## This thesis is dedicated to my parents and my husband

#### **ACKNOWLEDGMENT**

The author wishes to express her sincere appreciation to those who have given their time and efforts to make this work possible.

Deep gratitude is expressed to **Prof. Dr. S. H. Hassanien** Professor of Genetics, Ain Shams University for suggesting the theme of this study, supervision, reading the manuscript and for continuous help and encouragement.

Thanks are also due to **Dr. A. Bahieldin**, Associate Professor of Genetics for supervision and for his follow up of each step of this study and also for encouragement and full support.

The author is also indebted to **Dr. F. M. El- Domyati**, Electurer of Genetic, for supervision and for his ever ready help and generous support.

The help by my colleagues at the Molecular Cytogenetics Laboratory, especially **Mr. S. Edrees**, is invaluable and highly appreciated.

Thanks also to all members of Ain Shams Center of Genetic Engineering and Biotechnology ( ACGEB ) headed by **Prof. Dr. A. Z. E. Abdel Salam,** for their faithful help during all stages of my study.

Part of the facilities for the present study was kindly offered by the Agricultural Genetic Engineering Research Institute (AGERI) headed by **Prof. Dr. M Madkour**, to whom the author is much indebted.

I would like to put on record my great appreciation and gratitude to all staff at the Department of Genetics, Ain Shams University, who have contributed much to my scientific background through course work and consultations and to whom the author would always be thankful and grateful.

Last but not least, wish to express my deepest thanks to my parents, brother and husband for their love, care, patience and continuous support.
