**STUDY OF CHANGES OF SEX HORMONES
AND SEXUAL FUNCTIONS IN A SAMPLE
OF EGYPTIAN MALE EPILEPTICS**

Thesis

**Submitted in Partial Fulfillment for
The M.D. Degree of
Neurology**

By :

Ayman Abd Allah Mahfooz El-Azooony
M.B., B. Ch. & M.Sc.

Supervised By

Prof. Dr. Mohamed Anwar El-Etribi

*Professor & Chairman of Neurology Unit
Director of Neurocritical Care Unit
Faculty of Medicine, Ain Shams University
President of the Egyptian Society of
Neurology, Neurosurgery and Psychiatry*

Prof. Dr. Samia Ashour Mohamed Helal

*Professor of Neurology
Faculty of Medicine, Ain Shams University*

Prof. Dr. Nevin Nabil Mahmoud Kasem

*Professor of Clinical Pathology
Faculty of Medicine, Ain Shams University*

Dr. Azza Abd El-Nasser Abd-Elaziz

*Lecturer of Neurology
Faculty of Medicine, Ain Shams University*

Faculty of Medicine
AIN SHAMS UNIVERSITY
(2002)

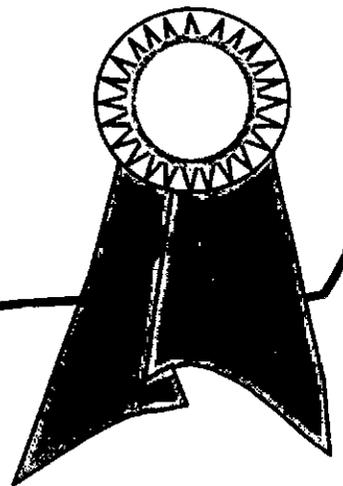

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

{ فَوَجَدَا عَبْدًا مِّنْ عِبَادِنَا آتَيْنَاهُ رَحْمَةً مِّنْ
عِنْدِنَا وَعَلَّمْنَاهُ مِن لَّدُنَّا عِلْمًا (٦٦) قَالَ لَهُ
مُوسَىٰ هَلْ أَتَّبِعُكَ عَلَىٰ أَنْ تُعَلِّمَنِي مِمَّا
عَلَّمْتَ رُشْدًا (٦٧) قَالَ إِنَّكَ لَنْ تَسْتَطِيعَ
مَعِيَ صَبْرًا (٦٨) وَكَيْفَ تَصْبِرُ عَلَىٰ مَا لَمْ
تُحِطْ بِهِ خُبْرًا (٦٩) قَالَ سَتَجِدُنِي إِن شَاءَ
اللَّهُ صَابِرًا وَلَا أَعْصِي لَكَ أَمْرًا قَالَ فَإِنِ
اتَّبَعْتَنِي فَلَا تَسْأَلْنِي عَن شَيْءٍ حَتَّىٰ أَحْدِثَ
لَكَ مِنْهُ ذِكْرًا } (٧٠)

صدق الله العظيم

سورة الكهف

Dedicated to
My Supportive Mother
&
To the Memory of My Kind Father

Acknowledgement

First and foremost thanks to **Allah**, The Most Beneficent and Merciful.

I would like to express my deepest gratitude to **Prof. Dr. Mohamed Anwar El-Etribi**, Professor & Chairman of Neurology Unit, Director of Neurocritical Care Unit, Ain Shams University, President of the Egyptian Society of Neurology, Neurosurgery and Psychiatry to whom. I owe very much, for planning and supervising this work, for his constructive criticism, and for his close valuable guidance all through this work. I will never be able to express my feeling toward him with simple word, and I wish to be able one day to return to him a part of what he had offered to me.

I would like to express my deepest gratitude and appreciation to **Prof. Dr. Samia Ashour Mohamed Helal**, Professor of Neurology, Faculty of Medicine, Ain Shams University for giving me so much attention and time, for gentle encouragement and for her generous character; continuous, constant meticulous help and her great effort with me in this study, despite many other demands on her time.

I am much obliged to **Prof. Dr. Nevin Nabil Mahmoud Kasem**, Professor of Clinical Pathology, Faculty of Medicine, Ain Shams University, for her faithful and sincere advise, much support and for helpful suggestions.

