

**Hepatic and Cardiac Function Assessment
in**

Children following Liver Transplantation

Thesis submitted for partial fulfillment of Doctorate Degree

*in
Pediatrics*

By

Salwa Amin Abd El-Hamid

Assistant lecturer of pediatrics

Under Supervision of

Prof. Dr. Tawhida Yassin Abdel-Ghaffar

Professor of Pediatrics

Faculty of Medicine– Ain Shams University

Prof. Dr. Nevin Mohamed Mamdouh Habeeb

Professor of Pediatrics

Faculty of Medicine– Ain Shams University

Prof. Dr. Azza Mohamed Youssef

Professor of Pediatrics

Faculty of Medicine– Ain Shams University

Prof. Dr. Nedal Hegazy

Professor of Pathology

Faculty of Medicine– Ain Shams University

Dr. Mohammad Saad Eldin Eladawy

Assistant Professor of Pediatrics

Faculty of Medicine– Ain Shams University

Faculty of Medicine

Ain Shams University

2018

First and foremost, all thanks and gratefulness to "ALLAH", the most beneficial and merciful.

*It is a great honor to me to express my deepest gratitude and appreciation to **Prof. Dr. Tawhida Yassin** professor of Pediatrics, Faculty of Medicine, Ain Shams University for her continuous supervision, fruitful guidance and generous support. Indeed, this work would not be accomplished without her efforts and advice.*

*I am deeply grateful and forever indebted to **Dr. Nevine Mamdouh**, professor of Pediatrics, Faculty of Medicine, Ain Shams University, for her valuable effort, supervision and guidance.*

*I am also delighted to express my deepest gratitude and thanks to **Dr. Azza yousef**, professor of pediatrics, for her continuous supervision, valuable instructions, constant help and great assistance throughout this work.*

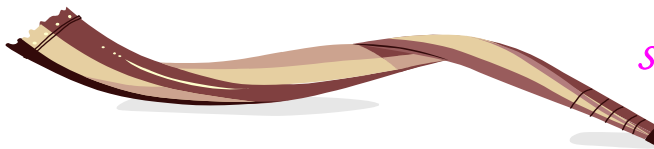

*I am deeply thankful to **Prof. Nedal Hegazy**, Professor of Pathology for her kindness, supervision and cooperation in this work.*

*I would like to express my hearty thanks to **Dr. Mohamed El adawy**, assistant professor of pediatrics, for his support, continuous encouragement and assistance till this work was completed.*

Special thanks to all workers in Dr. Yassin Abd el – ghaffar Center for Liver Disease & Research who helped me in this work,

My special thanks to all my patients and their parents who agreed to share in this study. I'm thankful to them for their effort, time and cooperation.

Last but not least, I would like to express my endless gratitude to my family especially my father, mother, brothers and husband for their support.

Salwa Amin Abd El-Hamid.

CONTENTS

Contents	I
List of Abbreviations	II
List of Tables	IV
List of Figures	VIII
Introduction	1
Aim of the work	4
Review of literature	5
Patients and methods	55
Statistical analysis	63
Results	65
Discussion	98
Summary	110
conclusions	112
Recommendations	113
References	114
Arabic Summary	

List of abbreviations

AMR	Antibody -Mediated Rejection
ANP	Atrial Natriuretic Peptide
BMI	Body Mass Index
BNP	B-Type Natriuretic Peptide
CACS	Coronary Artery Calcification Score
CAD	Coronary Artery Disease
CMV	Cytomegalovirus
CNI	Calcineurin Inhibitor
CR	Chronic Rejection
CT	Computed Tomography
CTP	Child-Turcotte-Pugh
DNP	Dendroaspis Natriuretic Peptide
<i>E/e'</i>	Ratio Of MV E Vmax/ Tissue Doppler Early Myocardial Relaxation Velocity.
EBV	Epstein-Barr Virus
ECG	Electrocardiography
ESLD	End-Stage Liver Diseases
FKBP-12	FK Binding Protein-12
GLS-A2C	Global Strain At Apical Two Chambers View.
GLS-A3C	Global Strain Long Axis View
GLS-A4C	Global Strain At Apical Four Chambers View
HBV	Hepatitis B Virus
HCV	Hepatitis C Virus
HSV	Herpes Simplex Virus
IFN	Interferon
IL	Interleukin

