

***Novel multi-functional finishing of cotton
fabrics to impart high performance properties***

A Thesis
Submitted by

Ghada Mohamed Taha Ibrhaim
(M. Sc. Organic chemistry 2012)

*In the Partial Fulfillment of the Requirements for the
Degree*

of
Doctor of Philosophy (Ph.D)

To
***Chemistry Department
Faculty of Science
Ain Shams University***

2016

Approval Sheet

Ph.D. Thesis

Novel multi-functional finishing of cotton fabrics to impart high performance properties

Submitted by

Ghada Mohamed Taha Ibrahim

This thesis has been approved for submission by
supervisors:

Thesis supervisors

Prof. Dr. Abd El-Gawad M. Rabia

Faculty of Science - Ain Shams University

Prof. Dr. Ekhlas Abd Rabio El Alfy

National Research Centre

Prof. Dr. Manal Kamal El-Bisi

National Research Centre

Dr. Hassan Mohamed Abd El Mohsen Ibrahim

National Research Centre

Approved

Head of Chemistry Department

Prof. Dr: Hamed Ahmed Derbala

ACKNOWLEDGMENTS

*First thanks to **ALLAH** who helps us to fulfill this work.*

*I wish to express my sincere gratitude to **Prof. Dr. Abd El-Gawad Mohamed Rabia**, Professor of organic chemistry, Faculty of Science, Ain Shams University, for his support, enthusiasm, valuable discussion, criticism and keen interest in the present work.*

*I am greatly indebted to **Prof. Ekhlas Abd Rabio El Alfy**, Professor of Textile Chemistry and Technology, National Research Centre, for her direct supervision, her valuable guidance, discussion, advice during the entire work. The author is thanking her effort in writing and revision the thesis.*

*Thanks, appreciation and gratitude are due to **Prof. Dr. Manal Kamal El-Bisi**, Prof. of Textile Chemistry and Technology, Textile Research Division, National Research Centre, for her direct supervision, sound advices, valuable discussion and keen interest throughout the entire work. Indeed,*

her continuous encouragement, keen interest and enthusiasm were behind attaining my endeavour with great confidence.

*I wish to express my warm and sincere thanks and appreciation to **Dr. Hassan Mohamed Abd El Mohsen Ibrahim**, researcher of Textile Chemistry and Technology, Textile Research Division; National Research Centre, for his useful suggestion throughout good advices, and valuable discussion that help me to accomplish my thesis successfully.*

*I would like to thank the **Textile Research Division, National Research Center**, and the faculty of science, Ain Shams University, for all the facilities provided.*

Finally, I would like to thank my family for their love, support, patience and devotion throughout my undergraduate and graduate career.

Ghada mohamed taha

Aim of the work

Part (1): introduction and literature survey

1.1. Cellulose	1
1.2. Chitin and Chitosan	5
1.2.1. Chitin	5
1.2.2. Chitosan	6
1.2.2.1 Chitosan Production	7
1.2.2.2 Chitosan properties	9
1.2.3 Antimicrobial activity	10
1.2.4 Applications of chitosan	13
(A) Antibacterial uses	14
(B) Hydrophobicity	18
1.3. Chitosan nanoparticles	20
1.3.1. Preparation of Chitosan nanoparticles	21
1.3.1.1. Ionic Gelation Method	21
1.3.1.2 Spray drying Method	24
1.3.1.3 Desolvation/Precipitation method	24

1.3.1.4 Covalent Crosslinking	25
1.3.1.5 Micro-emulsion method	26
1.3.1.6 Emulsification solvent diffusion method	27
1.3.1.7 Polyelectrolyte complex (PEC) or Molecular Self-Assembly (MSA)	28
1.3.2. Loading of drug into chitosan nanoparticles	28
1.3.3. Utilization of chitosan nanoparticles (CSNPs)	29
1.3.3.1. Drug Delivery	30
1.3.3.2. Antibacterial activity of chitosan nanoparticles	36
1.4. Process of fabrics	40
1.4.1 Antimicrobial finishing	41
(a) Quaternary Ammonium Compounds (QASs)	43
(b)N-halamines	43
(c) Nanoparticles of Noble Metals and Metal Oxides	44
(D) Chitosan and chitosan derivatives	44
(e)Triclosan	44
(f) Cyclodextrins (CD)	45
1.4.2 Water repellent finishing	45
Part (2): Chitosan nanoparticles loaded antibiotics as Drug Delivery bio material	
Abstract	50

