

Ain Shams University
Faculty of Women for Art, Science and
Education
Home Economics Department

Thesis

Submitted in requirements of Ph.D
(Home Economics- Textile and Clothing)

Entitled

**Modern approach of antimicrobial finishing
of textiles utilized in different purposes
creative designs**

By

Rania Nabil Shaker Gomaa

Assistant lecturer in Home Economics Dept.
Faculty of Women for Art, Science and Education
– Ain Shams University

Supervised by

Prof. Dr. Wafaa A. EL-Sayed

Prof. of Applied Textile Chemistry and Dyeing
Home Economics Dept.
Faculty of Women for Art, Science and
Education

Dr. Maha M. T. Eladwi

Assistant Professor of Textile and Clothing
Home Economics Dept.
Faculty of Women for Art, Science and
Education

Dr. Sherif Mousa Hussein

Assistant Professor of Microbiology
Botany Dept.
Faculty of Women for Art, Science and
Education

Dr. Nagah S. Ashour

Lecturer of Textile and Clothing
Home Economics Dept.
Faculty of Women for Art, Science and
Education

2013

Acknowledgment

Thank God for the wisdom and perseverance that he has been bestowed upon me during this research project, and indeed, throughout my life.

It gives me great pleasure in expressing my gratitude to all those people who have supported me and had their contributions in making this thesis possible.

There are no proper words to convey my deep gratitude and respect for my thesis and research advisor, Prof. Dr. Wafaa A. Elsayed Prof. of Applied Textile Chemistry and Dyeing. Faculty of women for Art, science and Education, Ain Shams University, she has inspired me to become an independent researcher and helped me realize the power of critical reasoning. She also demonstrated what a brilliant and hard-working scientist can accomplish .and for her great support in practical and personal life in teaching me how to be a responsible, independent and self confident.

It is with immense gratitude that I acknowledge the support and help of my supervisor Dr. Maha Eladwi Associate Prof. of textile and clothing, Home Economic Department Faculty of women for Art, science and Education, Ain Shams University, for the continuous support of my Ph.D study and

research, for her patience, motivation, enthusiasm, and immense knowledge. Her guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph.D study. Also I would like to express my deepest thanks for her precious friendship.

I would like to express my deepest sense of gratitude to my supervisor **Dr. Nagah Said Aashour** lecturer of textile and clothing, Home Economic Department Faculty of women for Art, science and Education, Ain Shams University, for her supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the work.

I gratefully acknowledge **Dr. Shreef Mousa**, Associate Prof. in Botany Department, Faculty of women for Art, science and Education, Ain Shams University, , for his support and providing all possible facilities to complete this work.

I am grateful to my best friends **Dr. Rehab Mahmoud** , **Dr. Naglaa Abd Elaazeem** and **Omnia khairy** lecturers of textile and clothing, Home Economic Department Faculty of women for Art, science and Education, Ain Shams University, ,for their sincere help and advice, and for being great supporting and understanding friends throughout many years.

Also I would like to thank **Dina M. nabih** assistant lecturer of textile and clothing, Home Economic Department Faculty of women for Art, science and Education, Ain Shams University, her great support and help. My sincere thanks must also go to the members of my thesis advisory and exam committee

Last, but not least, I would like to dedicate this thesis to my family. I deeply thank my parents my Dad Nabil my mum **Nahed** and my sisters **Nahla** and **Basima** and my young brother **Mohammad** for their unconditional trust, timely encouragement, and endless patience. It was their love that raised me up again when I got weary

And sincerely I thank with Love my husband **colonel Maged M. Taha** for Understanding me he has been my best friend and great companion, loved, supported, encouraged, entertained, and helped me get through this agonizing period in the most positive way, also I would like to thank my older son **Moez (mozo)** for being obeying and understanding boy and my new baby **Malek (Loca)** for not being so noisy this days.

Also to someone we lost recently and he gave me a lot of support along my life Uncle mohamad A.alhaleem.

Finally I would like to dedicate my success in any part of my life to my beloved grandmother **Taita Basseema** I missed u.

Summary	XIV
1. Introduction and literature review	1
1.1. Antimicrobial Finishing	1
1.1.1. Microbe	2
1.1.2. The conditions that required for the growth of the micro organisms	2
1.1.3. Requirements of Antimicrobial Finishing	
1.1.4. The Antimicrobial Finish	3
1.1.4.1. Leaching type (conventional antimicrobial)	3
1.1.4.2. Non - Leaching type	4
1.1.5. Antimicrobial Effect	4
1.1.6. Mechanisms of antimicrobial action	5
1.1.7. The Antimicrobial Agents	6
1.1.7.1. Metallic Salts	6
1.1.7.2. Quaternary Ammonium Salts	6
1.1.7.3. Magnesium Peroxide Based agents	6
1.1.7.4. Poly-Hexamethylene Biguandine (PHMBG)	6
1.1.7.5. Organic N – Halamins Compound	7
1.1.7.6. Chitosan	8
1.1.7.7. Dyes	9
1.1.7.8. Antibiotic	10
1.1.7.9. Crosslinked Polyols	10
1.1.8. Evaluation of Antimicrobial Activity	11
1.1.9 .Repellent Finishing	13
1.2. Textile Fibers	13
1.2.1 .Natural Cellulosic Fibers	14
1.2.1.1 Chemistry of Cellulose	14
1.2.1.1.2 Properties of Cotton Fiber	16
1.2.2 Regenerated Cellulose Fibers	17
1.2.2.1.Viscose Fibers Manufacturing	17

