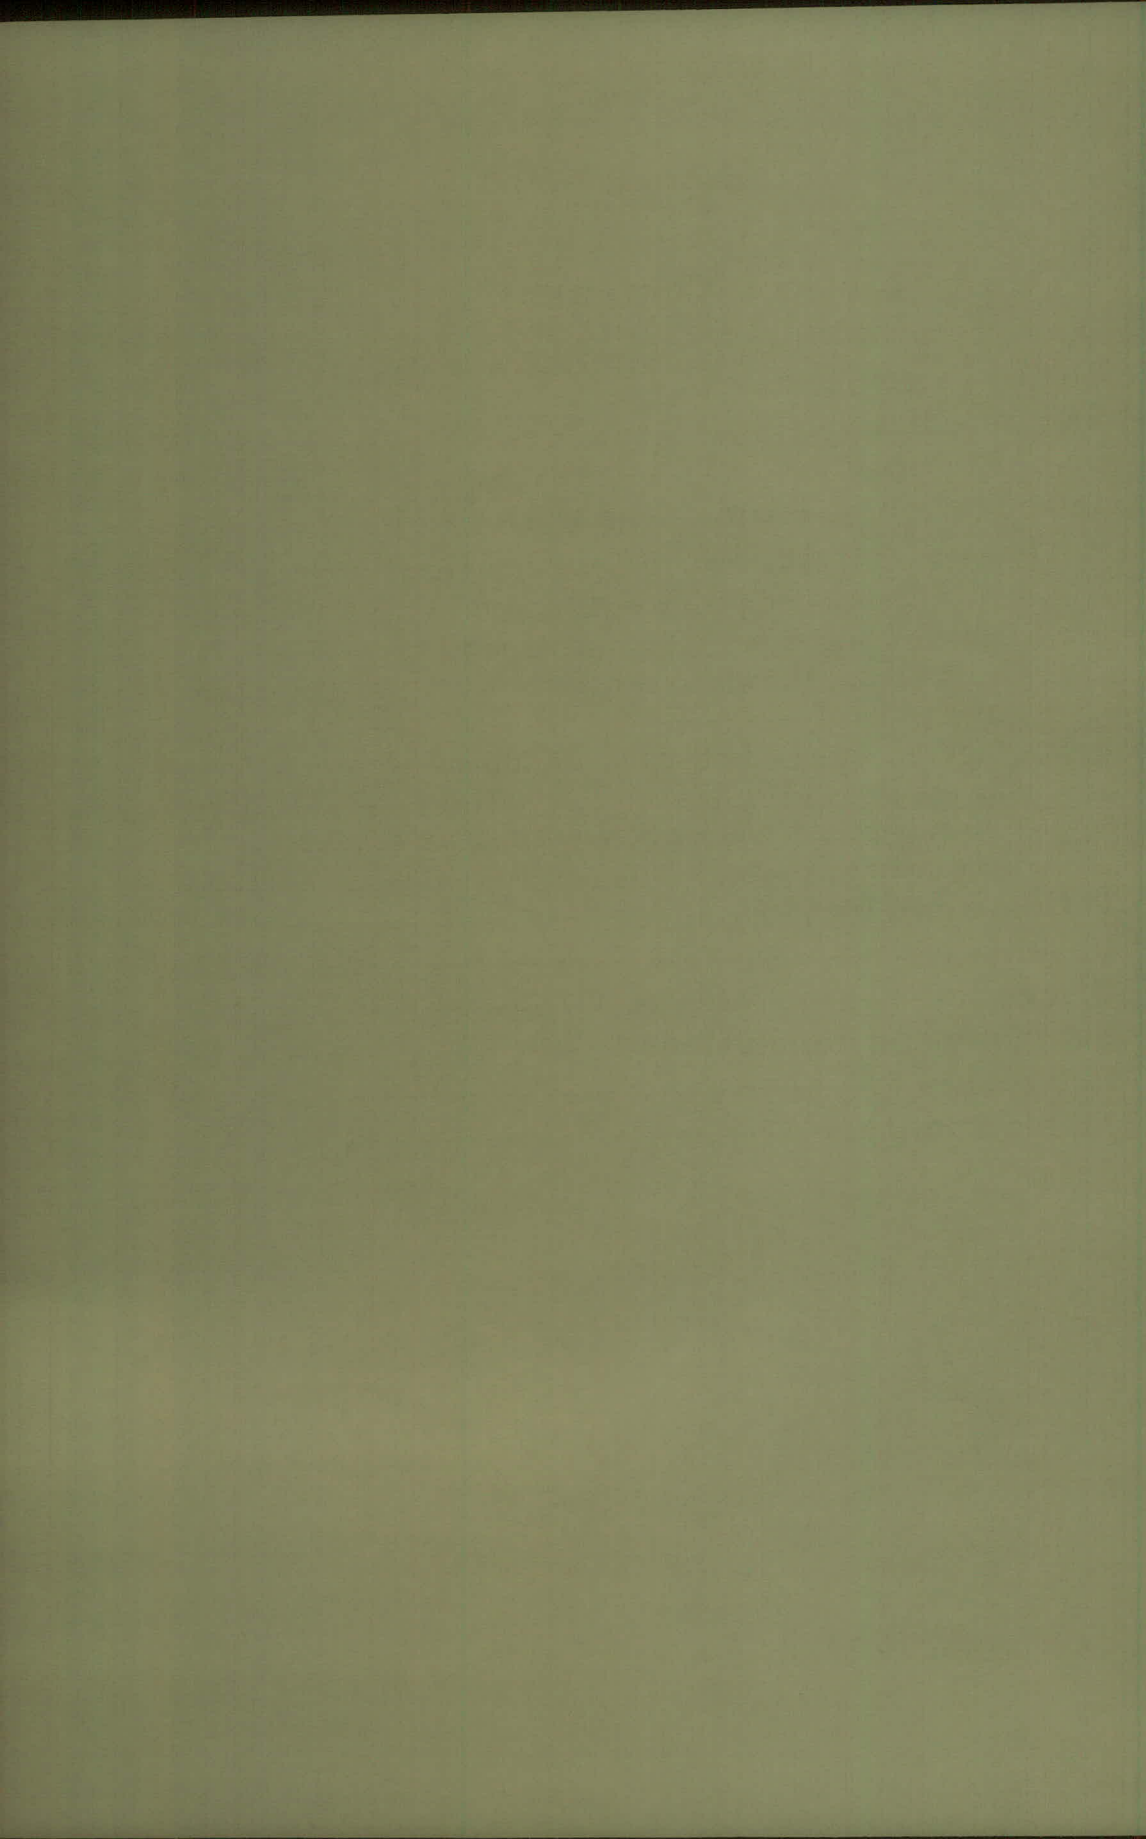

I am also grateful to Dr. Lobna Farag El-Tooney, Assistant prof. of Internal Medicine, Faculty of Medicine, Assuit University, for her cooperation, encouragement and wise advice during carrying out this work .

I am also grateful to all colleagues for their cooperation and encouragement. Many thanks to the patients who contributed to the study.

Contents

List of abbreviations	ii
List of tables	iii
List of figures	iv
Introduction and Aim of the work-----	1
Review of Literature-----	3
-Physiological and pathological aspect of neutrophils -	3
-Impaired host defenses of cancer patients-----	13
-Predominant Microbial pathogens in neutropenic cancer patients-----	33
-Management of infections in neutropenic cancer patients-----	80
-Clinical use of hemopoietic growth factor in neutropenic cancer patients -----	100
Patients and Methods-----	107
Results-----	114
Discussion-----	137
Summary and conclusions-----	146
References-----	149
Arabic Summary-----	

