

**Ain Shams University
Women's College
Home Economics Department.**

Thesis

**Submitted For Requirements Of M.Sc
(Home Economics – Textile and Clothing)**

Entitled

**Requirements Of Manufacture
Clothes For Elderly Women With
Special Needs In The light Of
Technological Changes.**

By

Rania Sadek Saif Al Deen

Supervised by

Prof. Dr. Wafaa A.El. Sayed
Prof. of Textile chemistry and dyeing
Women's college
Ain Shams University .

Prof. Dr. Sawsan Abd El Latif
Prof. of Clothing Manufacture
Home Economic Faculty
Helwan University.

Dr. Maha Mohamdy Taha
Lecture of Textile and clothing
Women's College
Ain Shams University.

2009

Ain Shams University
Women's College
Home Economics Department.

Approval Sheet

THESIS Submitted For Requirements Of M.Sc Home
Economics Textile and clothing

Entitled Requirements Of Manufacture
Clothes For Elderly
Women With Special Needs In
The Light Of
Technological Changes

By : Rania Sadek Saif Al Deen

Approved by

Prof .Dr. Magda M.Madi Mahmoud -----
Prof of clothing manufacture, Home Economics faculty, Helwan university

Prof.Dr.Said M. Farag -----
Textile Consultant Egyptian Organization For Specification and quality

Prof.Dr.Wafaa A.EL sayed (supervisor) -----
Prof of textile chemistry and dyeing, Womens college, Ain Shams university

Prof.Dr. Sawsan A.Rezk (supervisor) -----
Prof of clothing manufacture, Home Economic faculty, Helwan university

Acknowledgement

First and finally thanks to **ALLAH** for giving me This opportunity, and patience to complete my thesis after all my difficulties.

I would like to express my deepest thanks to **prof. Dr.Wafaa Anwar El -Sayed**, professor of Textile chemistry and dyeing, Women's College, Ain Shams University, for her valuable supervision and sincere assistance.

I'm truly and deeply thanks to **prof. Dr. Sawsan Abd El-Latif**, professor of clothing manufacture, Home Economic Faculty, Helwan University for suggesting the thesis theme, she welcomed to my questions, encourage me, and pushed me to forward.

Also I would like to thank **Dr.Maha Mohamady Taha**, Lecture of Clothing and textile, Women's college; Ain shams University for her consistent supervision.

I would like to express my deepest thanks to **Chemistry Administration** for the valuable help, support, and continuous supplying of data required.

Thanks to all of staff members of Home Economic department and everyone who helped and supported me during the course of this thesis.

Last but not least, great thanks and appreciation go to my **Mother, Father, brothers** for their love, support and encouragement.

Title	Page
Summary	xiii
1. Introduction and literature of review	1
1.1. Definition of aging	1
1.1.1 Changes associated with aging	3
1.1.1.1. Body configuration and composition	3
1.1.1.2. Appearance	3
1.1.1.3. The skin	5
1.1.1.4. Bone	5
1.2. Anthropometric	6
1.2.1. Types of anthropometric measurements	7
1.2.2. Methods for collecting anthropometric measurements	7
1.2.2.1. Manual methods	7
1.2.2.1.1. a. Anthropometry tape	8
1.2.2.1.2. b. Restimeter	8
1.2.2.1.3. c. Weighing scale	8
1.2.2.1.4. d. Small sliding calipers	8
1.2.2.1.5. e. Body mass index (BMI)	9
1.2.2.2. Scanning method	10
1.2.2.2.1. [TC] ² Scanning and features 3D body scanner software applications	11
1.2.2.2.2. Symcad	11
1.2.2.2.3. Lass scanner	12
1.2.2.2.4. Wicks and Wilson	13
1.2.2.2.5. White light scanning	14
1.2.2.2.6. Laser scanning	15
1.3. Nature of anatomical construction of elderly women	16

