SEGMENTAL MANDIBULAR RECONSTRUCTION BY
DISTRACTION OSTEOGENESIS

A Thesis

Submitted in Partial Fulfillment of M.D. Degree in Plastic and
Reconstructive Surgery

By

Loai El-Sayed El-Bassiony, M.B., B.Ch., M.Sc.
Assistant Lecturer of Plastic & Reconstructive Surgery,
Faculty of Medicine, Mansoura University

SUPERVISED

By

Prof. Dr. Hassan A. Badran
Professor of Plastic & Reconstructive Surgery,
Faculty of Medicine, Ain Shams University

Prof. Dr. Osama Shouman

Professor of Plastic and
Reconstructive Surgery,
Faculty of Medicine,
Mansoura University

Prof. Dr. Amr Salah

Professor of Plastic and
Reconstructive Surgery,
Faculty of Medicine,
Ain Shams University

ACKNOWLEDGEMENT

First and foremost, thanks to God.

I would like to express my deep thanks and gratefulness to Prof. Dr. Hassan A Badran, who made the guidelines for this thesis. I have profited immensely from the chances I got to discuss with him various issues in the field. Needless to say, without his constant guidance and kind encouragement, this thesis would not be accomplished.

I wish to thank Prof. Dr. Osama M. Shouman, for his continuous encouragement and unlimited support through out my career. I am also indebted to Prof. Dr. Amr A Salah for his kind care and great help during conduction of this thesis.

Thanks are also due to Ass. Prof. Dr. Steven R. Buchman, Director of Craniofacial Anomalies Program at University of Michigan. He offered me the all-possible facilities to go through this work, training, raw materials, and academic facilities. My deep appreciation should go to Prof. Dr. David J. Smith Jr., Head of Plastic Surgery Section at University of Michigan who supported me, both academically and socially, throughout the two years I have spent among his team in such great educational institution.

*Finally, my sincere thanks to **Janice Davis**, secretary at the Plastic Surgery Section at Michigan University and **Marlene Chesney**, Coordinator of Craniofacial Anomalies Program at University of Michigan for their kind help and support to let me acquainted with the system there.*

*To those who
Have taken the trouble of
Offering me everything
For nothing*

To

My Mother and Father

My Wife

Batool and Abd-Allah

I dedicate this thesis

TABLE OF CONTENTS

	Page
Abbreviations -----	I
Introduction -----	1
Aim of the Work -----	5
Review of Literature	
Biologic bases of bone healing and grafting -----	6
Principles and options for mandibular reconstruction -----	35
# Bone grafts and bone substitutes -----	41
# Alloplastic reconstruction -----	55
# Composite vascularized bone flaps -----	63
# Guided bone regeneration -----	73
# Distraction osteogenesis	
➤ Origin and evolution -----	76
➤ Evolution of mandibular distraction devices and techniques -----	83
➤ Biologic and histologic view -----	97
➤ Distraction histogenesis -----	103
Anatomy of the rat mandible -----	108
Mechanotransduction -----	111
Immunohistochemistry -----	127
Materials and Methods -----	132
Results	
Phase one -----	156
Phase two -----	176
Discussion -----	205
Summary and Conclusion -----	219
References -----	222
Arabic Summary -----	253
