**STUDIES ON INSECT PREDATORS AND
SPIDERS IN SUGAR BEET FIELDS
AT KAFR EL-SHEIKH REGION**

By

Kamal Gaber Ibrahim Bazazo

*B.Sc. Economic Entomology, Faculty of Agriculture,
Kafr El-Sheikh, Tanta University, 1996*

THESIS

**Submitted in Partial Fulfillment
of the Requirements for the Degree**

of

MASTER OF SCIENCE

In

ECONOMIC ENTOMOLOGY

Department of Economic Entomology

Faculty of Agriculture,

Kafr El-Sheikh

Tanta University

2005

Approval Sheet

**Title of Thesis: Studies on Insect Predators and Spiders in
Sugar Beet Fields at Kafr El-Sheikh Region**

The name : Kamal Gaber Ibrahim Bazazo

This Thesis has been approved by:

Prof. Dr. S. S. Awad

Prof. Dr. I. I. Hesbol

Prof. Dr. A. B. B. B.

(Committee in Charge)

Date: 16/11/2005

SUPERVISORS COMMITTEE

Prof. Dr. Shawky M. Ibrahim Metwally

*Economic Entomology Department, Faculty of Agriculture,
Kafr El-Sheikh, Tanta University*

Prof. Dr. Ibrahim Ibrahim Mesbah

*Economic Entomology Department, Faculty of Agriculture,
Kafr El-Sheikh, Tanta University*

Prof. Dr. Ahmed M. Bassyouni Abo-Saied Ahmed

*Plant Protection Department, Sugar Crops Research Institute,
Agricultural Research Center*

Name of Student : Kamal Gaber Ibrahim Bazazo

Degree : M.Sc. in Economic Entomology

Title of Thesis : Studies on Insect Predators and Spiders in
Sugar Beet Fields at Kafr El-Sheikh Region.

ACKNOWLEDGMENT

This study was carried out under the auspices of Economic Entomology Department, Faculty of Agriculture, Kafr El-sheikh, Tanta University and Sugar Crops Research Institute, Agricultural Research Center (ARC), Cairo.

The author wishes to express sincere thanks and deep gratitude to late **Prof. Dr. Shawky M.I. Metwally**, Economic Entomology Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University, for suggesting the problem and planning the current study.

The author is also grateful to **Prof. Dr. Ibrahim I. Mesbah**, Economic Entomology Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University, for sincere guidance and keen revision of the manuscript.

Many thanks are extended to **Prof. Dr. Ahmed M.B. Abo-Saied Ahmed**, Head of Plant Protection Department, Sugar Crops Research Institute, ARC, for providing facilities and sincere guidance during the course of study.

Sincere appreciation is due to **Prof. Dr. Ramzy Sherif**, Head of Entomology Department, Rice Research and Training Center, ARC, for sincere help and valuable comments on the manuscript.

The author would like to express much appreciation to the following arthropod systematics for keen help in identifying specimens: **Prof. Dr. Alberto Barrion**, Spider Systematic, International Rice Research Institute (IRRI), the Philippines., **Dr. Ahmed, S. Hendawy**, **Dr. Salah El-Azab**, **Dr. Ashraf Torky** and other staff members of Systematic Laboratory, Plant Protection Research Institute, ARC.

Appreciation is also extended to **Prof. Dr. Ahmed Abo-Douh**, Director of Sugar Crops Research Institute, ARC, for support and facilities offered for experiments. Thanks to **Dr. Gamal A. Shalaby**, same Institute for kind help in field and laboratory experiments.

Deep thanks are extended to all staff members of Economic Entomology Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University, and all staff members of Sugar Crops Research Department, Sakha Agricultural Research Station, ARC, for their sincere advices during the study.

CONTENTS

INTRODUCTION	1
REVIEW OF LITERATURE	3
1. Insect pest status in sugar beet fields.	3
2. Survey of insect predators in sugar beet fields in Egypt.	4
3. Insect predator status in sugar beet fields.....	4
4. Survey of spiders in sugar beet fields allover the world.....	6
5. Spider status in sugar beet fields.....	6
5.1. Allover the world	6
5.2. In Egypt	8
6. Some factors affecting populations of insect predators and spiders in arable fields.....	8
6.1. Application of organic matter and mulch.....	8
6.2. Undisturbed field Margins	12
6.3. Retaining some weeds	13
6.4. Pesticides	16
7. Predation efficiency of spiders on insects	18
MATERIALS AND METHODS	20
Description of the experimental site.....	20
1. Survey of insect pests, insect predators and spiders	20
1.1. Pit-fall trap	20
1.2. Vacuum machine (D-vac).....	21
1.3. Sweep net.....	22
1.4. Leaf-litter	22
1.5. Tullgren funnel	23
1.6. Water pan trap.....	24
2. Population fluctuation of insect predators and spiders.....	25
3. Some factors affecting populations of insect predators and spiders in sugar beet fields.....	25
3.1. Application of farmyard manure	25
3.2. Undisturbed field margins.....	26
3.3. Retaining borders of weeds	27
3.4. Insecticides	27

4. Predation of the philodromid, <i>Thanatus albini</i> (Audouin) upon some sugar beet insect pests.	28
4.1. A preliminary test.....	28
4.2. Feeding preference	29

RESULTS AND DISCUSSION..... 30

1. Survey of insect pests occurring in sugar beet fields	30
2. Survey of insect predators occurring in sugar beet fields.....	32
3. Population fluctuation of insect predators inhabiting sugar beet fields.....	37
3.1. Using pit-fall traps.....	37
3.2. Using D-vac machine	44
4. Survey of spiders occurring in sugar beet fields	49
5. Population fluctuation of spider families inhabiting sugar beet fields as monitored by pit-fall traps.....	54
5.1. First plantation (mid-August).....	55
5.2. Second plantation (mid-September).....	57
5.3. Third plantation (mid-October).....	60
5.4. A comparison of spider family occurrence among three sugar beet plantations using pit-fall traps	66
6. Population fluctuation of the major spider species as monitored by pit-fall traps	68
6.1. First plantation (mid-August).....	68
6.1.1. <i>Pardosa</i> spp.	68
6.1.2. <i>Lycorma ferox</i>	71
6.1.3. <i>Thanatus albini</i>	72
6.2. Second plantation (mid-September).....	73
6.2.1. <i>Pardosa</i> spp.	73
6.2.2. <i>Lycorma ferox</i>	73
6.2.3. <i>Thanatus albini</i>	73
6.3. Third plantation (mid-October).....	76
6.3.1. <i>Pardosa</i> spp.	76
6.3.2. <i>Lycorma ferox</i>	76
6.3.3. <i>Thanatus albini</i>	79
6.4. A comparison of spider species occurrence among three sugar beet plantations using pit-fall traps	79
7. Population fluctuation of spider families inhabiting sugar beet fields as monitored by D-vac machine	82