1.4. Factors affect dimensional changes and external shape of elderly women	20
1.5. The body forms types	22
1.6. Consideration of elderly clothing	24
1.7. Fashion design.....	25
1.7.1. Elements of design.....	25
1.7.1.1. Line	25
1.7.1.2. Shape.....	25
1.7.1.3. Texture	26
1.7.1.4. Colour	27
1.7.2. Principles of design.....	27
1.7.2.1. Balance	27
1.7.2.2. Emphasis	27
1.7.2.3. Rhythm.....	28
1.7.2.4. Harmony	28
1.8. Cotton fiber	28
1.8.1. Cellulosic structure	29
1.8.2. Cotton fiber properties	30
1.8.2.1. Physical properties	30
1.8.2.2. Chemical properties	31
1.9. Fabric construction	31
1.9.1. weaving	31
1.9.1.1. Plain weaving.....	31
1.9.1.2. Twill weaving	32
1.9.1.3. Satin weaving.....	32
1.9.2. Knitted fabrics.....	32
1.10. Dyeing.....	32
1.10.1. Reactive dye.....	33
1.11. The mass production process.....	35
1.11.1. Design	35

1.11.2. Quick costing	36
1.11.3. Sample patterns.....	36
1.11.4. Sample garments.....	37
1.11.5. Production costing	37
1.11.5.1. Fabric cost.....	38
1.11.5.2. Finding cost.....	38
1.11.5.3. Labour cost and overhead.....	38
1.11.6. Production pattern.....	39
1.11.7. Grading	39
1.11.8. Making the marker.....	40
1.11.9. Cutting.....	40
1.11.10. Assembly.....	41
1.11.11. Finishing	41
2. Aim of the work.....	43-44
3. Experimental Work	45
3.1. Materials	45
3.1.1. Fabrics.....	45
3.1.2. Dyes.....	45
3.2. Methods.....	45
3.2.1. Reactive dyeing.....	45
3.2.2. Tie & dye method	45
3.3. Test method.....	46
3.3.1. Yarn number	46
3.3.2. Warp and weft sett	46
3.3.3. Fabric weight per unit area	46
3.3.4. Fabric stiffness	46
3.3.5. Fabric Thickness	46
3.3.6. Fabric Density	46
3.3.7. Tearing strength	47

3.3.8. Tensile strength and elongation in woven..... fabrics.....	47
3.3.9. Air permeability	47
3.3.10. Bursting strength.....	47
3.3.11. Abrasion resistance	47
3.3.12. Pilling.....	47
3.3.13. Colour strength	47
3.3.14. Wash fastness.....	48
3.3.15. Colour fast to light	48
3.3.16. Colour fast to abrasion.....	48
3.3.17. Colour fast to perspiration	48
3.4. Data diagnostic of measurement for Egyptian elderly women.....	49
3.4.1. The equipments using	50
3.4.2. The study sample	50
3.4.2.1. Age category	50
3.4.2.2. The count	50
3.4.2.3. Places	50
3.4.2.4. Periodical time	50
3.5. Suggested design.....	51
3.6. Pattern and layout	58
3.7. Cost and profit.....	74
4. Results and discussions.....	79
4.1. Physico mechanical properties of using fabrics	80
4.2. Reactive dye of using fabrics.....	81
4.3. Colour fastness.....	84
4.4. The statistical analysis of data collection	85
4.4.1. The means of weight according to factor of age ..	85

4.4.2. The means of weight according to factor of height.....	87
4.4.3. The means of measurements for some heights in sample study	89
4.4.4. The means of measurements for some widths in sample study.....	90
4.4.5. The means of measurements for some circumferences in sample study.....	91
4.4.6. The correlative relationship between the four measurements of body.....	91
4.5. The analysis for average standard	94
4.6. The means of body measurements for Egyptian elderly women with special needs using the centimeters unit.....	98
4.7. The cost and profit	99
5. Designs and products.....	109
5.1. Tie-dye technique	110
5.1.1. Random circle	110
5.1.2. Stripes	111
5.2. Screen printing.....	111
5.3. Embroidery	111
5.4. Batik.....	111
6. References.....	128-141
7. Appendix(1,2,3)	I
8. Arabic Summery	3-1