List of abbreviations

AAC	:Antibiotic associated colitis
ABLC	:Amphotericin B lipid complex
ADC	:Acute disseminated candidiasis
All	:Acute lymphoblastic leukaemia
AmB	:Amphotericin B
AML	: Acute myeloid leukaemia
ANC	:Absolute neutrophilic count
BM	:Bone marrow
BAL	:Bronchoalveolar lavage
BMT	:Bone marrow transplantations
C.	:Candidia
C.spp.	:Candidia species
CDC	:Chronic disseminated candidiasis
CL	:Clostridium
CLL	:Chronic lymphocytic leukaemia
CMV	:Cytomegalovirus
CNS	:Central nervous system
CRI	:Catheter related infections
CSA	:Cyclosporin A
CVC	:Central venous access
DFA	:Direct fluorescent antibody
E coli	:Escherichia coli
ECMO	:Extracorporeal membrane oxygen
5 FU	: 5 flucytosine
G-CSF	:Granulocytes-colony stimulating factors
GIT	:Gastrointestinal tract
GMCSF	:Granulocytes-macrophage -colony stimulating factors
GVHD	:Graft versus host disease
Gy	:Gray
H.influenza	:Haemophilus influenza
IDSA	:Infectious Disease of Society of America
IgA	:Immunoglobulin A
IgG	:Immunoglobulin G
IgM	:Immunoglobulin M
IL-1	:Interleukin -1
IL-2	:Interleukin -2
IVIG	:Intravenous immunoglobulin
K.pneumoniae	:Klebsiella pneumoniae
L	:Litre
MRSA	:Methicillin resistant staphylococcus aureus

MTB :Mycobacterium tuberculosis
NHL :Non Hodgkin's lymphoma
NCI :National Cancer Institute
P.aeruginosa :Pseudomonas aeruginosa
P.carinii :Pneumocystitis carinii
RSV :Respiratory syncytial virus
S.aureus :Staphylococcus aureus
S.epidermis :Staphylococcus aureus
S.pneumoniae :Streptococcus pneumoniae
Spp. : species
TNF :Tumour necrotic factors
VZV :Varicella zoster virus

List of tables

Table No.	Title	Page
Table(1)	Total leucocytic count and neutrophils counts at different age staging . -----	
	----- 6	
Table(2)	Host defense deficiency and infections associated with malignancy disease-----	19
Table (3)	Fungal infections associated with defects in host defense mechanism.-----	41
Table(4)	Viral infections associated with defects in host defense mechanism.-----	46
Table (5)	Patients characteristic associated with low and high risk febrile Neutropenia -----	77
Table (6):	Summary of Patients characteristics of study populations ---	93
Table (7):	The most common antibiotic used for treatment of infections in neutropenic cancer patients .-----	93
Table (8):	The distribution of Gram positive and Gram negative bacteria in 33 cases of haematological malignancy with neutropenia associated with bacteremia.-----	93
Table (9):	Distributions of Gram positive pathogens among 30 cases of haematological malignancy with neutropenia associated with bacteremia -	94
Table (10):	Distributions of Gram negative pathogens among 10 cases of haematological malignancy with neutropenia associated with bacteremia--	94
Table (11) :	Ditributions of Candidia species among 8 cases of hematological malignancy with neutropenia associated candidaemia.-----	94
Table (12):	Distributions of bacterial pathogens among 25 cases of hematological malignancy with neutropenia associated with bacterial documented infections in gastrointestinal tract.-----	94

Table (13): Distributions of candidial species among 12 cases of hematological malignancy with neutropenia associated with candidial documented infections in gastrointestinal tract.-----95

Table (14): Distributions of bacterial pathogens among 30 cases of hematological malignancy with neutropenia associated with bacterial documented infections in urinary tract.-----95

Table (15): Distributions of candidial species among 20 cases of hematological malignancy with neutropenia associated with candidial documented infections in urinary tract.-----95

Table (16) : Distributions of bacterial pathogens among 12 cases of hematological malignancy with neutropenia associated with bacterial documented infections in respiratory tract.-----95

Table (17): Distributions of candidial species among 6 cases of hematological malignancy with neutropenia associated with candidial documented infections in respiratory tract.-----96

Table (18): Distributions of microbiological documented infections in skin in 7 cases of hematological malignancy with neutropenia .-----96

Table (19): The distribution of Gram positive and Gram negative bacteria in 20 cases of lymphoma with neutropenia associated with bacteremia.---96

Table (20): Distributions of Gram positive pathogens among 18 cases of lymphoma with neutropenia associated with bacteremia -----96

Table (21): Distributions of Gram negative pathogens among 5 cases of lymphoma with neutropenia associated with bacteremia.--97

Table (22): Distributions of Candidia species among 8 cases of lymphoma with neutropenia associated candidaemia.-----97
