# **Evaluation of the column agglutination technology for ABO grouping and D typing**

B5719

*Thesis by*

**Nermine Mohamed Abd Elhadi Alsheikh**  
M.B.B.CH Ain Shams University  
Dec.1996

*[Signature]*  
*[Signature]*  
*[Signature]*

Submitted for partial fulfillment of M.Sc degree in  
Clinical and Chemical Pathology

*Under supervision of*

**Prof. Dr. Salwa Mohamed Yousif**  
Professor of clinical and chemical pathology  
Ain Shams University

**Dr. Manal Hashim Fayek**  
Assistant professor of clinical and chemical pathology  
Ain Shams University

**Dr. Sahar Samir Abd Elmaksoud**  
Lecturer of clinical and chemical pathology  
Ain Shams University

Faculty of Medicine

## **ACKNOWLEDGMENT**

*First of all, thanks to god, to whom I relate any success in my life.*

*I wish to express my deepest gratitude to Prof. Dr. Salwa Mohammed Yousif, Professor of Clinical & Chemical Pathology, Ain Shams University, for her great help and supervision.*

*Also, my deepest appreciation to Dr. Manal Hashim Fayek, Assistant Professor of Clinical & Chemical Pathology, Ain Shams University, for her sincere encouragement and advise throughout the work.*

*Also, I am grateful to Dr. Sahar Samir Abd Elmaksoud, Lecturer of Clinical & Chemical Pathology, Ain Shams University, for her support, valuable comments and guidance throughout this work.*

*I cannot forget the kindness I met in the Quality Control Unit of The National Blood Transfusion Center, headed by Prof. Dr. Ola Abd Elhakim.*

*Also, my greatest appreciation to Dr. Janett Kamel, Head of the Blood Grouping Lab. in The Egyptian Organization for Biological Products & Vaccines.*

*Lastly, I would never forget to express my deepest gratitude and love to my family for their kind patience, great support and encouragement.*

# **LIST OF CONTENTS**

*Page no.*

• Introduction.....	1
• Aim of the work.....	2
• Review of literature.	
<b>Chapter I: Red blood cell antigens.....</b>	<b>3</b>
<b>Chapter II: Methods of testing for blood group.....</b>	<b>30</b>
antigens & antibodies	
<b>Chapter III: Column agglutination technology....</b>	<b>50</b>
• Materials & methods.....	62
• Results.....	69
• Discussion.....	74
• Conclusion.....	78
• Summary.....	80
• References.....	81

## **LIST OF TABLES**

<b><i>Table No.</i></b>	<b><i>Page</i></b>
Table (1) : The blood group systems, the genes that encode.....4 them, and their chromosomal location.	4
Table (2) : ABO system.....5	5
Table (3) : Frequency of ABO Blood groups (England).....5	5
Table (4) : Blood group enzymes: ABO and Lewis systems.....6	6
Table (5) : The Rh system antigens.....20	20
Table (6) : The Rh system: gene complexes and phenotype....21 frequencies.	21
Table (7) : ABO grouping.....31	31
Table (8) : Genotypes of the red cells to use as controls for....39 Rh grouping sera.	39
Table (9) : Red cell antibodies in pre-transfusion testing.....44	44
Table(10): Identification of unknown antibody using a panel...48 of red cells of known genotype.	48
Table(11): Summery for the steps of ABO grouping & D.....65 Typing by Column agglutination technology.	65
Table(12): Results of ABO grouping by tube technique (TT)..70 and column agglutination technique (CAT).	70
Table(13): Results of D typing & D <sub>u</sub> testing by tube.....70 technique (TT) and column agglutination technique (CAT).	70

## **LIST OF FIGURES**

<i><b>Figure No.</b></i>	<i><b>Page</b></i>
Fig.1 : Biochemical pathways for the synthesis of H, A, B, Le, Ale, and BLe structures on type I Chains in glycoproteins & glycolipids.	7
Fig.2: Biochemical structures of the immunodominant oligosaccharides of the A, B, and H antigens.	9
Fig.3 :cDNA structures & amino acid sequence of the A, B, and related glycosyltransferases.	11
Fig.4 : cDNA structure & amino acid sequences of the O alleles of the A and B transferases.	12
Fig.5 : (A) Structure of the RhD and RhCE proteins. (B) Examples of the genetic basis of variant Rh genes.	22
Fig.6 : A layout for tube grouping test.	34
Fig.7 : Microplate layout for ABO and Rh (D) grouping	36
Fig.8 : Cassette description from front side.	56
Fig.9 : Cassette description from back side.	57
Fig.10: Column description.	57
Fig.11: Description of the incubator.	58
Fig.12: Centrifuge description.	59
Fig.13: Age distribution among blood donors.	63
Fig.14: Sex distribution among blood donors.	63
Fig.15: Monoclonal Anti-A/ Anti-B/ Anti-D/ control/ reverse/diluent card.	64
Fig.16: Grading of the reaction pattern in CAT	65
Fig.17: Polyspecific anti IgG cassette.	67
Fig.18: Results of ABO grouping by tube technique (TT) and column agglutination technique (CAT).	71
Fig.19: Percentages of ABO blood groups by tube and column agglutination techniques.	71
Fig.20: Results of D typing by tube technique (TT) and column agglutination technique (CAT).	72
Fig.21: Results of D <sub>b</sub> testing by tube technique (TT) and column agglutination technique (CAT).	73
