Microlaryngeal Phonosurgery

An essay submitted for partial fulfillment of Master Degree in Phoniatrics

By

Amr Sayed Mohamed Mousa

M.B.B.Ch

Phoniatrics Resident, Medical Military Academy

Supervised by

Prof. Dr. Nahla Abd El-Aziz Rifaie

Professor of Phoniatrics
Faculty of Medicine, Ain-Shams University

Dr. Ahmed Mohamed El-Demerdash

Consultant of Phoniatrics Medical Military Academy

Dr. Sally Taher Kheir El-Din

Lecturer of Phoniatrics
Faculty of Medicine, Ain-Shams University

Faculty of Medicine
Ain-Shams University
2013

الجراحات الصوتية الدقيقة في الحنجرة

رسالة مقدمة لاتمام دراسة الماجستير في أمراض التخاطب

مقدمة من

الطبيب/ عمرو سيد محمد موسى بكالوريوس الطب والجراحة نائب أمراض التخاطب الأكاديمية الطبية العسكرية

تحت اشراف

الأستاذ الدكتور/ نهلة عبد العزيز رفاعي

أستاذ أمراض التخاطب كلية الطب - جامعة عين شمس

الدكتور/أحمد محمد الدمرداش أستشارى أمراض التخاطب الأكاديمية الطبية العسكرية

الدكتور/ سالى طاهر خيرالدين

مدرس أمراض التخاطب كلية الطب ـ جامعة عين شمس

كلية الطب جامعة عين شمس 2013

سورة العلق: آية (4-1)

LIST OF FIGURES

No.	Figures	Page
1	Lateral and posterior views of the larynx.	17
2	Ultra structure of the vocal fold.	19
3	Diagram showing phonatory and respiratory	
	glottis.	21
4	Vocal folds as seen by the laryngoscopy.	22
5	Normal histology of the V.F.	23
6	The vocalis muscle.	38
7	Basement membrane zone of the V.F.	43
8	Bilateral pointed V.F. nodules.	59
9	Symmetrical vocal fold nodules.	60
10	Nodules always occur in pairs.	61
11	Vocal fold nodules at its characteristic site.	62
12	Microhemorrhage in the subepithelial space in	
	case of vocal fold nodules.	65
13	Early vocal fold nodules.	68
14	Histopathology of fibrotic vocal fold nodule.	69
15	Nodules impair voice by blocking effective vocal	
	fold closure.	71
16	Asymmetrical V.F. nodules.	73

١

🕏 List of Figures 🗷

17	Vocal fold polyp.	76
18	Broad-based vocal fold polyp.	77
19	Early V.F. hemorrhagic polyp.	79
20	Vocal fold polyp with feeding vessels.	80
21	Histopathology of the vocal fold polyp.	81
22	Fibrous tissue core of the V.F. polyp.	82
23	Histopathology of fibrous V.F. polyp.	82
24	Hemorrhagic V.F. polyp.	84
25	Gelatinous V.F. polyp.	85
26	Gelatinous V.F. polyp showing patches of	
	hyaline degeneration.	86
27	Vocal fold cyst.	92
28	Epidermoid vocal fold cyst.	93
29	Rt.V.F. sequestration cyst and slightly edematous	
	Lt.V.F.	95
30	Epidermoid vocal fold cyst.	97
31	Vocal fold retention cyst.	98
32	Histopathology of vocal fold mucous cyst.	99
33	Histopathology of vocal fold retention cyst.	100
34	An ovoid cyst on the upper surface of the Rt.	
	vocal fold.	101
35	Lt. V.F. cyst with Rt. reaction.	104

🕏 List of Figures 🗷

36	Lt. V.F. cyst.	105
37	Reinke's space edema.	108
38	Polypoid degeneration.	109
39	Reink's edema of one vocal fold.	111
40	Reinke's edema due to faulty behavior (voice	
	abuse/misuse).	113
41	Histology of the Reinke's edema.	116
42	Severe Reinke's edema of both vocal folds can	
	make breathing difficult (vocal folds are	
	abducted in this picture).	119
43	Bilateral vocal process granuloma over the vocal	
	process.	123
44	Vocal process granuloma due to endotracheal	
	intubation.	126
45	Superficial ulceration of the vocal process	
	granuloma.	129
46	Large granuloma is attached to the vocal fold by	
	a stalk.	132
47	The wound created by the carbon dioxide laser,	
	showing the representative zones of injury.	145
48	Endotracheal tube size 4.0 mm.	164
49	Suspension laryngoscopy with jet ventilation.	166

