The Relation Between Chlamydia Pneumoniae Infection and Other Risk Factors In Patients With Coronary Heart Disease

Thesis

Submitted to the Medical Research Institute,
Alexandria University

In Partial fulfillment of the requirements for the
Degree of Master
In
Applied Medical Chemistry

By

Nahla Mohamed Hassan Mohamed

B.Sc. of Microbiology/Chemistry, Faculty of Science
Alexandria University, 1998

The Relation Between Chlamydia Pneumoniae Infection and Other Risk Factors In Patients With Coronary Heart Disease

Represented by

Nahla Mohamed Hassan Mohamed

B.Sc. Microbiology/ Chemistry, Faculty of Science
Alexandria University, 1998

For the Degree Of

Master In Applied Medical Chemistry

Examiner's committee

Prof. Dr. Mervat Abdel Fattah El Toukhy
Professor of Applied Medical Chemistry
Applied Medical Chemistry Department
Medical Research Institute
Alexandria University

Approved

Mervat El Toukhy

Prof. Dr. Suzan Mohamed Abdel Tawab Salama
Professor and Head of Biochemistry Department
Medical Research Institute
Alexandria University

Suzan M. Abdel Tawab

Prof. Dr. Eglal Abdel Salam AL Sherbeney
Professor And Head of Microbiology Department
Medical Research Institute
Alexandria University

Eglal AL Sherbeney

Prof. Dr. Nadia Ahmed Barghash
Professor of Medical Biochemistry
Medical Biochemistry Department
Faculty of Medicine
Alexandria University

Nadia Barghash

Dr. Suzan Mohamed Abdel Tawab Salama

Professor and Head of Biochemistry Department
Medical Research Institute
Alexandria University

Suzan M. A. Abdel Tawab

ACKNOWLEDGEMENT

Thanks first and last to **ALLah** , the Beneficent, the Merciful, thanks for his care , guidance in every step of my life, and supporting me to accomplish this work.

I am delighted to express my hearty thanks, profound gratitude, sincere appreciation and indebtedness to **Prof. Dr. Mervat Abdel Fattah El Toukhy**, Professor of Applied Medical Chemistry , Medical Research Institute, Alexandria University, for her laborious continuous effort, precious advise. I gratefully acknowledge her kind support and long time she invested in this study. Indeed, if she was not supporting me, this work would have never come to light.

I would like to thank **Prof. Dr. Ezz El-Deen Anwar Saleh** , Assistant Professor of Microbiology, Medical Research Institute, Alexandria University, for suggesting the point of the research and his help in learning me technique which I was completely unfamiliar with.

I am grateful to **Prof. Dr. Kamal Mahmoud Ahmed**, Professor of Cardiology and Angiology, and Head of cardiology Unit, Medical Research Institute, Alexandria University, for supplying me with patients needed for this study, and for his kind assistance through this work .

Special thanks must go to **Prof. Dr. Suzan Mohamed Abdel Tawab Salama**, Professor and Head of Biochemistry Department, Medical Research Institute, Alexandria University, for her sincere advice, criticism, and active sheering in this work. I would like to appreciate her generous cooperation, and persistent encouragement in supervising this work.

All words in the world can't express my deepest gratitude and special appreciation to **Prof. Dr. Abeer Abdel Rahim Ghazal**, Assistant Professor of Microbiology, Medical Research Institute, Alexandria University, who had been always beside me with, her time and efforts to go beyond all hardnesses facing me through this work.

Furthermore, I wish to express my great thanks to the head and staff members of **Applied Medical Chemistry, Microbiology Departments** in Medical Research Institute for their kind help and cooperation.

Finally, I call **Allah** to make well all Muslims patients in every were in the world.

CONTENTS

Chapter	Page
I) Introduction.....	1
- Aetiology of Ischemic Heart Disease (IHD).....	1
- Coronary Atherosclerosis.....	1
- Cardiovascular risk factors.....	4
- Chlamydia.....	7
- Chlamydia pneumoniae.....	9
- Chlamydia pneumoniae and coronary heart disease.....	10
- Methods in detection of Chlamydia pneumoniae.....	11
- Prevalence of Chlamydia pneumoniae in serum of CHD patients	13
- Prevalence of Chlamydia pneumoniae in peripheral blood.....	14
mononuclear cell (PBMNCs) of CHD patients	
- Treatment of Chlamydia pneumoniae.....	14
- Marker of inflammation in CHD.....	15
- hs- C- reactive protein.....	15
- Fibrinogen.....	16
II) Aim of the work.....	17
III) Subjects and Methods.....	18
- Determination of serum total cholesterol concentration.....	19
- Determination of serum triglycerides concentration.....	20
- Determination of serum high density lipoprotein cholesterol.....	21
concentration (HDL-C)	
- Estimation of serum low density lipoprotein cholesterol.....	22
concentration (LDL-C) in serum	
- Detection of Chlamydia <i>pneumoniae</i> IgG antibody in serum	22
- Detection of Chlamydia pneumoniae DNA in Buffy coat layer.....	26
- Detection of serum highly sensitive C- reactive protein	29
- Detection of plasma fibrinogen level	31
IV) Results.....	33
- Risk factors for coronary atherosclerosis.....	33
- Markers of inflammation and platelets count.....	42
- Prevalence of Chlamydia pneumonia IgG antibodies in serum of.....	47
CAD patients and control.	

- Prevalence of Chlamydia pneumonia DNA in peripheral blood.....	52
mononuclear cells (PBMNCs) by PCR test in CAD patients and controls	
- Sensitivity and specificity of ELISA test compared with.....	55
PCR test as a gold standard in detection of Chlamydia pneumoniae within CAD patients.	
- Relation between Chlamydia pneumoniae DNA and other.....	56
risk factors in patients with coronary artery diseases	
- Relation between Chlamydia pneumoniae DNA and markers.....	64
of inflammation in CAD patients	
V) Discussion.....	68
VI) Summary and Conclusions.....	75
VII)References.....	78
VIII) Arabic Summary
