Cairo University
Faculty of Veterinary Medicine
Department of Internal Medicine and Infectious Diseases

Studies on Corynebacterium pseudotuberculosis Infection in buffaloes

A thesis

Presented by

Amal Mostafa Mohamed Radwan El-Sawah
B.V.Sc. (1990), Cairo University
M.V.Sc. (1995), Cairo University

For the degree of
Ph.D of veterinary science
(Infectious Diseases)

Under Supervision of

Prof. Dr.Abdel Monium A. Salem
Prof. of Infectious Diseases
Fac. of Vet. Medicine, Cairo University

Prof. Dr.
Refaat M. Hussein Arab
Prof. of Infectious Diseases
Fac. of Vet. Medicine, Cairo University.

Dr.
Hamed M. Hammam
Chief Researcher, Central Laboratory for Control of Veterinary Biologics, Abbasia, Cairo, Egypt.

(2002)

B 71.2

DEDICATED TO:

My Parents,

My Husband,

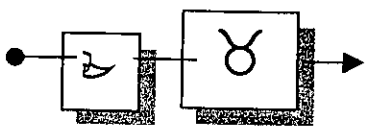
And

My Daughters

Laboratory for Control of Veterinary Biologics, Abbasia, Cairo, for her guidance and supplying great facilities giving to me to carry out this work.

I am deeply grateful with great and thanks to **Prof. Dr. Salah El-dien Abd El-Karim Selim,** Prof. of Microbiology Faculty of Veterinary Medicine, Cairo University, and **Prof. Dr. Hassan Mohamed El-Said,** Prof.of Infectious Diseases, Faculty of Veterinary Medicine, Cairo University, for their encouragement and helpful assistance .

I am also grateful to all **staff members** of Central Laboratory for Control of Veterinary Biologics, Abbasia, Cairo, for giving a hand whenever needed.



LIST OF CONTENTS

		Page
1. Introduction.	.....	1
2. Literature	.....	4
1. Epidemiology of oedamatous skin disease (OSD) in buffaloes.	.....	4
2. Microbiology of *Corynebacterium pseudotuberculosis*	.....	13
I. Morphology	.....	13
II. Cultural characters of C. pseudotuberculosis	.....	14
III. Biochemical identification of C. pseudotuberculosis	.....	15
3. Pathogenicity of C. pseudotuberculosis	.....	16
4. Corynebacterium pseudotuberculosis exotoxin	.....	17
5. Protective immune response and vaccination	.....	20
6. Serodiagnosis of corynebacterium pseudotuberculosis	.....	30
3. MATERIAL AND METHODS.	.....	48
3.1. Material	.....	48
1. Corynebacterium pseudotuberculosis bovine strain	.....	48
2. Media	.....	48
3. Reagents and Solutions	.....	49
4. Chemicals	.....	49

5. Stains 50

6. Equipments 50

7. Apparatus 50

8. Buffers and reagents used in ELISA 51

9. Animals 53

10. Samples 55

3.2. Methods 56

1. Isolation of Corynebacterium pseudotuberculosis (C.P.) 56

2. Identification of the isolated bacteria 56

3. Estimation of toxigenicity of the isolated strains 57

4. Vaccine preparation and evaluation 59

5. The double immunodiffusion technique 62

6. The rabbit skin sensitivity serum neutralization test proper 63

7. Enzyme-Linked Immunosorbent Assay 63

8. Tuberculin test 65

4. Experiments and Results. 66

5. Discussion. 111

6. Summary. 128

7. References. 132

Arabic Summary.

LIST OF TABLES

Table	Title	Page
1	Biochemical reactions of C. pseudotuberculosis isolates	75
2	Results of titration of exotoxin by the rabbit skin test	77
3	Results of titration of C.P.exotoxins by the mouse lethality test	77
4	Identification of the six strains of C. pseudotuberculosis by morphological, haemolysis on blood agar, rabbit skin test and mouse lethality test	79
5	Results of double immunodiffusion technique on sera of naturally infected, recovered and contact apparently clinically normal buffaloes	81
6	The predictive value of the double immunodiffution test	82
7	Results of the rabbit skin serum neutralization test on sera of naturally infected, recovered and contact apparently clinically normal buffaloes	83
8	The predictive value of the rabbit skin serum neutraliztion test	84
9	Results of ELISA on sera of naturally infected, recovered and contact apparently clinically normal buffaloes	85
10	The predictive value of ELISA	86
11	Shows the recorded temperature of experimentally infected and control buffaloes	92
12	Results of the double immunodiffusion test on sera collected from vaccinated non-challenged buffaloes	96
13	Results of the double immunodiffusion test on sera collected from vaccinated challenged buffaloes	97

14	Results of the double immunodiffusion test on sera collected from experimentally infected and control buffaloes	98
15	Results of rabbit skin serum neutralization test on sera collected from vaccinated non-challenged buffaloes	100
16	Results of rabbit skin serum neutralization test on sera collected from vaccinated challenged buffaloes	101
17	Results of rabbit skin serum neutralization test on sera collected from experimentally infected and control buffaloes	102
18	Results of ELISA on sera collected from vaccinated non-challenged buffaloes	104
19	Results of ELISA on sera collected from vaccinated challenged buffaloes	105
20	Results of ELISA on sera collected from experimentally infected and control buffaloes	106
21	Results of tuberculin test of vaccinated non-challenged buffaloes in mm	108
22	Results of tuberculin test of vaccinated challenged buffaloes in mm	109
23	Results of tuberculin test of experimentally infected and control buffaloes in mm	110

LIST OF FIGURES

Figure	Title	Page
1	Swelling of the dewlap with involvement of the draining lymph nodes	68
2	Showing multiple oedematous swellings on the abdomen	68
3	Swelling and oedema of the hind limb discharging bloody pus	69
4	Swelling and oedema of the neck and the prescapular lymph node	69
5	of the prescapular lymph node discharging bloody pus	70
6	Intracutaneous nodules along the course of the lymphatic vessles (right fore limb)	70
7	Showing corded lymphatic vessles. (left fore limb)	71
8	Showing Swelling of the left fore limb with ulceration of the skin	71
9	Showing cutanoeus nodules. (left fore limb)	72
10	Showing cutaneous nodule on the right cheek	72
11	Severe congestion at the site of inoculation of *C.pseudotuberculosis*	76
12	Determination of the minimal reacting dose	78
13	the recorded temperature of experimentally infected and control buffaloes.	93
14	Mild swelling at the injection site of the vaccinated challenged buffaloes	94
15	Swelling and oedema at the neck with an orange size oedema in the dewlap in the experimentally infected buffaloes	94

LIST OF ABBREVIATIONS

CFU	:	Colony Forming Unit
CP	:	Corynebacterium pseudotuberculosis
DIDT	:	Double Immunodiffusion Test
ELISA	:	Enzyme Linked Immunosorbent Assay
OSD	:	Oedematous Skin Disease
PBS	:	Phosphate Buffer Saline
PBST20	:	Phosphate Buffer Saline + Tween-20
PLD	:	Phospholipase-D
SHI	:	Serum Haemolysis Inhibition test

Introduction