🕏 List of Figures 🗷

50	Artist's representation of the microlaryngeal	
	phonosurgery technique described.	168
51	Laser surgery endotracheal tubes.	172
52	Direct laryngoscopes.	177
53	A Zeitels universal modular glottiscope.	179
54	The same patient position as Fig 55, with an	
	assistant supporting the patient's head.	179
55	Extension-Flexion (sniffing, Boyce-Jackson)	
	position.	180
56	Setting during microlaryngoscopy.	181
57	The patient in Extension-Flexion position is	
	maintained in elevated vector suspension by	
	the Boston University Gallows.	182
58	A sagittal view of the glottiscope tube in	
	position.	184
59	Laryngoscopes.	186
60	Flexible fibreoptic laryngoscope.	191
61	Design of a new curved rigid laryngoscope.	193
62	Setting during laryngeal exposure with the	
	curved laryngoscope.	194
63	Glottic view by video-laryngoscope.	198
64	Mini-microflap procedure.	210

65	Microscopic removal of Lt. V.F. cyst.	223
66	Phonosurgery for the vocal fold Reinke's edema.	227
67	The optical resonating chamber of CO2 laser.	238
68	Zone of damage with low pulse energy.	240
69	Tissue Interaction Types.	241
70	Power density versus spot size.	244
71	Laser in (A) focused and (B) defocused position.	246

LIST OF TABLES

No.	Tables	Page
1	Proteoglycans found in the human vocal fold.	35
2	Extracellular matrix pathology and genomic pathology of the benign vocal fold lesions.	53
3	Different types and definitions of phonosurgery.	152
4	Phonosurgical procedures due to diagnosis and indication.	154

LIST OF ABBREVIATIONS

AF	Anchoring fibers.
AFL	Anchoring filaments.
AP	Attachment plaques.
BMZ	Basement membrane zone.
CO2 Laser	Carbon dioxide laser.
DLP	Deep layer of lamina propria.
DP	Densa plate.
ECM	Extracellular matrix.
EM	Electron microscopy.
KTP Laser	Potassium titanyl phosphate laser.
Laser	Light amplification by stimulated emission of radiation.
LD	Lamina densa.
LFS	Laryngeal framework surgery.
LL	Lamina lucida.
LM	Light microscopy.
LP	Lamina propria.
LPR	Laryngo-pharyngeal reflux.

🕏 List of Abbreviations 🗷

MAPL's	Minimal Associated Pathological Lesions.
MLP	Middle layer of lamina propria.
Nd:YAG Laser	Neo-dymium: yttrium-aluminum-garnet Laser.
NMS	Neuromuscular surgery.
OR	Operating room.
PD	Power density.
PS	Phonosurgery.
RCS	Reconstructive surgery.
SLP	Superficial layer of lamina propria.
V.F.	Vocal fold.
VFS	Vocal fold surgery.
VPG	Vocal process granuloma.

Acknowledgement

First last of all, praise belongs to "ALLAH" the lord of all being, the kind and the merciful, who gave me the power to perform and complete this work. And prayer and peace be upon the most honorable of Messengers" MOHAMAD", prayers and peace be upon him.

I am much indebted to express my true respect and my deepest, warmest gratitude to my great supervisor **Prof. Dr.**Nahla Abd El-Aziz Rifaie, Professor of phoniatrics, Faculty of medicine, Ain-Shams University, who in addition to her valuable guidance and supervision, has provided me with a great deal of support, encouragement and knowledge.

I would like to express my sincere gratitude and cordial thanks to **Dr. Ahmed Mohamed El-Demerdash**, Consultant of phoniatrics, Medical Military Academy who gave me so much of his valuable time and immense knowledge to produce this work in its present form.

Particular deep thanks to **Dr. Sally Taher Kheir El-Din**, Lecturer of phoniatrics, Faculty of medicine, Ain-Shams University. The present work could not have been done without her help, her bright ideas and remarks together with her encouragement, excellent guidance and sympathetic attitude.

I would like to thank all my **professors and colleagues** of the Phoniatric unit, Faculty of medicine, Ain-Shams University, for their continuous advice and cooperation.

My deepest thanks to all staff members and colleagues in the phoniatric unit of **Kobre El-Kobba Military Hospital** for their constant support and encouragement.

Also, I would like to thank my family especially my mother & father for their great help and endless support.

I greatly thank **my wife**, my guiding light for every progress I make, every step I take and I do thank her for her intimate care during the entire work.

Lastly, this work is to my sweet heart, my daughter **Revan** and I wish her a bright future.

Amr Sayed Mousa.
