Studies on the Probable Role of Immune Mechanism in Pathogenesis of Gall Bladder Diseases

Thesis

*Submitted for the partial fulfillment of
the M.D. Degree of Internal Medicine*

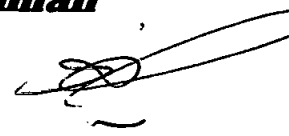

Presented by

El-Sayed Shehab Mohamed El-Sayed Nassar

Supervisors

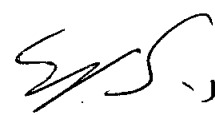

Prof. Dr. Mohamed Diaa El-Din Soliman

*Professor of Internal Medicine & Immunology
Faculty of Medicine - Ain Shams University*

Prof. Dr. Abdel Meged M. El-Shinnawy

*Professor of Surgery
Faculty of Medicine - Ain Shams University*

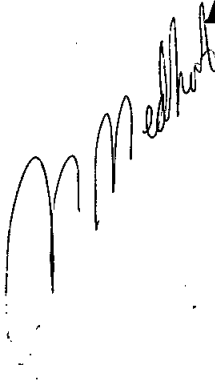

Prof. Dr. Rasha Yossef Khalil

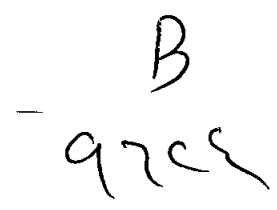

*Professor of Immunology
Faculty of Medicine - Ain Shams University*

Prof. Dr. Salwa Ibrahim El-Haddad

*Professor of Pathology
Faculty of Medicine - Ain Shams University*

***Faculty of Medicine
Ain Shams University
2001***

Acknowledgment

*My deepest gratitude and thanks to **God** the most merciful for guiding me and giving me the strength to complete this work the way it is.*

*I find no words by which I can express my deepest thanks and profound respect to my honored **Professor Dr. Mohamed Diaa El-Din Soliman** Professor of Internal Medicine and Immunology, Faculty of Medicine, Ain Shams University for the continuous kind encouragement, guidance and support he gave me throughout the whole work. It has been an honour and a privilege to work under his generous supervision.*

*Also, I would like to express my deepest thanks and appreciation to **Professor Dr. Abdel Meged M. El-Shinnawy**, Professor of Surgery, Faculty of Medicine, Ain Shams University for his great support, valuable time, careful supervision and continuous advices which helped me to overcome many difficulties.*

*I am also deeply grateful and would like to express my sincere thanks and gratitude to **Professor Dr. Rasha Yossef Khalil**, Professor of Immunology, Faculty of Medicine, Ain Shams University, for her great help and continuous contributions in the practical part of this work.*

*I wish to express my special thanks to **Professor Dr. Salwa Ibrahim El-Haddad**, Professor of Pathology, Faculty of Medicine, Ain Shams University, to whom I owe many valuable remarks and a lot of precious time and effort.*

*I am also deeply grateful and would like to express my sincere thanks and gratitude to **Dr. Sahar M. Talat**, Lecturer of Pathology, and **Prof. Dr. Ali Hendawy**, Professor of Pathology, Faculty of Medicine, Cairo University, for their great help and continuous contributions in the practical part of this work.*

I would like to express my endless gratitude to my patients, my colleagues and to everyone who participated in a way or another in this work, I owe my thanks and appreciation.

List of tables	--
List of figures	--
Introduction and Aim of the Work	1
Review of Literature	
• Immunoglobulin A and immunophysiology of hepatobiliary system	3
- Introduction	3
- Overview of the immunoglobulin structure	5
- Immunoglobulin A	11
Physiology of the bile and biliary tract	36
Etiology and pathogenesis of acute cholecystitis	62
- Acute calculous cjolrcystitis.....	62
- Acute acalculous cjolrcystitis	71
Cholelithiasis	81
- Pathophysiology of cholesterol gallstone formation	84
- Pathophysiology of pigment gallstone formation	105
Chronic acalculous cholecystitis.	110
Immunological role in the pathogenesis of cholelithiasis & Cholecystitis	113
Patients and Methods	116
Results	127
Discussion	140
Summary and Conclusion	150
Recommendation	153
References	154
Arabic Summary	--

