**THE USE OF NON-HORMONAL GROWTH ENHANCES
WITH DIFFERENT NUTRITIONAL LEVELS FOR
GROWING FRIESIAN CALVES UNTIL SLAUGHTER**

BY

ASHRAF ALI MEHANY ISMAIL

B. Sc. Agric., (Animal Production), Ain Shams Univ. 1992

A thesis submitted in partial fulfillment

of

the requirement for the degree of

MASTER OF SCIENCE

in

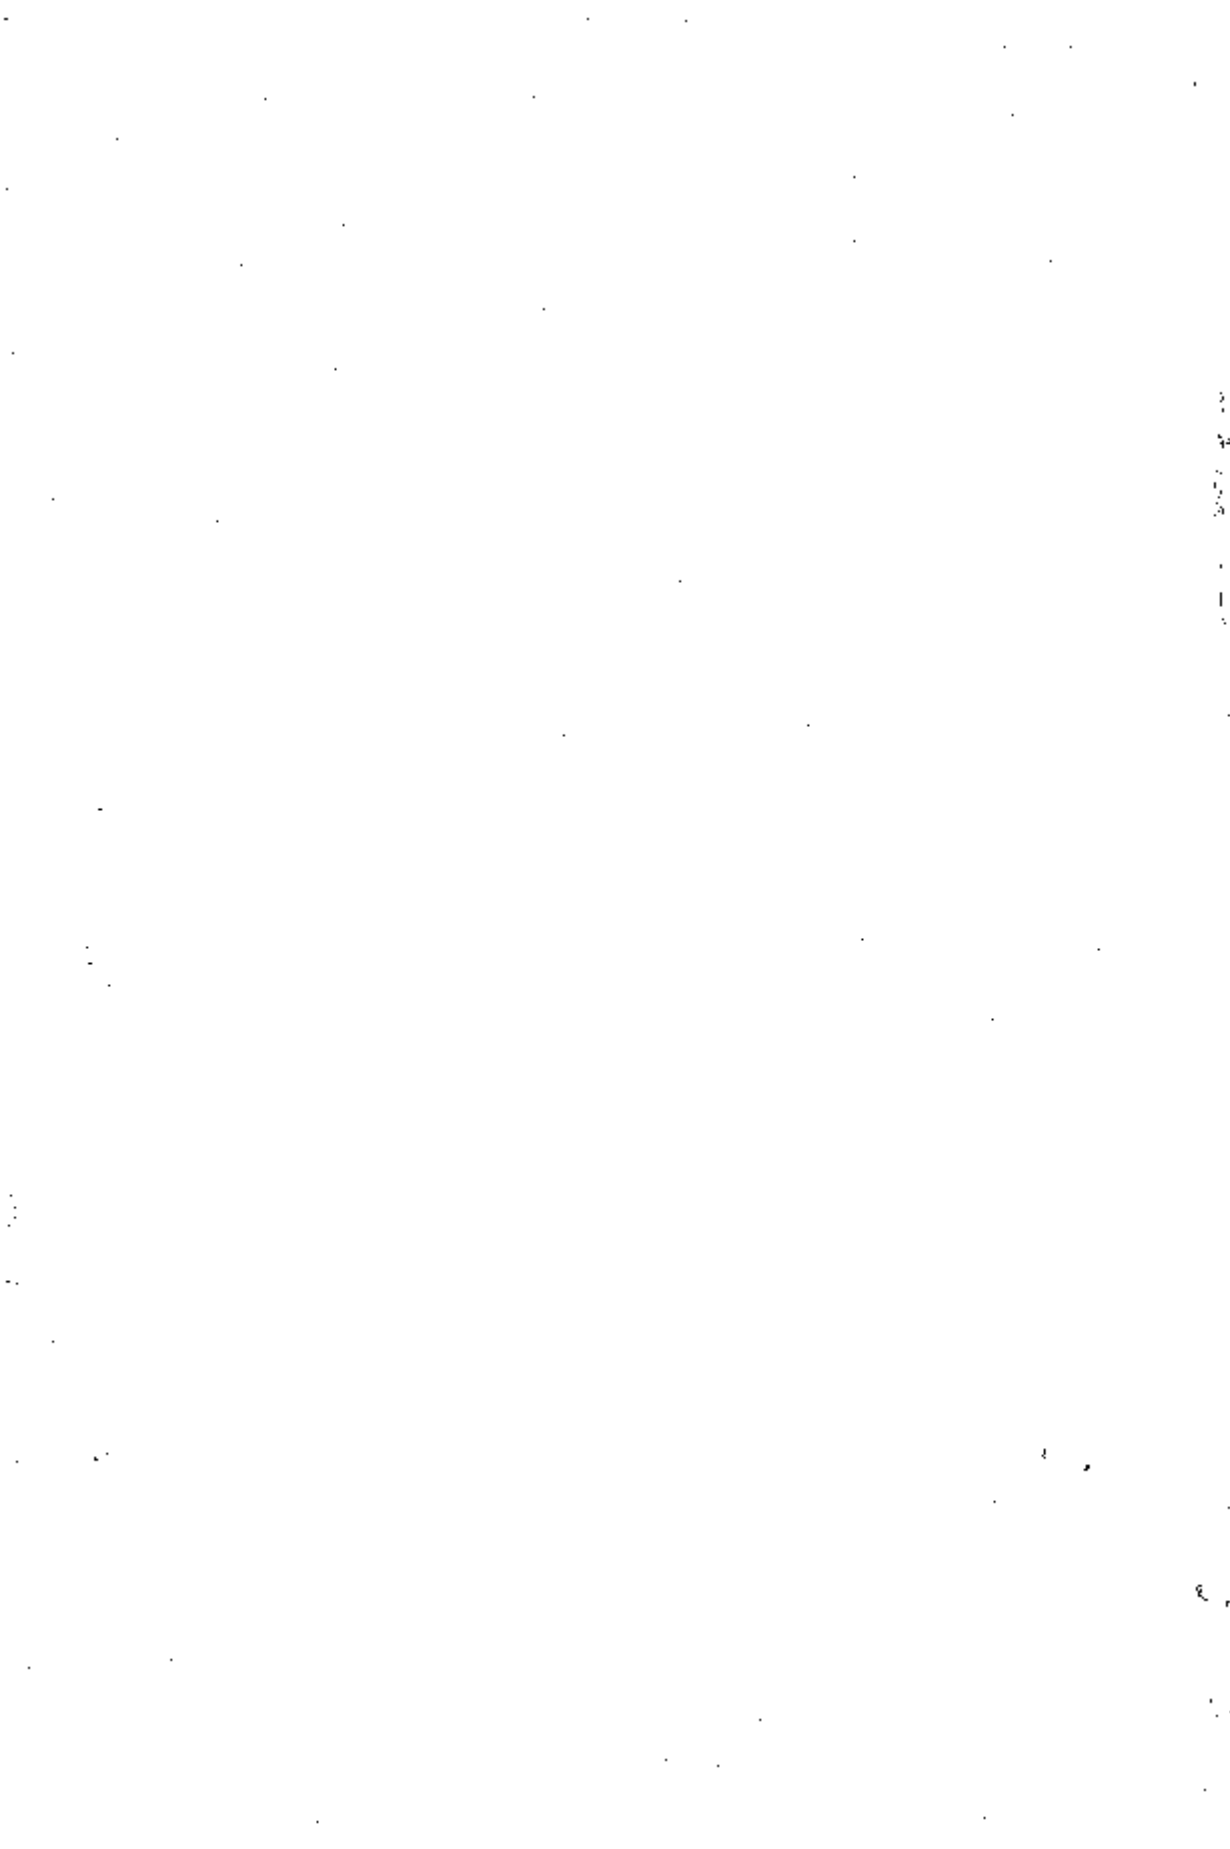

**Agricultural Science
(Animal Nutrition)**

Department of Animal Production

Faculty of Agriculture

Ain Shams University

2000

APPROVAL SHEET

THE USE OF NON-HORMONAL GROWTH ENHANCERS
WITH DIFFERENT NUTRITIONAL LEVELS FOR
GROWING FRIESIAN CALVES UNTIL SLAUGHTER
BY

ASHRAF ALI MEHANY ISMAIL

B. Sc. Agric., (Animal Production), Ain Shams Univ. 1992

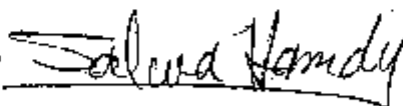

This thesis for M. Sc. Degree has been approved by:

Prof. Dr. S.A. Mahmoud

Prof. of Animal Nutrition

Prof. Dr. S. Hamdy

Prof. of Animal Nutrition

Prof. Dr. H.M. Khattab

Prof. of Animal Nutrition

Date of examination 24/11/1999.