1.2.2..2. Properties of Viscose Fiber	19
1.2.3- Man- Made Fibers: (synthetic Fibers)	21
1.2.3.1 .Polyester Fibers	21
1.2.3.1.2 Polyester Fibers Manufacturing	22
1.2.3.1.3- Properties of Polyester Fiber	23
1.3. Dyeing	25
1.3.1.Colorants and dyes	25
1.3.2. Dye classification	27
1.3.2.1. Reactive dyes	27
1.4 Fashion	28
1.4.1. types of fashion design	28
1.4.1.1. Structural design	28
1.4.1.2 -Functional design	29
1.4.1.2.1 Functional design and fashion design	29
1.4.1.2.2.-Antimicrobial textiles and clothes	30
1.4.1.2.3.-Fabrics used in gowns and drapes	32
Fibers-yarns – fabric construction - finishes	
1.4.1.2.4. Fabric properties that influence barrier properties repellency – pore size)	33
1.4.1.2.5. Gown Design	33
1.4.1.3- Decorative Design	35
1.4.1.3.1- Types of Decorative Design	35
1.4.1.3.2-Trimming and Decoration	36
1.4.2.Design source	37
1.4.2.1. Photographs of Garments	37
1.4.2.2. Artifacts and Images	38
1.4.2.3 Natural Objects	38
1.4.2.4 Historic and Ethnic Costume:	38
1.4.2.4.1- Historic influence (Egyptian style-Greek style -Roman style -Empire style	38
1.4.2.4.2 -Folk dresses (Egyptian -Cowboy -African	43
1.4.2.5 Vintage clothing shops and services	46
1.4.2.6 Museums	46
1.4.2.7. Libraries and bookstores	46

1.4.2.8. Arts	46
1.4.2.9. Fabrics	47
1.4.2.10. Travel and Nature	47
1.4.2.11. Form Follows Function	47
1.4.2.12. The Street Scene	47
1.4.2.13. Awareness	47
 2- Aim of work	 48
 3. Experimental work	 50
 3.1. Materials	 50
3.1.1. Fabric	50
3.1.2. Chemicals	50
3.1.3. Microorganisms used.	50
3.1.4. Dyes and transfer printing paper	51
3.2. Methods	51
3.2.1 Treatment of different finishing agents	51
3.2.2. Alkali treatment of polyester fabrics.	52
3.2.3. Treatment of viscose, cotton and polyester fabrics with Polyethylene glycol (PEG).	52
3.2.4. Fabric Oil and Water Repellency treatment:	53
3.2.5. Dyeing of viscose and cotton fabrics with reactive and direct dyes.	53
3.2.6. The printing of polyester fabrics	54
3.3. Testing and analysis	54
3.3.1 Antimicrobial activity of the treated fabrics	54
3.3.1.1 Antibacterial activity	54
3.3.1.2 Antifungal Activity:	55
3.3.2. Physico- mechanical measurements	55
3.3.2.1. Fabric stiffness	55
3.3.2.2. Tensile strength and elongation	55
3.3.2.3. The air permeability of the fabric	55

3.3.2.4. The crease recovery angles	55
3.3.2.5. The evaluation of wettability	55
3.3.3. Color strength (K/S)	56
3.3.4. Fastness properties measurements	56
3.3.4.1. Light fastness	56
3.3.4.2. Wash fastness	56
3.3.4.3. Fastness to perspiration	56
3.3.5. Durability test	56
3.4. Designs, Pattern and layout:	57
3.4.1. Suggested Designs	57
3.4.2. The Patterns	66
4-Results and Discussion	74
4.1 Effect of different finishing agent on the antibacterial activity of cotton fabric	74
4.2. Treatment of cotton, viscose and polyester fabrics with Polyethylene Glycol	76
4.2.1 Effect of Polyethylene Glycol molecular weight: on the antibacterial activity	76
4.2.2. Effect of Polyethylene Glycol concentration on the antibacterial activity	78
4.2.3. Effect of citric acid concentration on the antibacterial activity	80
4.2.4. Effect of curing time and curing temperature on the antibacterial activity	82
4.3. Durability to laundering	83
4.4. Effect of polyethylene glycol (PEG) treatment of the physical and mechanical properties of cotton, viscose and	84

polyester fabrics

4.5 Effect of the dyeing on the antibacterial properties of PEG treated cotton and viscose dying with reactive and direct dye	85
4.6. Effect of polyethylene glycol treatment on the K/S of the cotton and viscose fabrics dyeing with reactive and direct dyes	86
4.7. Effect of polyethylene glycol treatment on the fastness properties of dyed fabrics	88
4.8. Effect of the transfer printing on the K/S values of polyester fabric treated with polyethylene glycol PEG	90
4.9. Effect of the transfer printing on the antibacterial properties of polyester fabric treated with polyethylene glycol (PEG).	91
4.10. Effect of the polyethylene glycol treatment on the fastness properties of transfer printed polyester fabric	92
4.11. Quantitative evaluation for viscose, cotton and polyester fabric against different type of microbes (<i>E.coli</i> , <i>S.aureus</i> , <i>A. niger</i> and <i>C.ablicans</i>)	93
4.12. Effect of the water-oil repellency treatment of wettability of cotton fabric treated with crosslinked polyethylene glycol and RUCOSTAR [®] EEE	94
4.13. Effect of water –Oil Repellency treatment on the antibacterial activity of cotton fabric treated with crosslinked PEG	96

5. Designs and products	97
5.1. Tie and Dye Technique:	97
5.2. Batik.	98
5.3 Stencil printing	99
5.4. Direct hand drawing	100
5.5. Crochet	100
5.6. The analysis of designs and products	101
