ACKNOWLEDGEMENTS

Firstly, Ultimate thanks to GOD

I would like to express my cardiac thanks and appreciation to **Prof.Dr. Morad Fahmy Hassan**, Professor of Acarology at Zoology and Agricultural Nematology Department, Faculty of Agriculture, Cairo University, for his supervision, guidance, fruitful discussions, advise and reviewing the manuscript.

Appreciation and deep thanks goes to **Dr. Fatma Samir Ali**, Associate Professor of Acarology, at Zoology and Agricultural Nematology Department, Faculty of Agriculture, Cairo University, for suggesing the problem, her supervision, guidance, support and encouragement and reviewing the manuscript.

Grateful appreciation, special debt and gratitude are due to **Dr. Abdel-Khalek M. Hussein**, Assoc. Research Professor, Vegetable Acarology Department, Plant Protection Research Institute, for his valuable advise, efforts and guidance through the work.

My gratitude is also extended to **Dr. A.K. Nasr**, Professor of Acarology, National Research Center, for his help of identification.

Thanks are extended to **Dr. S.M. Abou-El-Ela**, Professor of Economic Entomology, Economic Entomology and Pesticides Department, Faculty of Agriculture, Cairo University, to provide eggs and different stages of the potato tuber moth, *Phthorimaea operculella*.

INTRODUCTION	1
REVIEW OF LITERATURE	4
MATERIALS AND METHODS	26
I- Collection of mites	26
II- Biological studies	26
1- Rearing predaceous mites	26
2- Source of food	27
RESULTS	31
I- BIOLOGICAL STUDIES OF <i>MACROCHELES MUSCAEDOMESTICAE</i> (SCOPOLI)	32
1- Effect of different stages of <i>P. operculella</i> on developmental stages of <i>M. muscaedomesticae</i>	32
2- Effect of different stages of <i>P. operculella</i> on longevity and female fecundity of <i>M. muscaedomesticae</i>	35
3- Effect of different temperature on duration of developmental stages of <i>M. muscaedomesticae</i>	40
4- Effect of different temperatures on female longevity and fecundity	44
5- Food consumption of <i>Macrocheles muscaedomesticae</i> when fed on different stages of <i>P. operculella</i>	48
6- Relationship between predation efficiency and fecundity	52
7- Effect of different temperature on food consumption of <i>M. muscaedomesticae</i> when fed on first larval instar of <i>Phthorimaea operculella</i>	55
II- BIOLOGICAL STUDIES OF <i>LASIOSEIUS ATHIASAE</i> NAWAR AND NASR	58
1- Effect of different stages of <i>P. operculella</i> on developmental stages of <i>L. athiasae</i>	58
2- Effect of different stages of <i>P. operculella</i> on longevity and female fecundity of <i>L. athiasae</i>	61

ARABIC SUMMARY	

iii
LIST OF TABLES

Table No.		Page
(1)	Duration of developmental stages of <i>Macrocheles muscaedomesticae</i> (Scopoli) fed on different stages of <i>Phthorimaea operculella</i> (Zeller) at 25°C and 70 % R.H.	34
(2)	Effect of different stages of <i>Phthorimaea operculella</i> (Zeller) on female longevity and fecundity of <i>Macrocheles muscaedomesticae</i> (Scopoli) at 25°C and 70 % R.H.	37
(3)	Duration of developmental stages of <i>Macrocheles muscaedomesticae</i> (Scopoli) on first instar of <i>Phthorimaea operculella</i> (Zeller) at different temperatures.	42
(4)	Effect of temperatures on female longevity and fecundity of <i>Macrocheles muscaedomesticae</i> (Scopoli) on first instar of <i>Phthorimaea operculella</i> (Zeller)	47
(5)	Food consumption of <i>Macrocheles muscaedomesticae</i> (Scopoli) on different stages of <i>Phthorimaea operculella</i> (Zeller) at 25°C and 70 % R.H.	54
(6)	Food consumption of <i>Macrocheles muscaedomesticae</i> Scopoli during its life span on first instar of <i>Phthorimaea operculella</i> (Zeller) at different temperatures.	57
(7)	Duration of developmental stages of <i>Lasioseius athiasae</i> Nawar & Nasr on different stages of <i>Phthorimaea operculella</i> (Zeller) different stages at	60
(8)	25°C and 70 % R.H. Effect of different stages of <i>Phthorimaea operculella</i> (Zeller) on female longevity and fecundity of <i>Lasioseius athiasae</i> Nawar & Nasr at 25°C and 70 %	63
(9)	R.H. Duration of developmental stages of <i>Lasioseius athiasae</i> Nawar & Nasr on first instar of <i>Phthorimaea operculella</i> (Zeller) at different temperatures.	66

LIST OF TABLES : Cont'd.

Table No.		Page
(10)	Effect of temperatures on female longevity and fecundity of <i>Lasioseius athiasae</i> Nawar & Nasr on first instar of <i>Phthorimaea operculella</i> (Zeller).	69
(11)	Food consumption of <i>Lasioseius athiasae</i> Nawar & Nasr female and male during its life span when fed on different stages of <i>Phthorimaea operculella</i> (Zeller) at 25°C and 70 % R.H.	73
(12)	Food consumption of <i>Lasioseius athiasae</i> Nawar & Nasr during its life span on first instar of <i>Phthorimaea operculella</i> (Zeller) at different temperatures.	77 ⁶

LIST OF FIGURES

Fig. No.		Page
(1)	Potato tubers above a downy sand layer enter the rearing cage	30
(2)	Open rearing cage, show potato tubers infected with <i>P.operculella</i> eggs and above downy sand layer	31
(3)	Effect of different stages of <i>Phthorimaea operculella</i> on life cycle period of <i>Macrocheles muscaedomesticae</i> of both sexes at 25°C and 70 % R.H.	35
(4)	Effect of different stages of <i>Phthorimaea operculella</i> on longevity duration of <i>Macrocheles muscaedomesticae</i> of both sexes at 25°C and 70 % R.H.	38
(5)	Effect of different stages of <i>Phthorimaea operculella</i> on total number of eggs deposited by <i>M. muscaedomesticae</i> females at 25°C and 70 % R.H.	39
(6)	Duration of developmental stages of <i>M. muscaedomesticae</i> female on first instar of <i>P.operculella</i> at 20, 25 and 30°C	43
(7)	Duration of developmental stages of <i>M. muscaedomesticae</i> male on first instar of <i>P.operculella</i> at 20, 25 and 30°C	44
(8)	Effect of different temperatures on female longevity and life span of <i>M. muscaedomesticae</i> on 1st instar of <i>P.operculella</i> .	48
(9-a)	<i>P. operculella</i> eggs before preying by <i>Macrocheles muscaedomesticae</i>	50
(9-b)	<i>P. operculella</i> eggs after preying by <i>Macrocheles muscaedomesticae</i>	50
(10-a)	<i>P. operculella</i> larvae before preying by <i>Macrocheles muscaedomesticae</i>	51
(10-b)	1st, 2nd and 3rd <i>P. operculella</i> larvae after preying by <i>Macrocheles muscaedomesticae</i>	51
(11-a)	Healthy and preyed <i>P. operculella</i> pupae by <i>Macrocheles muscaedomesticae</i>	52
(11-b)	<i>M. muscaedomesticae</i> during feeding on <i>P. operculella</i> pupae	52