**THE USE OF NON-HORMONAL GROWTH ENHANCES
WITH DIFFERENT NUTRITIONAL LEVELS FOR
GROWING FRIESIAN CALVES UNTIL SLAUGHTER**

BY

ASHRAF ALI MEHANY ISMAIL

B. Sc. Agric., (Animal Production), Ain Shams Univ. 1992

Under the supervision of

Prof. Dr. H.M. Khattab

Prof. of Animal Nutrition, Faculty of Agriculture, Ain Shams
University

Prof. Dr. H.A. El-Kousy

Prof. of Animal Production Research Institute

Dr. H.M. El-Sayed

Assistant Prof. of Animal Nutrition, Faculty of Agriculture, Ain
Shams University

CONTENTS

	Page
I. INTRODUCTION.	1
II. REVIEW OF LITERATURE.	2
Nutritional factors affecting growth rate	
2.1. Energy level	2
2.2. Protein level	3
2.3. Concentrate : Roughage ratio	4
2.4. Minerals	5
2.5. Vitamins	5
2.6. Growth promoters	6
2.7. Performance of animals fed non-hormonal growth promoters	9
III. MATERIALS AND METHODS.	28
3.1- Experimental animals and the schemed treatment	28
3.2- Live yeast and lacto-sacc structure	29
3.3- Rations and feedstuffs	29
3.4- Management and feeding schedule	30
3.5- Digestibility trails	30
3.6- Rumen fluid sampling	31
3.7- Blood sampling	31
3.8- Analytical methods	32
3.9- Statistical analysis	33
IV. RESULTS AND DISCUSSION	34
4.1- Feed intake	34
4.1-1- Effect of treatments	34
4.1-2- Effect of periods	34
4.2- Digestibility	35
4.2-1- Effect of treatments	35
4.2-2- Effect of periods	43

4.3- Ruminant parameters	44
4.3-1- Ruminant Ph	44
4.3-1-2- Effect of periods	50
4.3-2- Ruminant NH_3	50
4.3-2-1- Effect of treatments	50
4.3-2-2- Effect of periods	56
4.3-3- Ruminant TVFA'S	70
4.3-3-1- Effect of treatments	70
4.3-3-2- Effect of periods	70
4.3-4- Ruminant TN	70
4.3-4-1- Effect of treatments	70
4.3-4-2- Effect of periods	70
4.3-5- Ruminant NPN	70
4.3-5-1- Effect of treatments	70
4.3-5-2- Effect of periods	70
4.3-6- Ruminant TP	70
4.3-6-1- Effect of treatments	70
4.3-6-2- Effect of periods	75
4.4- Parameters plasma	75
4.4-1- Effect of treatments	75
4.4-2- Effect of periods	82
4.5- Daily gain and Abs. gain	82
4.5-1- Effect of treatments	88
4.5-2- Effect of periods	82
4.6- Economical efficiency	82
4.6-1- Effect of treatments	88
4.6-2- Effect of periods	93
V. SUMMARY.	96
VI. REFERENCES.	112
VII. Appendix	123
ARABIC SUMMARY.	

LIST OF TABLES

	Page
(1): Effect of AO and SC on DMI and total digestibility in steers.	16
(2): Effect of monensin on steady-state ruminal fluid characteristics in cows (n = 2) fed different proportions of timothy : alfalfa hays .	21
(3) Effects of live yeast culture and mixed microbial supplements on the concentrations of TVFA and specific bacteria in the rumens of steers fed high-roughage ration	22
(4) Effect of yeast culture (YC) on ruminal fermentation characteristics.	23
(5) Effect of live yeast fed to steers on rumen fluid parameters. (Adapted from Mir <i>et al.</i> , 1994).	24
(6) Effect of 2 g/d of <i>Saccharomyces cerevisiae</i> NCYC 240, NCYC 1026, and Yea-Sacc on mean pH, volatile fatty acid, L-lactic acid, ammonia concentrations, and microbial numbers in and liquid dilution from the rumen of sheep fed a mixed forage concentrate diet	26
(7): Chemical composition of the concentrate feed mixture, Berseem hay, Rice straw and Berseem.	29
(8): Nutrient requirements for growing and finishing cattle (nutrient concentration in diet, dry matter, avoidupois system).	30
(9): Effect of treatments on feed intake.	36
(10): Effect of periods on feed intake.	38

LIST OF TABLES

	Page
(11): Effect of treatments on nutrients digestibility.	40
(12): Effect of periods on nutrients digestibility.	45
(13): Effect of treatments on ruminal pH.	47
(14): Effect of periods on ruminal pH.	51
(15): Effect of treatments on ruminal NH_3 .	53
(16): Effect of periods on ruminal NH_3 .	57
(17): Effect of treatments on ruminal TN.	59
(18): Effect of periods on ruminal TN.	61
(19): Effect of treatments on ruminal NPN.	63
(20): Effect of periods on ruminal NPN.	65
(21): Effect of treatments on ruminal TP.	67
(22): Effect of periods on ruminal TP.	71
(23): Effect of treatments on ruminal TVFA.	73
(24): Effect of periods on ruminal TVFA.	76
(25): Effect of treatments on parameter plasma.	78
(26): Effect of periods on parameter plasma.	83
(27): Effect of treatments on experimental animals performance, dry matter, daily gain, economical efficiency.	85
(28): Effect of periods on experimental animals performance, dry matter, daily gain, economical efficiency.	89
