ENDOLYMPHATIC HYDROPS IN OTOSCLEROSIS

Thesis

Submitted in Partial Fulfillment of the Master Degree in Audiology

By

Mervat Mohamed Mahmoud Hassan

Supervised By

Prof. Dr. Salah El-Din Mahmoud Soliman

Professor of Audiology, E.N.T. Department

Faculty of Medicine, Ain Shams University

Dr. Iman Mohamed Sadek El Danasoury

Assistant Professor of Audiology, E.N.T. Department

Faculty of Medicine, Ain Shams University

 *Dr. Adel Ibrahim Abdel-Maksoud*

Lecturer of Audiology, E.N.T. Department

Faculty of Medicine, Ain Shams University

Faculty of Medicine
Ain Shams University
1999

 BAKA.

ACKNOWLEDGMENT

First and foremost, thanks to GOD to whom I relate any success in achieving any work in my life.

*I would like to express my greatest appreciation to **Prof. Dr. Salah El-Din Mahmoud Soliman**, Professor of Audiology, E.N.T. Department, Faculty of Medicine, Ain Shams University, for his precious guidness and support.*

*I wish to express my deepest gratitude to **Dr. Iman Mohamed Sadek El Danasoury**, Assistant Professor of Audiology, E.N.T. Department, Faculty of Medicine, Ain Shams University, for her continous efforts, great help, and giving much of her precious time and advice to bring this work to its form.*

*I'm very gratefull to **Dr. Adel Ibrahim Abdel-Maksoud**, Lecturer of Audiology, E.N.T. Department, Faculty of Medicine, Ain Shams University, for his unlimited support, encouragement and great assistance which have been of great help in final outcome of this work.*

I would like to express my gratitude to every member of Ain Shams Audiology Unit and to all my colleagues for their encouragement while accomplishing this work.

This work is dedicated to my Family.

Mervat Mohamed

CONTENTS

Subjects	Page
* Introduction	1
* Aim of The Work	3
* Review of Literature	4-42
• Otosclerosis	4
- Incidence and prevalence	4
- Genetic factors in otosclerosis	5
- Aetiology	6
- Pathology of otosclerosis	6
- Clinical features	8
- Incidence of endolymphatic hydrops in otosclerosis	13
- Clinical presentation	16
- Differential diagnosis of otosclerosis	19
- Treatment of otosclerosis	24
• Electrocochleography	29
- Cochlear microphonic	29
- Summating potential	30
- Auditory nerve action potential	33
- Electrodes for ECochG recording	34
- Clinical applications of ECochG	38
• Electrocochleography in otosclerosis	40
- Electrocochleography in conductive hearing loss .	40
- Role of electrocochleography in otosclerosis	41
* Materials and Method	43
* Results	47
* Discussion	60
* Conclusions	67
* Recommendation	68
* Summary	69
* References	70
* Arabic Summary.	

LIST OF TABLES

Table No.	Title	Page
1	Age and gender distribution of the study and control groups	47
2	Distribution of the main complaints in the study group.....	47
3	The number and percentage of patients complaining of vertigo, diminution of hearing tinnitus and those with positive	49
4	Mean (\bar{X}) and standard deviation (S.D) of air conduction thresholds in dBHL at different frequencies in the control group.	49
5	Mean and standard deviation of air and bone conduction thresholds in dBHL at different frequencies in the study group.....	50
6	Mean and standard deviation of air-bone gap at different frequencies in the study group.....	50
7	Number and percentage of type of hearing loss in the study group	50
8	Mean and standard deviation and range of speech reception thresholds (SRT) and word discrimination scores (WDS) in the study and control groups	52
9	Mean and standard deviation and range of speech reception thresholds (SRT) and word discrimination scores (WDS) in conductive and mixed hearing loss	52
10	Number and percentage of type of tympanograms in the study group	53

11	Mean and standard deviation of SP/AP amplitude ratio and latency of AP in the control and study groups	53
12	Number and percentage of endolymphatic hydrops in the study group	54
13	Comparison of the SP/AP amplitude ratio between males and females in the study group ...	54
14	Comparison between age of patients with and without endolymphatic hydrops	56
15	Comparison between duration of hearing loss in ears with and without endolymphatic hydrops	56
16	Comparison between duration of vertigo in patients with and without endolymphatic hydrops.....	57
17	Correlation coefficient (r) results of SP/AP amplitude ratio with age of the study group, duration of vertigo and duration of hearing loss....	57
18	Comparison between air conduction thresholds in dBHL at different frequencies in ears with and without endolymphatic hydrops	58
19	Correlation coefficient (r) results of SP/AP amplitude ratio with air conduction thresholds at different frequencies in the study group	58
20	Comparison between bone conduction threshold in dB-HL at different frequencies in the ears with and without endolymphatic hydrops.....	59
21	Correlation coefficient (r) results of SP/AP amplitude ratio with bone conduction thresholds at different frequencies.....	59

LIST OF FIGURES

Fig. No.	Title	Page
1	Normal click-evoked ECochG waveform	32
2	Normal and abnormal ECochG waveforms	32
3	The tympanic membrane ECochG electrode	44
4	Pie chart of distribution of the main complaint of the study group	48
5	Mean values for air conduction thresholds in dB HL of study and control group	51
6.	Pie chart of percentage of endolymphatic hydrops in the study group	55