IQR	Inter-Quartile Range
LDLT	Living Donor Liver Transplantation
LT	Liver Transplantation
LV	Left Ventricle
LVEDD	Left Ventricular End Diastolic Diameter.
MELD	Model For End Stage Liver Disease
MHC	Major Histocompatibility Complex
MMF	Mycophenolate Mofetil
MRCP	Magnetic Resonance Cholangio-Pancreatography
MRI	Magnetic Resonance Imaging
ms	millisecond
NAFLD	Non-Alcoholic Fatty Liver Disease
NT ProBNP	N Terminal Pro B Type Natriuretic Peptide
OA	Obliterative Arteriopathy
OKT3	Muromonab
PELD	Pediatric End Stage Liver Disease.
PFIC	Progressive Intrahepatic Cholestasis
PLT	Pediatric Liver Transplantation
PSC	Primary Sclerosing Cholangitis
QTc	Corrected QT
RAI	Rejection Activity Index
RBC	Red Blood Cells
RVSP	Right Ventricular Systolic Pressure
SBP	Spontaneous Bacterial Peritonitis
SD	Standard Deviation
SNS	Sympathetic Nervous System
TGF	Tumor Growth Factor

TNF	Tumor Necrosis Factor
<i>UNOS</i>	United Network For Organ Sharing
UW	University Of Wisconsin
WBC	White Blood Cell

List of Tables

Table	Title	Page
Table (1)	Child-Turcotte Pugh scoring system	1 6
Table (2)	RAI for Grading of acute liver allograft rejection	3 2
Table (3)	Grading of acute liver allograft rejection–Banff Criteria	3 3
Table (4)	Demographic data of patients and donors	6 6
Table (5)	Original disease of the studied patients	6 7
Table (6)	Pretransplantation liver disease severity Child score (n=21) & PELD score of the studied cases (n=15)	6 7
Table (7)	Blood group of the studied patients	6 8
Table (8)	Matched or compatible blood groups of donors and recipients	6 8
Table (9)	Body mass index of the studied group at time of the study	6 9
Table (10)	Lipid profile of the studied group at time of the study	6 9

Table (11)	Postoperative surgical complications and its time of incidence in relation to the operation	7 1
Table (12)	Biopsy finding of the studied group	7 2
Table (13)	Biopsy diagnosis of the studied group	7 2
Table (14)	Scoring of acute rejection of liver biopsy among the studied cases	7 3
Table(15)	Grading of chronic rejection in liver biopsy among the studied cases	7 3
Table(16)	C4d staining finding in the biopsies:	7 3
Table (17)	Viral markers of the studied group during the follow up period	7 5
Table (18)	Laboratory investigations of the studied group during the period of follow up	7 6
Table (19)	ECG findings in the study group	7 7
Table (20)	NT-ProBNP and creatinine clearance in the studied patients (quantitative values)	7 7

Table (21)	NT-ProBNP, creatinine clearance and blood pressure in the studied patients (qualitative data)	7 8
Table (22)	Echocardiography parameters among study group	7 9
Table (23)	Relation between age difference between donor & recipient and postoperative surgical complications	8 1
Table (24)	Relation between fibrosis in liver biopsy & laboratory findings among studied group	8 2
Table(25)	Relation between fibrosis and viral infection during the period of follow up	8 3
Table(26)	Relation between Fibrosis in liver biopsy with blood group and postoperative surgical complications	8 3
Table (27)	Relation between fibrosis and age of donor and recipient and age difference between them at transplantation	8 4
Table	Relation between fibrosis and acute	8

(28)	and chronic rejection	5
Table (29)	Relation between acute rejection and blood group	8 5
Table (30)	Relation between acute rejection and age of donor, age of recipient at time of transplantation and mean age difference between them	8 6
Table (31)	Relation between acute rejection and laboratory finding at the same time	8 7
Table (32)	Correlation between chronic rejection and donor age, recipient age, donor recipient age difference and donor recipient sex mismatching	8 8
Table(33)	Correlation between NT-ProBNP level and echocardiography parameters	8 9
Table (34)	Relation between NT-ProBNP and associated cardiac lesion & intrapulmonary venous dilatation at time of sample collection	9 1
Table(35)	Correlation between NT-proBNP and donor recipient sex mismatch and interval between transplantation and	9 1

	time of study	
Table (36)	Correlation between NT-ProBNP and creatinine clearance	9 2
Table(37)	Echocardiography findings in relation to NT-ProBNP levels	9 3
Table (38)	Correlation between creatinine clearance and frequency of tacrolimus level spikes & interval between transplantation and time of the study	9 4
Table(39)	Correlation of tacrolimus average level with corrected QT interval	9 4
Table(40)	Correlation between QTc and donor recipient sex mismatch and interval between transplantation and time of study	9 5
Table (41)	Correlation between BMI and echocardiography parameters	9 5
Table(42)	Correlation between lipid profile and echocardiography parameters	9 6
