FACULTY OF ENGINEERING  
STRUCTURAL DEPARTMENT**

**Punching Behavior of RC Slabs Retrofitted with FRP  
Sheets under Eccentric Loading**

**BY**

**Ahmed Hafez Abdul Hamid Dawah**

B.Sc. 2009 STRUCTURAL DIVISION  
CIVIL ENGINEERING DEPARTMENT  
AIN SHAMS UNIVERSITY

**A Thesis**

**SUBMITTED IN PARTIAL FULFILLMENT FOR THE  
REQUIREMENTS OF THE DEGREE OF MASTER OF SCIENCE  
IN CIVIL ENGINEERING (STRUCTURAL)**

**SUPERVISED BY**

**Professor Dr. Amr Ali  
Abdelrahman**  
Professor of Concrete Structures,  
Structural Eng. Dept., Ain Shams  
University

**Dr. Tamer H. K. Elafandy**  
Associate Professor,  
Concrete Structure Institute,  
Housing and Building National  
Research Center

**Cairo - 2016**

**AIN SHAMS UNIVERSITY  
FACULTY OF ENGINEERING**

**APPROVAL SHEET**

**Thesis** : Master of Science in Civil Engineering (Structural)  
**Student Name** : Ahmed Hafez Abdel Hamid Dawah  
**Thesis Title** : Punching behavior of RC flat slabs retrofitted with  
FRP sheets under eccentric loading

**Examiners Committee:**

**Signature**

**Prof. Dr. Sherif Mohamed Elzeiny Mostafa**

Professor of Concrete Structures  
Housing and Building National Research Center

.....

**Prof. Dr. Amr Hussein Zaher**

Professor of Concrete Structures, Structural Engineering Department  
Faculty of Engineering - Ain Shams University

.....

**Prof. Dr. Amr Ali Abdel Rahman**

Professor of Concrete Structures, Structural Engineering Department  
Faculty of Engineering - Ain Shams University

.....

**Dr. Tamer Hassan Kamal Elafandy**

Associate Professor of Concrete Structures  
Housing and Building National Research Center

## **Acknowledgements**

First of all, I thank **ALLAH** who guided and helped me to finish this work in the proper shape.

I would like to express my deepest appreciation to **Prof. Dr. Amr Ali Abdelrahma**, Professor of Concrete Structures Faculty of Engineering, Ain Shams University, for his guidance and valuable suggestions.

I would like to express extremely grateful to **Dr. Tamer Hassan Kamal Elafandy**, Associate Professor of Concrete Structures, Housing and Building National Research Center, Giza, Egypt, for his experienced advice, continuous and deep encouragement through all phases of the work.

Special thanks to Engineer Ahmed Zaki Elmenawy for his support.

Finally, I would like to thank my family specially my Mother and Father and my Wife for their continuous encouragement, over whelming support, fruitful care and patience, especially during the hard times

24	Application of CFRP as shear reinforcement .....	39
25	drilling holes for CFRP stitches according to scheme .....	39
26	Specimen “SP04” after drilling all holes .....	39
27	Cutting the CFRP according to the strengthening scheme ....	40
28	Mixing Sikadur 31CF .....	40
29	Surface leveling and edge rounding using Sikadur 31CF .....	40
30	Apply the adhesive epoxy to the CFRP laminates.....	40
31	Installing the CFRP laminates .....	41
32	strengthening one of the strengthened specimens after installing all of the CFRP laminates .....	41
33	Location of steel strain gauges .....	42
34	Location of LVDT .....	42

35	Arrangement of Pots Over the specimens .....	43
36	Layout of test specimens .....	44
37	Test Setup at HBRC Lab .....	44
38	Shows the Concrete Cube Test .....	46
39	Sikadur 31CF Components for surface preparation .....	47
40	Comparison Between the tested specimens to show the maximum and Elastic Peak measure load for all tested specimens.....	52
41	Comparison Between the tested specimens to show the Failure and Elastic Peak Deflections for all tested specimens.....	52
42	Load and vertical Deflection at LVDT of S0 .....	53
43	The Crack Pattern and Mode of Failure at the Top and Bottom of the Control specimen (S0).....	54
44	The Steel Reinforcement Strain in the Control specimen (S0) .....	54
45	The Maximum, Failure and Maximum elastic deflection along the specimen center line of the Control specimen (S0) .....	54
46	Load and vertical Deflection at LVDT of S01 .....	56

47	The Crack Pattern and Mode of Failure at the Top and Bottom of the Control specimen (S01).....	56
48	The Maximum, Failure and Maximum elastic deflection along the specimen center line of the Control specimen (S01) .....	57
49	Load and vertical Deflection at LVDT of S02 .....	58
50	The Crack Pattern and Mode of Failure at the Top and Bottom of the Control specimen (S02).....	58
51	The Steel Reinforcement Strain in the Control specimen (S02) .....	59
52	The Maximum, Failure and Maximum elastic deflection along the specimen center line of the Control specimen (S02) .....	59
53	Load and vertical Deflection at LVDT of S03 .....	60
54	The Crack Pattern and Mode of Failure at the Top and Bottom of the Control specimen (S03).....	61
55	The Maximum, Failure and Maximum elastic deflection along the specimen center line of the Control specimen (S03) .....	61
56	Load and vertical Deflection at LVDT of S04 .....	62

57	The Crack Pattern and Mode of Failure at the Top and Bottom of the Control specimen (S04).....	63
58	The Maximum, Failure and Maximum elastic deflection along the specimen center line of the Control specimen (S04) .....	63
59	Load and vertical Deflection at LVDT of S05 .....	64
60	The Crack Pattern and Mode of Failure at the Top and Bottom of the Control specimen (S05).....	65
61	The Steel Reinforcement Strain in the Control specimen (S05) .....	65
62	The Maximum, Failure and Maximum elastic deflection along the specimen center line of the Control specimen (S05) .....	66
63	Load deflection Curve of All tested specimens at midpoint of specimen (LVDT 01) .....	66
64	Steel Reinforcement Strain of All tested specimens.....	68
65	Load Deflection Curves to study the Effect of the CFRP Amount .....	69
66	Maximum Load and Percentage of Increase of Capacity .....	69
67	Ductility and Percentage of Increase in ductility.....	70

68	Load Deflection Curves to study the Effect of the CFRP Distribution .....	71
69	Maximum Load and Percentage of Increase of Capacity .....	71
70	Ductility and Percentage of Increase in ductility .....	72
71	Load Deflection Curves to study the Effect of the spacing CFRP .....	73
72	Maximum Load and Percentage of Increase of Capacity .....	73
73	Ductility and Percentage of Increase in ductility .....	74
74	Load Deflection Curves to study the Effect of the CFRP Arrangement .....	75
75	Maximum Load and Percentage of Increase of Capacity .....	76
76	Ductility and Percentage of Increase in ductility .....	76
77	Dowel Force Tests Bauman and Rusch (1970) .....	79
78	Location of Dowel Force .....	81
79	Assumed distribution of shear stress .....	83
80	ACI Recommendations of Shear Studs Spacing .....	84
81	Comparison between experimental results and different codes .....	95

## LIST OF TABLES

### Table

1	Material and geometry properties of test specimens .....	22
2	Detail of specimens strengthening schemes .....	32
3	Concrete Mix Proportions.....	45
4	The Yield Strength, Ultimate Strength and Elongation.....	47
5	Technical data of CFRP sheets .....	48
6	Maximum Measured Load, Measured Deflections at Elastic Peak and Ultimate loads, Ductility and Modes of Failure.....	51
7	Comparison between the Experimental Program Results and the Proposed Design Equations .....	87