List of Figure

No	Name of figure	Page
1.	Four randomly selected patients from the ambulatory section of anursing home, illustrating short stature, osteoporotic kyphosis, and relatively lon extremities. From left to right	4
2.	Aging change in the bone-Muscle joints	5
3.	Tools used in Manual Method for taking Measurements	9
4.	Body scanning can help consumers to identify the clothes that fit them best	10
5.	Adressing room size scanner	10
6.	Lass hardware architecture	13
7.	Images of narrow and wide stripes(permission of wicks and wilson Ltd).....	14
8.	3D Scanning booth by camera of white light projection of the body(by permission of wicks and Wilson).....	14
9.	White light scanning left: scanning device capture in speck.center :projection of light pattern as stripes.right:projected sequence of binary coded stripes pattern	15
10.	Lasers scanning: in left laser stripe on the human body. In center: The schema of the triangulation method and in right The scanner unit is moved across the human body to scan its surface.	16
11.	Bad fit as a result of the constitutional age change ...	17

12. Large and extensive movements, as when pulling on garments over the hand or zipping up at the back are difficult when arms and shoulder are stiff....	18
13. Reaching the feet might be a difficult task when the hip and knee joints become less mobile.....	19
14. Classification for the body form according to relationship between bust and hip size.....	24
15. Chemical Structure of cellulose.....	30
16. The chromophores in dye molecules	33
17. Data diagnostic of measurements for Egyptian elderly women.....	49
18. The colour strength (K/S) for different fabrics using NovacronBr.Blue FN.G.....	82
19. The colour strength (K/S) for different fabrics usingNovacronBr.Blue FN.R.....	82
20. The colour strength (K/S) for different fabrics usingNovacron OrangeW.3R.....	83
21. The colour strength (K/S) for different fabrics usingNovacron RedFN.2BL	83
22. Means of weight and heights of research sample according to factor of age.....	86
23. Means of ages and weight of research sample according to factor of height.....	88
24. The differences between the means of measurements of some heights for the Egyptian elderly women in sample study.....	89

25. The differences between the means of measurements of some widths for the Egyptian elderly women in sample study.....	90
26. The differences between the means of measurements of some circumferences for the Egyptian elderly women in sample study	91
27. The percentage of each type of Egyptian elderly women in the research sample.....	96
28. The relationship between the different sizes and factors of height and weight.....	97

List of Tables

No	Name of Table	Page
1.	Types of somatotype for human body.....	22
2.	Shapes of body according to relationship between shoulder width and hip circumference..	23
3.	Component of dry cotton.....	29
4.	Physico-mechanical properties for knitted fabrics under examination	80
5.	Air permeability for knitted fabrics.....	80
6.	Physico –mechanical properties for woven fabrics under examination	80
7.	Air permeability for woven fabrics	81
8.	Different classes of reactive dye for cotton fiber.....	81
9.	Light and wash fastness of 100% cotton (knitted and woven) fabrics using different types of reactive dyes	84
10.	Colour fastness to abrasion (Dry and wet) for 100% cotton fabrics (knitted and woven) using different types of reactive dyes.	84
11.	Colour fastness to perspiration (acid and basic) for 100% cotton fabrics (knitted and woven) using different types of reactive dyes.....	84
12.	Means of weight between three groups of research sample according to factor of age	85
13.	(F) value between the three groups of research sample.....	86

14.	The Means of heights between the three groups of research sample	87
15.	(F) value between three groups for research sample.....	88
16.	The means of measurements for some heights in sample study	89
17.	The means of measurements for some widths in sample study	90
18.	The means of measurements for some circumferences in sample study	91
19.	The correlative relationship between the four basic measurement of the body(bust, waist, hip and total length)with the other measurements of the body.....	92
20.	The Analysis for average standard for Egyptian elderly women body types in each size.....	94
21.	The different type of the body, the number, and the percentage of each type in the research sample.....	95
22.	The Means of body measurements for Egyptian elderly women with special needs using the centimetres unit.	98
23.	The cost and profit for some implemented design.....	108

List of Patterns of Designs

1. Pattern of design (1).....	58
2. Pattern of design (2).....	60
3. Pattern of design (3).....	62
4. Pattern of design (4).....	64
5. Pattern of design (5).....	66
6. Pattern of design (6).....	68
7. Pattern of design (7).....	70
8. Pattern of design (8).....	72

List of Designs and Products

1. Design (1).....	112
2. Product (1).	113
3.Design(2).....	114
4. Product (2)	115
5.Design(3).....	116
6. Product (3)	117
7.Design(4).....	118
8. Product (4).	119
9.Design(5).....	120
10. Product (5).	121
11.Design(6).....	122
12. Product (6).	123
