Girl's college for Arts, Science
and Education

Implementing Watermarking Algorithms for Copyright Protection

THESIS

Submitted for Degree of
Master of Computer Science

BY:

Marwa Ali Abd Elhameed El Shahed

B.Sc. (2001)

Supervisors:

Prof. Dr. Samia Abdel Malak

Professor of nuclear physics, Girl's College for Arts, Science
and Education, Ain Shams University.

Dr. Khaled Ahmed Nagaty

Lecturer of computer science, Faculty of Computer and
Information Sciences, Ain Shams University.

Dr. Shadia Mohamed Talaat

Lecturer of Physics, Girl's College for Arts, Science and
Education Ain Shams University.

(2005)

شكر

أشكر السادة الذين قاموا بالإشراف و هم:

د. ١ / سامية عبدالملاك

أستاذ الفيزياء النووية - قسم الفيزياء-كلية البنات- جامعة عين شمس .

د / خالد أحمد نجاتي

مدرس بقسم علوم الحاسب-كلية الحاسبات و المعلومات - جامعة عين شمس .

د / شادية محمد طلعت

مدرس بقسم الفيزياء - كلية البنات- جامعة عين شمس .

كما أشكر أمي الحبيبة رمز الحنان و العطاء و أخوتي (عبد الحميد و أحمد و محمود) و زملائي الأعزاء و خاصة صديقتي الغالية رشا عز بكلية الحاسبات و المعلومات.

كلية البنات للآداب و العلوم و التربية

اسم الباحث : مروة على عبد الحميد على الشاهد.

الدرجة العلمية: بكالوريوس علوم- فيزياء و حاسب آلى.

القسم التابع له: الفيزياء.

اسم الكلية : كلية البنات للآداب و العلوم و التربية-جامعة عين شمس.

سنة التخرج : 2001

سنة المنح :

ACKNOWLEDGEMENT

First and foremost thanks to Allah, the most compassionate and the most merciful.

I would like to express my sincere thanks and deep gratitude to members of the supervising committee:

Prof. Dr. Samia Abdel Malak, Professor of nuclear physics - Girl's College for Arts, Science and Education, Ain Shams University, for her supervision, honest guidance and continuous encouragement.

Dr.Khaled Ahmed Nagaty, Lecturer of computer science, Faculty of Computer and Information Sciences, Ain Shams University, for his valuable assistance during the progress of this work and his kind, trustful help through the experimentation and for his encouragement and faithful discussions which has helped in achieving this thesis.

Dr.Shadia Mohamed Talaat, Lecturer of Physics, Girl's College for Arts, Science and Education Ain Shams University for her valuable assistance during the progress of this work.

Special thanks to ***my lovely mother*** for her patience and non-stopping support; really I have no words to express my feelings towards her. I would like to express my sincere thanks and deep gratitude to my brothers ***Abd Elhameed***, ***Mahmoud*** and ***Ahmed***. Finally, Special thanks to my friend ***Rasha Ezze*** for her useful help.

LIST OF CONTENTS

<i>List of figures</i> -----	VI
-------------------------------------	----

<i>List of tables</i> -----	XXI
------------------------------------	-----

Chapter one (Introduction).

1-1 Introduction -----	1
1-1.1 Information Hiding, Steganography and Watermarking-----	2
1-1.2 History of watermarking-----	3
1-2 Watermarking properties -----	6
1-2.1 Embedding effectiveness-----	6
1-2.2 Data payload-----	6
1-2.3 Blind or informed detection-----	7
1-2.4 Fidelity-----	7
1-2.5 False positive rate-----	7
1-2.6 Robustness-----	8
1-2.7 Security-----	8
1-2.8 Cipher and watermark keys-----	8
1-2.9 Cost-----	9
1-3 Types of watermarks -----	9
1-3.1 Visible watermarks-----	9
1-3.2 Invisible watermarks-----	10
1-3.3 Perceptible Vs. Imperceptible Watermark-----	11
1-3.4 Fragile Vs. Robust Watermark-----	11
1-4 Types of watermarking according to the content type -----	12
1-3.1 Video watermarking-----	12
1-3.2 Audio watermarking-----	13
1-3.3 Text watermarking-----	14
1-3.4 Watermarking graphical objects-----	15
1-3.5 Image watermarking-----	16
1-5 General Image Watermarking Features -----	16
1-6 Watermarking applications -----	17
1-6.1 Broadcast monitoring-----	17
1-6.2 Owner identification-----	18
1-6.3 Proof of ownership-----	18
1-6.4 Transaction tracking-----	18
1-6.5 Content authentication-----	19
1-6.6 Copy control-----	19

1-6.7 Device control-----	19
1-7 Attacks on Watermarks-----	20
1-7.1 The Jitter attack-----	21
1-7.2 The IBM attack-----	21
1-7.3 StirMark attack-----	21
1-7.4 The mosaic attack-----	22
1-7.5 Attack on echo hiding-----	23
1-7.6 Interpretation attacks-----	24
1-7.7 Attacks dependent on local signal statistics-----	25
1-7.8 The histogram attack-----	26
1-7.9 Attack based on partial knowledge of the watermark-----	27
1-8 Summary-----	27

Chapter two (Digital Image Watermarking Techniques).

