PROGNOSTIC FACTORS IN AORTOILIAC ANGIOPLASTY AND STENTING

Thesis

*Submitted for Partial Fulfillment of the M.D.
Degree in General Surgery*

By

Ahmed Gamal El-Dien Mahmoud

M.B.B.Ch. (M.Sc)

Supervised by

Prof. Dr. Mohamed Abdou Ay El-Dien

*Professor of General & Vascular Surgery
Faculty of Medicine
Cairo University*

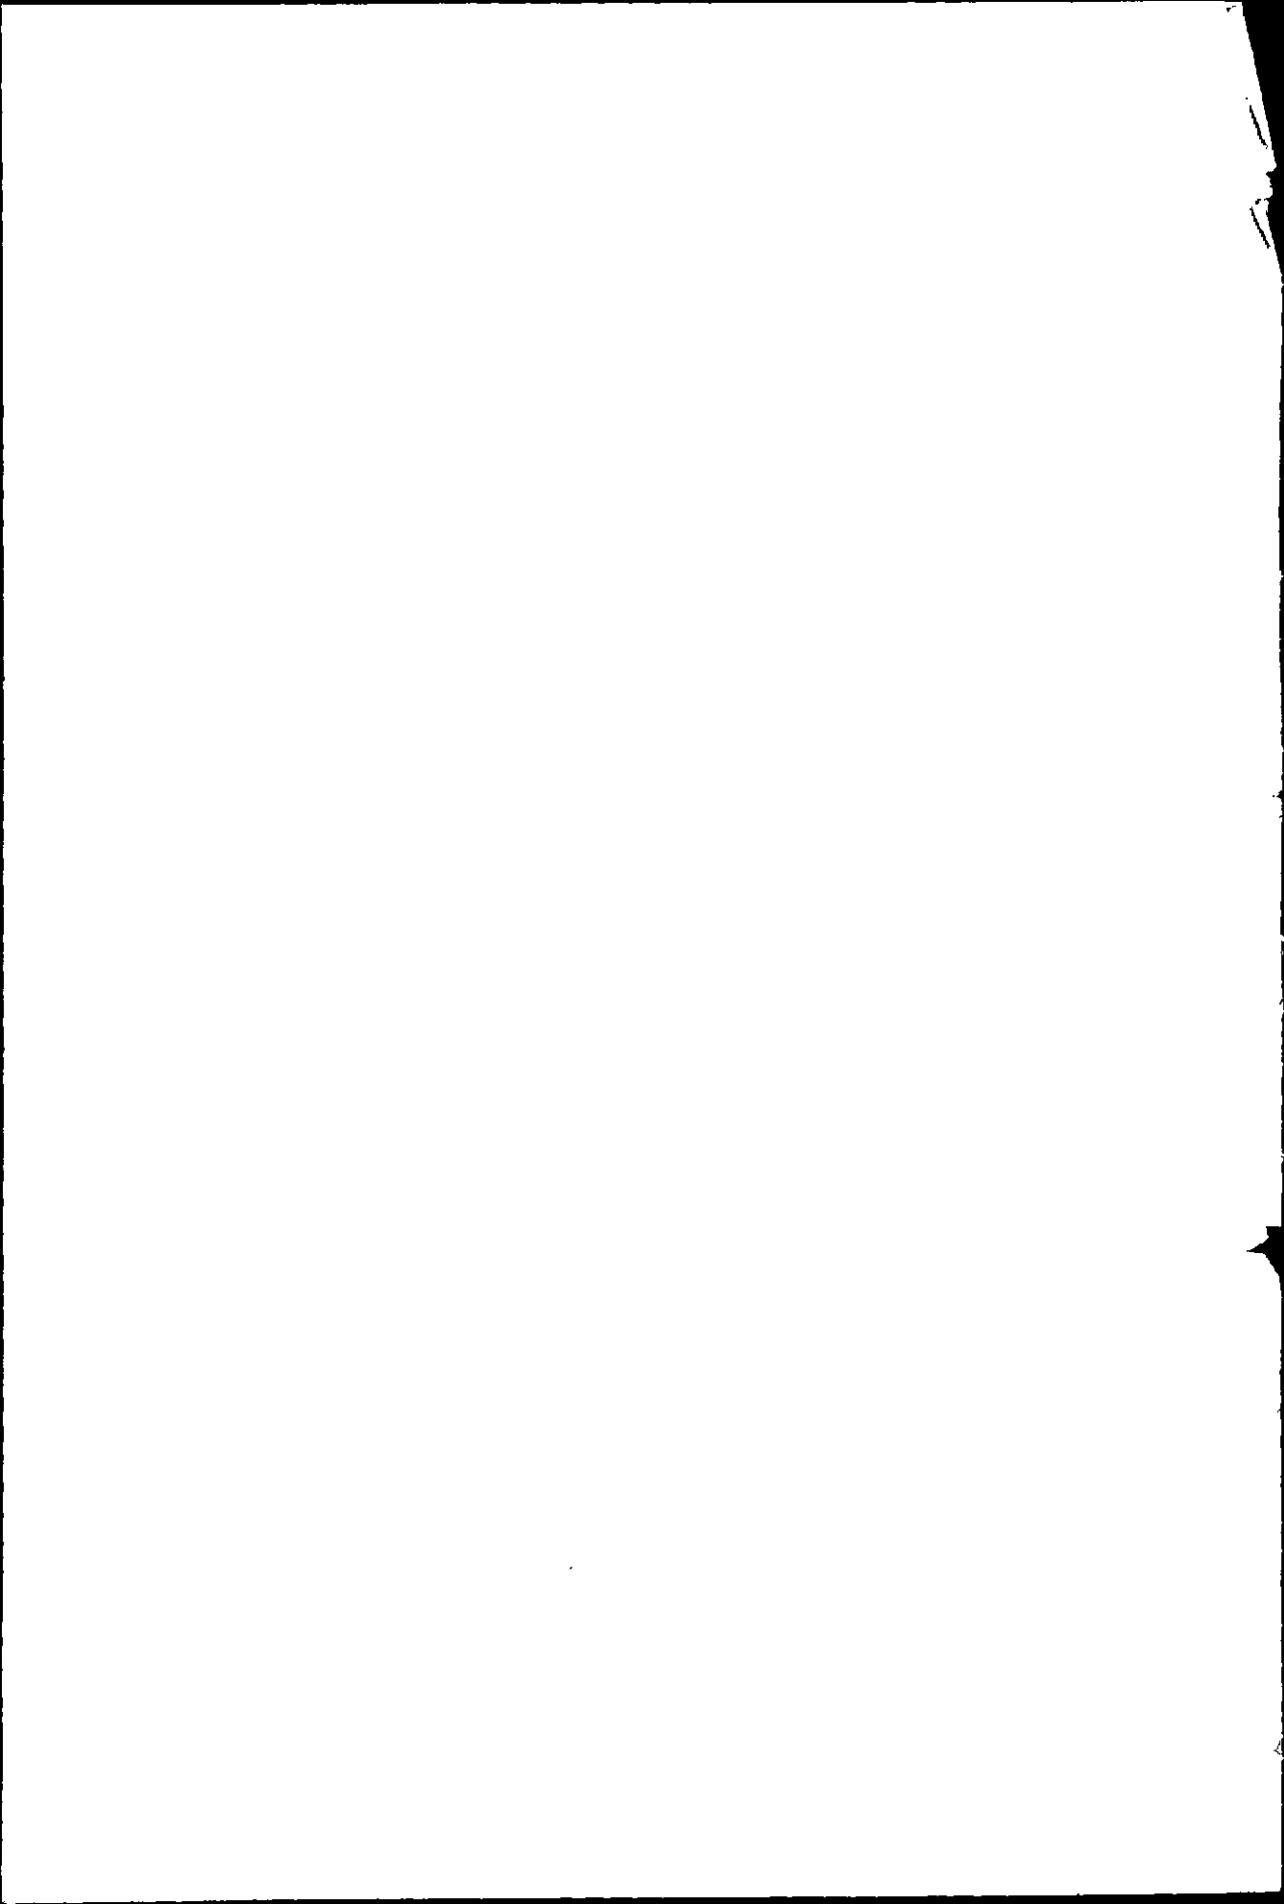

Prof. Dr. Mohamed Hosni El-Dessouki

*Professor of General & Vascular Surgery
Faculty of Medicine
Cairo University*

Prof. Dr. Mohamed Ashraf Shawky

*Assistant Professor of Critical Care Medicine
Faculty of Medicine
Cairo University*

Faculty of Medicine
Cairo University
2006

ACKNOWLEDGEMENT

First of all: all gratitude to "God" almighty who aided me to bring forth this thesis to light. Peace and blessing upon messenger of Allah and Whoever supports him.