2.1 Introduction	51
2.2. Experimental	54
2.2.1. Materials	55
2.2.2. Methods	56
2.2.2.1. Preparation of chitosan nanoparticles	56
2.2.2.2. Preparation of Antibiotic-loaded chitosan nanoparticles	56
2.2.3. Characterization of Chitosan Nanoparticle and it's loaded	57
2.2.4. Evaluation of Antibacterial Activity in vitro	57
2.2.4.1. Materials	57
2.2.4.2. Test Method	58
2.3 Result and discussion	58
2.3.1. Preparation and characterization of chitosan nanoparticles	58
2.3.1.1. Effect of chitosan concentration on nanoparticle size	60
2.3.1.2. Effect of concentration of sodium tripolyphosphate	63
2.3.2. FT-IR Analysis	66

2.3.3 Antibacterial Activity of chitosan nanoparticles and its loaded antibiotic Part (3): Improvement antimicrobial properties of cotton based fabrics	69
Abstract	74
3.1 Introduction	74
3.2. Experimental	77
3.2.1 Materials	77
3.2.2 Methods	78
3.2.2.1 Preparation of chitosan nanoparticles (CSNPs)	78
3.2.2.2. Preparation of Antibiotic-loaded chitosan nanoparticles:	78
3.2.2.3. Finishing of Fabrics with antibiotic-CSNPs Poly load:	78
3.2.3. Characterizations and antibiotic-CSNPs Poly load its treated fabrics:	79
3.2.4. Evaluation of Antibacterial Activity in vitro	80
3.2.4.1. Materials	80
3.2.4.2. Test method	81
3.3. Result and discussion	82

3.3.1. Physicochemical characterizations of nanoparticles	93
3.3.2 Finishing of COT and COT/PET Fabrics with antibiotic-CSNPs Poly load	91
3.3.3 FTIR Spectroscopy	98
3.3.4. Thermal gravimetric analysis	102
3.3.5. Scanning electron microscope	107
3.3.6. Antibacterial activity	116
Part (4): Super hydrophobic of cotton fabrics via green techniques	
Abstract	130
4.1 Introduction	131
4.2. Experimental	134
4.2.1Materials	134
4.2.2. Methods	135
4.2.2.1 Preparation of chitosan nanoparticles	135
4.2.2.2 preparations of bee's wax/chitosan and nano-chitosan emulsion	135
4.2.2.3. Preparation of silica nanoparticle	135
4.2.2.4 Treatment of fabrics with bee's wax/chitosan emulsion/silica nanoparticle	136
4.2.2.5 Measurement and analysis	136

4.2.2.5.1 Transmission electron microscope (TEM)	136
4.2.2.5.2. Contact angle	136
4.2.2.5.3. FT-IR	137
4.2.2.5.4. Antimicrobial Activity in vitro	137
4.2.2.5.4.1 Test method	137
4.2.2.5.5 Scanning electron microscopy (SEM)	138
4.2.2.5.6. Energy Dispersive X-ray photoelectron spectroscopy (EDX)	138
4.2.2.5.7. Tensile strength	138
4.2.2.5.8. Water permeability	138
4.2.2.5.9. Air permeability	139
4.2.2.5.10. Surface Roughness	139
4.2.2.5.11 Thermal gravimetric analysis	139
4.3 Result and discussion	139
4.3.1 Bee's wax concentration	140
4.3.1.1. Effect of bee's concentration on the Roughness and the contact angle	140
4.3.1.2 Effect of bee's wax on antibacterial activity	143
4.3.1.3 Effect of concentration of bee's wax of chitosan/ bee's wax emulsion on physical and mechanical properties	144
4.3.2 Effect of chitosan concentration	146

4.3.2.1 Effect of chitosan concentration on the roughness and the contact angle	146
4.3.2.2 Effect of chitosan concentration on antibacterial activity	149
4.3.2.3 Effect of chitosan concentration of chitosan/ bee's wax, nano-chitosan/ bee's wax emulsion on physical and mechanical properties	151
4.3.3 Characterization of Nano silica	153
4.3.3.1 TEM of silica Nanoparticle	154
4.3.3.2 FTIR of silica nano particle	155
4.3.4 Scanning electron microscope of treated fabrics	157
4.3.5 Energy-dispersive X-ray spectroscopy	163
4.3.6 FTIR	166
4.3.7 Thermal gravimetric analysis	170
