***NUTRITIONAL AND PHYSIOLOGICAL
STUDIES ON MEDITERRANEAN FRUIT FLY
Ceratitis capitata (Wied.)***

٤٣.٣
BY

TAREK ABDEL ATY ABDEL HAFIZ

B.SC (ENTOMOLOGY), CAIRO UNIVERSITY
M.SC. (ENTOMOLOGY) CAIRO UNIVERSITY

THESIS

**SUBMITTED FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY**

Under supervision of

* Prof. Dr.

Amina M. Abdel-Rahman

Prof. of insect control

Department of Entomology

Faculty of Science . Cairo University.

* Res. Prof. Dr.

Abdel-Fattah G. Hashem

Prof. of entomology

Horticulture Insect Res. Depart.

PPRI . ARC

**ENTOMOLOGICAL SCIENCE
DEPARTMENT OF ENTOMOLOGY, FACULTY OF
SCIENCE,
CAIRO UNIVERSITY**

1999

Approval Sheet

Title of the Ph.D. Thesis

**NUTRITIONAL AND PHYSIOLOGICAL STUDIES
ON FRUIT Fly *Ceratitis capitata* (Wied).**

Name of Candidate

TAREK ABDEL ATY ABDEL HAFIZ

Submitted to

Faculty of Science, CAIRO UNIVERSITY

Supervision Committee:

Prof. Dr. *Amina M. Abdel-Rahman*

Prof. Dr. *Abdel-Fattah G. Hashem*

Prof. Dr. Safiya Hassan Ahmed

Head of the Department of Entomology

Faculty of Science, Cairo University

1999

ACKNOWLEDGMENT

The author wishes to express his sincere gratitude to prof. Dr. Amina M. Abdel-Rahman, Professor of insect control, Department of Entomology, Faculty of Science, Cairo University, for her supervision, encouragement & her suggestions during the course of this work.

The author also wishes to thank with deep appreciation Prof. Dr. Abdel- Fattah G. Hashem, Prof. of Entomology, Horticulture Insects Res. Department, PPRI, ARC, for his supervision, encouragement, and all his efforts during the course of this work.

In addition, great thanks are also due too my friend Tarek R . Amin, assisst. Res. Insect Physiology Department, PPRI , ARC, for his help, supporting with equipment's and guidance in physiological tests.

Finally, I wish to thank my loving parents for their patience, encouragement and moral support. Special thanks to my wife .

VIII - ARABIC SUMMARY	

LIST OF TABLES

I - Material and Methods tables

Table No.	Page
1 Ingredients of larval diets based on wheat bran	33
2 Ingredients of larval diets based on wheat millfeed	35
3 Ingredients of larval diets based on new bulking agents (artificial sponge & jute)	38
4 Ingredients of larval diets based on wheat bran , jute and artificial sponge , mixed with fresh grinded Guafa	41
5 Ingredients of larval diets based on carrot residues	43
6 Ingredients of larval diets based on different carbohydrate and protein sources to study the enzymatic activity of the desired enzymes	48

II - Results tables

Part 1 Preliminary tests

7 Number of pupae per tray reared as larvae on preliminary diets based on wheat bran	54
8 Number of pupae per ml reared as larvae on preliminary diets based on wheat bran	56
9 Pupal weight reared as larvae on preliminary diets based on wheat bran	57

Table No.		Page
10	Emergence percent of pupae reared as larvae on preliminary diets based on wheat bran	59
11	Sex ratio of adults reared as larvae on preliminary diets based on wheat bran	60
12	Number of pupae per tray reared as larvae on preliminary diets based on wheat millfeed diet	63
13	Number of pupae per ml reared as larvae on preliminary diets based on wheat millfeed	65
14	Weight of pupae reared as larvae on preliminary diets based on wheat millfeed	67
15	Emergence percent of adults reared as larvae on preliminary diets based on wheat millfeed	68
16	Sex ratio of adults reared as larvae on preliminary diets based on wheat millfeed	70

Part 2 New reusable bulking agent in the larval diets

17	Number of pupae per tray reared on diets based on artificial sponge and jute.....	73
18	Number of pupae per ml produced by diets based on artificial sponge and jute	73
19	Weight of pupae reared as larvae on diets based on artificial sponge and jute	74

Table No.		Page
20	Emergence percent of adult flies reared as larvae on diets based on artificial sponge and jute.....	74
21	Sex ratio of flies reared as larvae on diets based on artificial sponge and jute.....	76

Part 3 Improved larval diet by fruit

22	Number of pupae per tray produced by different diets mixed with fruit	76
23	Number of pupae per ml produced by different diets mixed with fruit	78
24	Weight of pupae produced by different diets mixed with fruit	78
25	Emergence percent of adult flies reared as larvae different diets mixed with fruit.....	80
26	Sex ratio of flies reared as larvae different diets mixed with fruit	80

Part 4 Improving larval diet by adding fruit residues

27	Number of pupae per tray produced by larval diets based on fruit residues	82
----	---	----

Table No.	Page
28 Number of pupae per ml produced by larval diets based on fruit residues	82
29 Weight of pupae produced by larval diets based on fruit residues	84
30 Emergence percent of flies produced by larval diets based on fruit residues	84
31 Sex ratio of flies produced by larval diets based on fruit residues	85

Part 5 Evaluation by Competitiveness test

32 Competitiveness test	92
-------------------------------	----

Part 6 Enzymatic analysis

33 GOT enzyme analysis	94
34 GPT enzyme analysis	94
35 Invertase enzyme analysis	98
36 Trehalase enzyme analysis	98