I would like to express my appreciation and gratitude to all those who helped me in the completion of this work.

I would like to particularly extend my thanks to Prof. Dr. Mohamed Abdou for his valuable guidance and extreme kindness throughout the period of this study.

My best appreciation to Prof. Dr. Mohamed Hosni for his sincere help and support throughout the study.

I would like to thank Assistant Prof. Mohamed Ashraf for his sincere supervision throughout the period of this study.

I would also like to express my gratitude to Assistant Prof. Dr. Ayman El-Samadoni for his valuable assistance and collaborative aid in conducting this study.

Last but not least, I would like to thank my father, wife and my family for their patience and support without which the completion of this work would have not been possible.

Ahmed Gamal

Introduction	1
Aim of the Work	3
Review of Literature	
Chapter (I):	
Microanatomy	4
Chapter (II):	
Atherosclerosis	13
Chapter (III):	
Aortoiliac occlusive disease	27
Chapter (IV):	
Endovascular surgery of chronic lower limb ischemia	37
Chapter (V):	
Complications of endovascular procedures in diseases of the lower limb	48
Chapter (VI):	
Adjunctive medical treatment for peripheral arterial disease	58
Chapter (VII):	
Aortoiliac percutaneous transluminal angioplasty	65
Patients and Methods	88
Results	96
Discussion	119
Summary	133
Conclusion & Recommendation	136
References	138
Master Tables	
Arabic Summary	

LIST OF TABLES

Tables		Pages
1	Progression of atherosclerotic lesion	22
2	Fontaine classification of chronic lower limb ischemia	31
3	(SVS-ICCVS) categories of chronic lower limb ischemia	32
4	Factors affecting outcome of endovascular intervention for chronic lower limb ischemia	68
5	Categories of aortic and iliac lesions	77
6	American heart association guidelines for clinical improvement after percutaneous interventions	94
7	Patients demographics	97
8	Clinical indications	98
9	Anatomical locations of the lesions	99
10	Lesion morphology	102
11	Mean ABI at postintervention and 12 month follow-up	104
12	Number of balloon and self expandable stent	108
13	Types of stents	108
14	Diameter of stents	108
15	Procedure related complications	109
16	Factors prompting development of standards for assessing and reporting results of lower extremity endovascular intervention	119
17	Results of stent placement for iliac artery occlusion	125
18	Incidence of complications in aortoiliac angioplasty	131
19	Major complication rates for endovascular procedures	132

LIST OF FIGURES

Figures		Pages
1	Cross-section showing the layers of an artery	4
2	The wall of a muscular artery showing its three layers	8
3	Histological classification of atherosclerosis	20
4	Patterns of aortoiliac occlusive disease	29
5	Femoral artery pressure measurement	36
6	Balloon expandable stent	41
7	Self expandable stent (wall stent)	43
8	Intracoil stent	44
9	Self expandable stent	45
10	Different types of covered stents	47
11	Morphological stratification of iliac lesions	76
12	a) Crossing of lesion using guidewire b) Pre-dilatation (kissing technique)	80
13	Crossing the lesion using hydrophilic guidewire	81
14	Pre-dilatation using low profile balloon	83
15	Insertion of balloon expandable stent	84
16	Insertion of self expandable stent	85
17	Male of female patients	96
18	Risk factors for atherosclerosis	97
19	Indications for intervention	99
20	Lesion position	100
21	Mean ABI in the pre, immediate and follow-up period	101
22	TASC classification	102
23	TASC A classification	103
24	TASC B classification	103

25	TASC C classification	103
26	TASC D classification	103
27	Runoff status	104
28	Poor runoff with occlusion of SFA	105
29	Clinical assessment according to the AHA guidelines in the immediate and follow-up period	106
30	Double stents in the Rt. CIA	107
31	Flow limiting dissection	110
32	Stent fracture	111
33	Case number (14) pre & post treatment	112
34	Case number (7) pre & post treatment	113
35	Case number (8) pre & post treatment	114
36	Case number (3) pre & post treatment	115
37	Case number (5) pre & post treatment	116
38	Case number (25) pre & post treatment	117
39	Case number (17) pre & post treatment	118
