## THE STUDY OF THE POSSIBLE ROLE OF HELICOBACTER PYLORI IN THE ETIOLOGY OF CHRONIC LARYNGITIS IN PATIENTS WITH GASTROESOPHAGEAL REFLUX DISEASE

THESIS
Submitted for partial fullfilment of the
Master degree in Internal Medicine

BY

Khaled Hassan Abd El-Naby

(M.B. B.CH)

SUPERVISED BY

#### Prof. Dr. Abd El-Rahman Soliman

Assisstant Professor of Internal Medicine Faculty of Medicine, Ain Shams University

#### Prof. Dr. Hassan Wahba

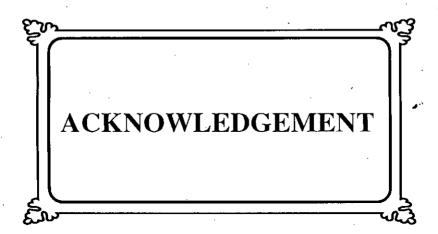

Assisstant Professor of Otolaryngology Faculty of Medicine, Ain Shams University

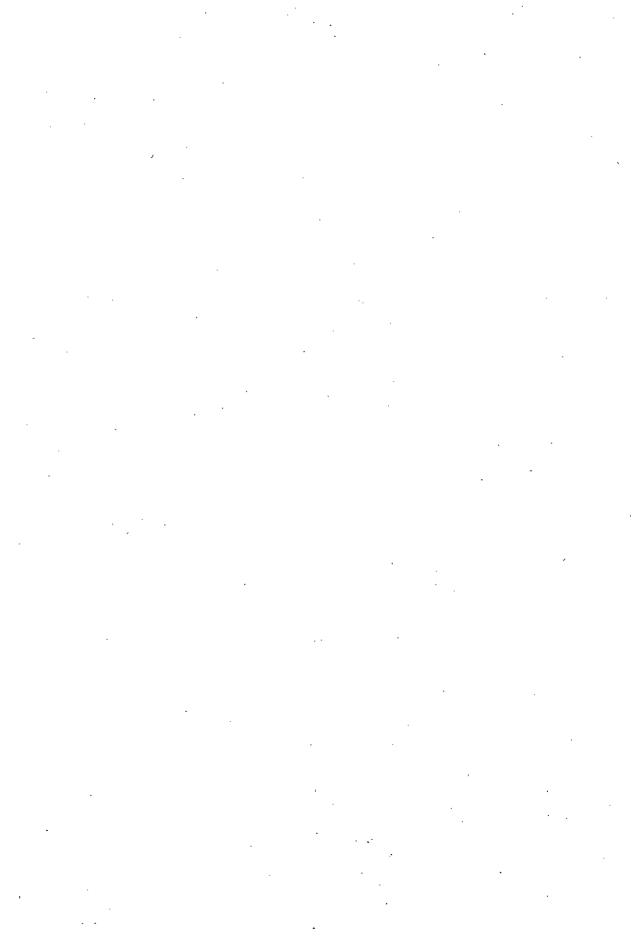

#### Dr. Eisha Mamdouh Hafez

Lecturer of Microbiology and Immunology Faculty of Medicine, Ain Shams University

> Ain Shans University CAIRO (2001)

B 7001

#### Acknowledgement

First, thanks are all to **God**, for blessing me this work until it reached its end, as a little part of his generous help throughout life.

I would like to direct special thanks to **Prof. Dr. Abd El-Rahman Soliman,** Assistant Professor of Internal Medicine, Ain Shams University, for the great care and support he gave me in each step of this work.

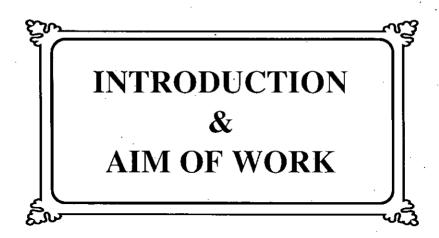

I am very grateful to **Prof. Dr. Hassan** Wahba, Assistant Professor of Otorhinolaryngology, Ain Shams University, for his generous continuous help throughout the whole work.

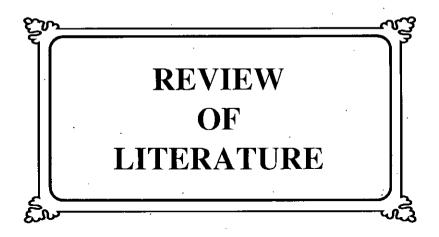

It gives me a great pleasure to express my deep gratitude to **Dr. Eisha Mamdouh Hafez**, lecturer of Microbiology and Immunology, Ain Shams University, for her great support, valuable supervision, precious instructions and encouragement throughout this work.

Khaled Hassan Abdel Naby

#### CONTENTS

Introduction	<b>1</b>
Review of literature	2-69
I- GERD	2-26
*Pathology	2
*Symptoms	; <b>13</b>
*Investigations	. 16
*Complications	22
II- Chronic laryngitis	27-43
*Aetiology	. 29

#### LIST OF TABLES

Table 1	The presenting gastric complaints of the	79			
	patients.				
Table 2	The presenting laryngeal complaints of the	79			
<b>F</b>	subjects of group I.				
Table 3	The history of previous drug intake.	80			
Table 4	The clinical data of groups I, II & III patients.				
Table 5	The distribution of special habits among	81			
	studied groups.				
Table 6	The endoscopic findings of all subjects.	81			
Table 7	The number and percentage of H. pylori	82			
	positive cases among all studied subjects				
	detected by different techniques.				
Table 8	Comparison between group IA and group IIA	82			
	(antral biopsy was taken) diagnosed by gram				
	staining technique.				
Table 9	Comparison between group IL and Group IIL	82			
	(laryngeal biopsy was taken) diagnosed by				
TT 11 10	gram staining technique.	0.0			
Table 10	Comparison between the number and	83			
	percentage of H. pylori +ve and -ve cases of				
	both groups I and II diagnosed by rapid urease test (RUT).				
Table 11	Comparison between the number and	83			
Table 11	percentage of H. pylori +ve and -ve cases of	03			
	group I and II diagnosed by ELISA technique				
	[for detection of anti H. pylori IgG Ab].				
Table 12	Comparison between the number and	83			
	percentage of H. pylori +ve and -ve cases of				
	group I and III (control) diagnosed by ELISA				
	technique.				
Table 13	Comparison between the number and	84			
	percentage of H. pylori +ve and -ve cases of				
	group II and III (control) diagnosed by ELISA				
	technique.				
Table 14	Performance of individual techniques	84
