**MOLECULAR PHYSIOLOGICAL STUDIES
ON HEAT SHOCK PROTEIN EXPRESSION
IN A STRESSED PLANT**

A THESIS

Submitted for the Degree of Science
In Botany
(Plant Physiology)

By

Hanan Ahmed Hashem

(B. Sc. 1996)

Supervisors

M. Sc. Thesis

Name : Hanan Ahmed Hashem

Title : "Molecular Physiological Studies on Heat Shock Protein Expression in A Stressed Plant"

Degree : Master of Science in Botany
(Plant Physiology)

Supervisors

Dr. Raifa A. Hassanein, Professor of Plant Physiology,
Faculty of Science, Ain Shams University.

Dr. Amira A. Hassanein, Professor of Plant Physiology,
Faculty of Science, Ain Shams University.

Dr. Ashraf Haider, Associate Professor of Molecular
Genetics, Botany Department, Faculty of Science,
Tanta University.

Head of Botany Department

Prof. Dr. Said Farag Khalifa

THIS THESIS HAS NOT PREVIOUSLY
BEEN SUBMITTED FOR A DEGREE AT
THIS OR ANY OTHER UNIVERSITY.

HAROLD ANNE HANCOCK

SIGNATURE :

ACKNOWLEDGEMENT

First of all, I do thank ALLAH for the gifts he has given to me.

I wish to express my deep thanks to Prof. Dr. Raifa Hassanein, Professor of Plant Physiology, Faculty of Science, Ain Shams University for supervision, untiring efforts and valuable guidance since the beginning of this work.

I would like to express my sincere gratitudes to Prof. Dr. Amira Hassanein, Professor of Plant Physiology, Faculty of Science, Ain Shams University, who gave me her time, assistance and support throughout this study.

I also want to express my appreciation to Dr. Ashraf Haider, Assoc. Prof. of Molecular Genetics, Botany Department, Faculty of Science, Tanta University, for his useful and valuable notes.

Special thanks to Prof. Dr. Magdy Madkour, Director of Agriculture Genetic Engineering Research Institute (AGERI), for the opportunity ... encouragement and continuous support.

Thanks to Dr. Sayed Farag, Head of Botany Department and all the staff members of Botany Department for their support and encouragement.

I also would like to thank all the AGERI members, especially my colleagues in MMGT lab, cause they have been all very helpful, cooperative and supportive to me during my work.

And last but not least, I would like to express my deepest thanks to my precious family for their deep concern, continuous support, endless patience and love.

Hanan Ahmed Hashem

List of Tables	v
List of Figures	v
List of Plates	x
Abstract	xv
List of Abbreviations	xvii
• Introduction	1
• Review of Literature	4
- Germination and growth responses	4
- Metabolic activities	7
* Phytohormones	7
* Photosynthetic pigments	12
* Carbohydrates	13
* Ion contents	15
* Amino acids composition and protein biosynthesis	17
- Heat shock proteins	21
- Heat shock genes	26
- Regulation of HS genes	27
- Glycine betaine and its role in improving stress tolerance..	29

• Materials and Methods	35
- Plant materials.....	35
- Extraction, separation and estimation of growth regulating substances by GC and HPLC	35
- Measurement of ethylene by GC	37
- Estimation of photosynthetic pigments	38
- Transmission electron microscope	38
- Estimation of carbohydrates	39
- Estimation of certain minerals	41
- Estimation of amino nitrogen	41
- Estimation of proline	42
- Protein analysis	43
- <i>In vivo</i> radioactive labelling of heat shock proteins.....	48
- Western blot analysis.....	49
- Molecular analysis of DNA	51
• Results	57
* Experiment I :	
Effect of pre-emergence soil treatment with different salinity levels on germination, growth and survival of three cultivars of <i>Zea mays</i> differing in their tolerance ...	57
* Experiment II :	
Effect of post-emergence soil treatment with increasing levels of NaCl on growth characteristics, endogenous phytohormones, metabolic activities and protein profile of <i>Zea mays</i> L. cv. Giza 2 in absence or presence of glycine betaine	72

* Experiment III :

Effect of drought stress on growth characteristics,
endogenous phytohormones, metabolism and protein
profile of *Zea mays* L. cv. Giza 2 in absence or
presence of glycine betaine 114

* Experiment IV :

Effect of high temperature stress on growth characterist-
ics, endogenous phytohormones, certain metabolic activi-
ties and protein profile of *Zea mays* L. cv. Giza 2 in
absence or presence of glycine betaine 142

* Experiment V :

Comparative studies on drought-induced proteins and heat
shock proteins in two *Zea mays* cultivars differing in their
tolerance..... 175