Introduction-----	28
2-1 Spatial domain techniques-----	30
2-1.1 Least Significant Bit (LSB) modification-----	30
2-1.2 An adaptive digital image watermarking technique for copyright protection-----	34
2-1.2.1 The algorithm-----	34
2-1.2.2 Watermark embedding-----	35
2-1.2.3 Watermark extraction-----	36
2-1.2.4 Experimental results-----	36
2-2 Frequency domain techniques-----	39
2-2.1 Copyright protection of digital images by embedded unperceivable marks (Example for DCT) -----	40
2-2.1.1 The watermark system-----	40
2-2.1.2 Watermark casting-----	40
2-2.1.3 Watermark detection-----	42
2-2.2 A new wavelet-based scheme for watermarking images (Example for DWT) -----	44
2-2.2.1 Experimental results-----	47
2-2.3 Color image adaptive watermarking (Example for DWT and DHT) -----	49
2-2.3.1 The Watermarking algorithm-----	49
2-2.3.2 Watermark embedding-----	50
2-2.3.3 Watermark adaptation-----	51
2-2.3.4 Detection of watermark-----	52
2-2.3.5 Similarity measure-----	52
2-2.4 Adaptive watermarking for digital image protection-----	55

2-3 Hybrid techniques	58
2-4 Other techniques	59
2-4.1 A digital watermarking scheme based on ICA detection	59
2-4.1.1 Watermark embedding and detection	60
2-4.1.2 Simulation results	61
2-4.2 Robust image watermarking by subband DLT	63
2-4.2.1 Subband DLT and watermark casting	63
2-4.2.2 Watermark detection	66
2-4.3 VLSI implementation of visible watermarking for a secure digital still camera design	66
2-4.3.1 Algorithm 1	68
2-4.3.2 Algorithm 2	69
2-5 Summary	71

Chapter three (Implementing different watermarking techniques).

Introduction	72
3-1 Pixel based metrics	72
3-1.1 The mean square error (MSE)	72
3-1.2 The normalized mean square error (NMSE)	73
3-1.3 The signal to noise ratio (SNR)	73
3-1.4 The peak signal to noise ratio (PSNR)	73
3-1.5 The image fidelity (IF)	73
3-1.6 The maximum difference (MD)	74
3-1.7 Average absolute difference(AD)	74
3-1.8 Normalized average absolute difference (NAD)	74
3-1.9 The correlation quality (CQ)	74
3-1.10 The normalized cross correlation (NC)	75
3-1.11 Structural content (SC)	75
3-2 Embedding the watermark on color image	75
3-2.1 The watermark insertion using DCT	75
3-2.2 The watermark detection	76
3-2.3 Experimental results	77
3-3 Embedding the watermark in gray images by using different watermark strengths	82
3-3.1 Experimental results	83
3-4 Embedding the watermark in gray images using wavelet transformation	86
3-4.1 The watermark insertion	86
3-4.2 The watermark detection	87

3-4.3 Experimental results-----	88
3-5 Studying the relationships between the pixel based metrics and the watermark size-----	92
3-6 Studying the relations between the pixel based metrics and the watermark strengths-----	94
3-7 Summary-----	97

Chapter four (Distributed watermarking technique using local information measures).

Introduction-----	98
4-1 Proposed method-----	99
4-2 Block information measure-----	99
4-3 The proportion coefficients watermarking method-----	101
4-4 Watermark detection-----	103
4-5 Experimental results-----	105
4-6 Comparison between techniques-----	117
4-7 Inserting different watermarks -----	119
4-8 Summary-----	128

Chapter five (Image processing manipulation)

Introduction-----	129
5-1 Adding Gaussian noise-----	129
5-2 Using mean filter-----	137
5-3 Using Laplacian filter-----	145
5-4 Using difference filter-----	153
5-5 Compression-----	161
5-6 Summary-----	166

<i>Chapter six (Conclusion and future work) -----</i>	167
--	------------

<i>Appendices-----</i>	170
-------------------------------	------------

<i>References-----</i>	188