List of Abbreviations

^{99m}Tc -HIDA	:	Technetium hepatoimmunodiacetic acid
ACC	:	Acalculous cholecystitis
AIDS	:	Acquired immunodeficiency syndrome
Anti-HIV	:	Anti-human immunodeficiency virus antibody
APF	:	Anionic polypeptide fraction
ASGP	:	Asialoglycoprotein
ASGPR	:	Asialoglycoprotein receptor
ATPase	:	Adenosine Triphosphatase
B cells	:	B lymphocytes
C region	:	Constant region
C3	:	Complement 3
CABG	:	Concentrated A-bound glycoprotein
CaCO_3	:	Calcium carbonate
CBP	:	Calcium binding protein
CCK	:	Cholecystokinin
CD4	:	Helper T cell
CD8	:	Suppressor T cell
ChCDT	:	Cholesterol crystal detection time
ELISA	:	Enzyme linked immunosorbant assay
ERCP	:	Endoscopic retrograde cholangiopancreatography
Fab	:	Fragment antigen-binding
FC	:	Fragment crystallizable
GB	:	Gallbladder
H Chain	:	Heavy chain
HMG-COA	:	Hydroxymethylglutaryl-COA
Ig	:	Immunoglobulin
KD	:	Kilodalton
L Chain	:	Light chain
mIg	:	Monomeric immunoglobulin
mRNA	:	Messenger ribonucleic acid
N- terminal	:	Amino-terminal
NaCl	:	Sodium chloride
PIg	:	Polymeric immunoglobulin
PIgR	:	Polymeric immunoglobulin receptor
PP	:	Pancreatic polypeptide
SC	:	Secretory component
SIg A	:	Secretory immunoglobulin A
UDPGA	:	Uridine diphosphoglucuronic acid
V region	:	Variable region
VIP	:	Vasoactive intestinal peptide

List of Tables

<i>Table.</i>	<i>Subject</i>	<i>Page</i>
(1)	Comparative statistics of serum IgA in chronic calcular cholecystitis patients (group I) versus normal cut-off point (group 2).	127
(2)	Comparative statistics of serum IgA in chronic non-calcular cholecystitis patients (group I) versus normal cut-off point (group 2).	127
(3)	Comparative statistics of serum IgA in chronic calcular cholecystitis patients (group I) versus chronic non-calcular cholecystitis patients (group 2)	128
(4)	Comparative statistics of bile IgA in chronic calcular cholecystitis patients (group I) versus normal (group 2).	128
(5)	Comparative statistics of bile IgA in chronic non calcular cholecystitis patients (group I) versus normal (group 2).	129
(6)	Comparative statistics of bile IgA in chronic calcular (group I) versus chronic non-calcular cholecystitis patients (group 2).	129
(7)	Correlation between tissue IC (immune complex) deposition and bile IC in chronic calcular cholecystitis patients (group I= chronic calcular cholecystitis with +ve tissue IC) and (group 2 = chronic calcular cholecystitis with -ve tissue IC).	130
(8)	Correlation between tissue IC and bile IC in chronic non calcular cholecystitis patients (group 1 = chronic non calcular cholecystitis with +ve tissue IC) and (group 2 = chronic non calcular cholecystitis with -ve tissue IC).	130
(9)	Comparative statistics of bile IC in chronic calcular cholecystitis (group I) versus non calcular (group 2) cholecystitis patients.	131
(10)	Comparative statistics of IC (immune complex) deposited in gallbladder tissue in calcular (group I) versus non-calcular cholecystitis (group 2).	131

List of Figures

<i>Fig.</i>	<i>Subject</i>	<i>Page</i>
(1)	Serum IgA in normal, chronic calcular and non calcular cholecystitis patients.	132
(2)	Bile IgA in normal, chronic calcular and non calcular cholecystitis patients.	133
(3)	Bile IC (immune complex) in chronic calcular and non calcular cholecystitis patients.	134
(4)	Bile IC and IgA among chronic calcular cholecystitis patients.	135
(5)	Bile IC and IgA among chornic non calcular cholecystitis patients.	136
(6)	Immune complex deposition in chronic calcular and non calcular cholecystitis.	137
(7)	Immune complex deposition in chronic calcular and non calcular cholecystitis patients in correlation with bile IC.	138
(8)	Immune complex deposition in gallbladder epithelium of chronic calcular cholecystitis	139
(9)	Immune complex deposition in gallbladder epithelium of chronic non calcular cholecystitis	139
