**Exudative Versus Transudative Ascites:
The Role of Abdominal Ultrasonography in
Differentiation in Comparison to
Conventional Methods**

B5629

Thesis

Submitted for partial fulfillment of the
M.D. Degree in
Tropical Medicine

By

Eman Mahmoud Fathi Barakat

M.B., B.Ch., M.Sc., (Tropical Medicine)

Supervised By

Prof. Dr. Effat Abd El-Monem El-Fakhfakh

Prof. of Tropical Medicine

Faculty of Medicine, Ain Shams University

Dr. Mohamed Amin Sakr

Assist. Prof. of Tropical medicine

Faculty of Medicine, Ain Shams University

Dr. Eman Mohamed El Gendy

Assist. Prof. of Tropical Medicine

Faculty of Medicine, Ain Shams University

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

رَبَّنَا
رَبَّنَا
كَمَا أَحْمَلْتَهُ عَلَى الَّذِينَ مِنْ قَبْلِنَا
رَبَّنَا وَلَا تَحْمِلْنَا مَا لَا طَاقَةَ لَنَا بِهِ
وَاعْفُ عَنَّا وَاعْفِرْ لَنَا وَارْحَمْنَا أَنْتَ
مَوْلَانَا فَانصُرْنَا عَلَى الْقَوْمِ الْكَافِرِينَ
صَلَّى اللَّهُ الْعَظِيمُ

سورة البقرة

آية {٢٨٦}

ACKNOWLEDGEMENT

I would like to express my deepest gratitude and thanks to Prof. Dr. Afaf Massoud, Head of the Department and Prof. of Tropical Medicine, Faculty of Medicine, Ain Shams University, for her encouragement.

My thanks are also due to Prof. Dr. Effat Abdel Moniem El-Fakhfakh, Prof. of Tropical Medicine, Faculty of Medicine, Ain Shams University, for her meticulous supervision and kind help through all parts of the tough work, as without her continuous support, this work would not have come to light.

My appreciation and thanks are due to Assist. Prof. Dr. Mohamed Amin Sakr, Assist. Prof. of Tropical Medicine, Faculty of Medicine, Ain Shams University. He gave me much of his time and experience, keenly supervised my work and guided every step till it was completed.

My thanks are also due to Assist. Prof. Dr. Eman Mohamed El-Gendy, Assist. Prof. of Tropical Medicine, Faculty of Medicine, Ain Shams University, for her generous help.

Finally, I wish to thank my colleagues all members of the medical and nursing staff of Tropical Medicine Department, Ain Shams University, for all the help they offered.

LIST OF TABLES

<u>Tab. No.</u>	<u>Title</u>	<u>Page</u>
1	Clinical presentations of the studied patients.....	110
2	Classification of the studied patients into transudative and exudative groups according to the ascitic fluid total protein level	110
3	Age distribution among the studied groups	111
4	Gender distribution among the studied groups.....	111
5	The relation between aspect and nature of ascitic fluid (transudative and exudative) in the studied groups	112
6	Results of chemical analysis of ascitic fluid	112
7	Ascitic fluid cell count in the studied groups.....	113
8	Results of ascitic fluid bacteriological examination	113
9	Results of PCR for detection of TB bacilli in ascitic fluid.....	113

10	The cytological findings in ascitic fluid of the studied patients	114
11	The cytological findings in ascitic fluid of the malignant group.....	114
12	Liver function tests and serum LDH in the studied groups	115
13	Renal function tests in the studied groups.....	115
14	Erythrocytic sedimentation rate (ESR), hemoglobin (Hb) and total leucocytic count (WBCs) in the studied groups	116
15	The serum ascites albumin gradient (SAAG) in the studied groups.....	116
16	Viral hepatitis B and C markers in the studied groups	117
17	Results of rectal snip examination for Schistosoma ova in the studied groups.....	117
18	Sonographic findings in the studied groups.....	118
19	Portal vein diameter in the studied groups.....	120
20	Classification of the studied patients according to the sonographic grade of ascitic fluid.....	120
21	Correlation between sonographic grade of ascitic fluid and different variables	121
