Arabic Summary	

Acknowledgements

I am very grateful to Professor Afaf H. Khalil for inspiring me with the idea of this work, as to be honest, it would have been impossible to achieve such an effort without her precious directions and guidance. I would like to thank Professor Naglaa Al Mahallawy for all the effort she supported me with. Hereby I cannot deny all the help Prof. Gihan El-Nahas pledged me with. Last but not least, my deepest and most sincere grateful feelings are committed to Prof. Mohamed Fekry Eissa who stood by my side all way long as my teacher and my mentor. I would like to thank all my colleagues for their help. I would like to take a bow in respect for all psychiatrists whose researches have been the real base for all the work done. I am grateful to my family for their help and support. Finally, i can't be grateful enough for the support, care and effort of my beloved wife.

List of Abbreviations