I am also grateful to **Dr. Azza Abd El-Nasser Abd El-Aziz**, Lecturer of Neurology, Faculty of Medicine, Ain Shams University for her follow-up of this work, her kindness, being all the time a professor, a sister and friend.

Great appreciation and gratitude to all my professors and colleagues in Neurology Department, Faculty of Medicine, Ain Shams University.

Appendix	
Arabic Summary	

List of Tables

No.	Title	Page
1	Factors affecting prognosis of epilepsy	24
2	Classification of hormones	91
3	Percent binding of the sex hormones to their carrier protein and sex hormone binding globulin.	98
4	Steroid hormone effects	126
5	Behavior and sex steroids	126
6	Estradiol in CNS	127
7	Testosterone effects in CNS	127
8	Age distribution among the studied sample	158
9	Age subgroups among the studied sample	159
10	Marital state among the studied sample	159
11	Age at onset of seizures among the studied sample	160
12	Age at onset subgroups among the studied sample	160
13	Duration of illness among the studied sample	161
14	Duration of illness subgroups among the studied sample	162
15	Type of epileptic seizures among the studied sample "100 patients"	162
16	No table numbered by "16"	
17	Medications received by the studied sample "100 patients"	164

No.	Title	Page
18	Response to therapy among the studied sample "100 patients"	165
19	Sexual dysfunction among the studied sample "100 patients"	166
20	Sexual dysfunction among partial and generalized epileptic patients according to the psychosexual questionnaire used.	167
21a	E.E.G data among the studied sample	170
21b	The site and laterality of focus among the partial epileptic patients	170
22	Laboratory data among the studied sample (100)	180
23	Laboratory data "qualitatively" among the studied patients with partial and those with generalized epilepsy	181
24	Comparison between patients with mono and polytherapy as regards the mean level of the studied hormones. All cases "quantitatively"	183
25	Comparison between cases with mono and poly therapy as regards the abnormality of the level of hormones "all cases" qualitatively.	185
26	Comparison between cases with poor and good response to treatment as regards the mean level of hormones "all cases; quantitatively"	186
27	Comparison between cases with poor and good response to therapy as regards the abnormality of the level of hormones all cases quantitatively.	187

No.	Title	Page
28	Descriptive statistics for the mean level of hormones among cases with total sexual dysfunction "all three items".	189
29	Comparison between cases treated with valproate and those not treated with VALP roate as regards the abnormality of the level of hormones.	190
30	Comparison between cases treated with carbamazepine (CBZ) and those not treated with CBZ as regards the abnormality of the level of hormones "All cases".	192
31	Comparison between cases within therapeutic level of CBZ and cases under therapeutic level as regards the abnormality of the studied hormones.	194
32	Comparison between cases within therapeutic level of VALP and cases under therapeutic level as regards the abnormality of the hormones	195
33	Comparison between cases treated with phenytoin and those not treated with phenytoin as regards the abnormality of the level of hormones "All cases".	197
34	Comparison between cases within therapeutic level of phenytoin and cases under therapeutic level as regards the abnormality of the hormones.	199

No.	Title	Page
35	Comparison between different age subgroups among all cases as regards the mean level of hormones	200
36	Comparison between duration of illness among all cases as regards the mean level of hormones	202
37	Comparison between cases with and without EEG findings as regards the abnormality of the level of hormones "All cases"	205
38	Correlation coefficient between age, age at onset and duration of illness and the studied hormones among all cases.	207
39	Correlation coefficient between age, age at onset and duration of illness and the studied hormones in patients with generalized epilepsy.	208
40	Correlation coefficient between age, age at onset and duration of illness and the studied hormones, in patients with focal epilepsy.	209
41	Comparison between the studied age subgroups, duration of illness, type of medication, EEG abnormality, response to therapy, and age at onset with the sexual dysfunction among all cases.	210
42	Comparison between site of focus in patients with partial epilepsy and abnormality of the studied hormones, sexual dysfunction.	211

No.	Title	Page
43	Comparison between laterality of focus in focal epileptic patients and abnormality of the studied hormones, sexual dysfunction.	213
44	Comparison between type of fits in focal epileptic patients and abnormality of the studied hormones, sexual dysfunction.	214
