Recent trends in evaluation and treatment of orbitozygomatic fracture

Thesis

Submitted for completing of master degree in

General surgery by

Kamal Mohammed Qasem AL-Shaibah

(M.B., B.Ch.)

Supervisors

Dr. Maamoun Ismail Maamoun

Professor of General and plastic surgery

Faculty of medicine

Cairo University

Dr. Tarek Ahmed Amer

Assistant Professor of General and plastic surgery

Faculty of medicine

Cairo University

2010

Abstract

If accurate reduction cannot be achieved further visualization of the zygomaticomaxillary buttress is performed. Confirmation of reduction of markedly displaced orbitozygomatic fractures was performed by visualization all the anterior buttresses and the sphenozygomatic suture which was the most important reference point for adequate reduction.

Key word

Treatment

Orbitozygomatic

Evaluation

Acknowledgment

First and foremost I feel always indebted to Allah the most kind and merciful.

I would like to express my gratitude to. Prof. Dr. **Maamoun Ismail Maamoun**. Professor of general and plastic surgery faculty of medicine – Cairo University, who honored me by his supervision and continuous help. I can never thank him for his patience, advice and continuous guidance. He was always our professor who taught us how to work hardly and to be; cooperative, successful. He taught us a lot not in work but also in life.

I am greatly honored to express my deep respect and gratitude to Dr. **Tarek Ahmed Amer**. assistant professor of general and plastic surgery – faculty of medicine – Cairo University for his faithful supervision, understanding, help and encouragement in initiating and completing this work.

I am so much obliged to Dr. **Ashraf Abolfotooh Mohammed**. lecturer of general and plastic surgery- faculty of medicine – Cairo University for his continuous guidance and valuable advises throughout this work. I am much grateful for his great help and support throughout all steps of this work.

My deepest thanks to Dr. **wasam whadan**, assistant *Lecturer of Plastic & General Surgery, Cairo University* for his generous help, constant encouragement & continuous support without which this work could not have been completed.

Dedication

*To my family especially my parents
and lovely wife.*
