**MICROBIAL FLORA AND CHEMICAL
COMPOSITION OF RIVER NILE-WATER
AT DIFFERENT SITES IN EGYPT**

By

Safaa Mahmoud Ezzat
B.Sc. Microbiology (1993)

A thesis

*Submitted in partial fulfillment of the requirement for
the degree of Master of Science in Microbiology*

Department of Microbiology
Faculty of Science
Ain Shams University
2001

B 0594

**MICROBIAL FLORA AND CHEMICAL
COMPOSITION OF RIVER NILE-WATER
AT DIFFERENT SITES IN EGYPT**

Board of scientific supervisors

Prof. Dr. Ahmed B. Barakat

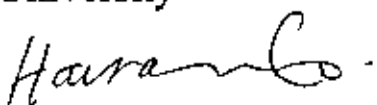

Prof. of Microbiology

Department of Microbiology

Faculty of Science, Ain Shams University

Dr. Hassan M. Gebreel

Assistant professor of Microbiology

Department of Microbiology

Faculty of Science, Ain Shams University

Dr. Tarek A. Tawfic

Assistant Professor of Environmental Chemistry &

Director of Central Laboratory for Environmental

Quality Monitoring – National Water Research Center

Department of Microbiology

Faculty of Science

Ain Shams University

2001

Approval sheet

Title of thesis :Microbial flora and chemical composition
of River Nile-water at different sites in
Egypt.

Degree :M.Sc. in Microbiology

Name of student :Safaa Mahmoud Ezzat

This thesis submitted for M.Sc. has been approved by:

Date: / /2001

ACKNOWLEDGMENT

First of all, I must thank *ALLAH* most gracious for helping me to go through this work.

My profound gratitude and appreciation to **Prof. Dr. Ahmed Barakat Barakat**, Prof. of Microbiology, Faculty of Science, Ain Shams University, who devoted lots of his time and interest in supervising this work with his valuable advice and generous assistance.

My deepest gratitude and sincere thanks to **Dr. Hassan Mahmoud Gebreel**, Assistant Prof. of Microbiology, Faculty of Science, Ain Shams University, for his efforts and valuable assistance to follow up the progress of this work with his continuous guidance.

I am sincerely thankful to **Dr. Tarek Abd El-Rahman Tawfic**, Assistant Prof. of Environmental Chemistry and Director of Central Laboratory for Environmental Quality Monitoring "CLEQM", for giving every possible help, facilities and support throughout this work.

Special thanks to every one in my family and my colleagues for their cooperation and kind encouragement.

TABLE OF CONTENTS

CONTENTS	Page
➤ Abstract	
➤ List of tables	
➤ List of figures	
➤ List of photos and maps	
<i>CHAPTER I</i>	
➤ INTRODUCTION AND AIM OF STUDY	1
<i>CHAPTER II</i>	
➤ REVIEW OF LITERATURE	4
I. Bacterial Contamination and Sanitary Water Quality	4
1.1. Sources and transport of bacteria in water	4
1.2. Indicator microorganisms of water pollution	5
(A) Total coliforms (TC)	6
(B) Fecal coliforms (FC)	6
(C) Standard plate count (SPC) bacteria	7
1.3. Overview of local water surveys	8
1.4. Worldwide water quality assessment	12
1.5. Bacterial pathogens in domestic wastewater	15
1.6. Epidemics related to water-borne pathogens	17
1.7. Evaluation of coliforms in relation to pathogens isolation	19
II. Chemical Pollution of Water	24
II.1. Trace metals contaminants of water and associated hazards	24
II.2. Incidence of trace metals in Egypt and all over the world	26
III: Sediment Quality Criteria as an Integral Part of The Aquatic Environment	28
III.1. Sediment texture classes	28
III.2. Sediment-bound bacteria	29
III.2.1 Sediments as reservoirs for fecal contamination	29
III.2.2. Impact of fecal polluted sediment on water quality	31

CONTENTS	Page
III.3. Problem sediments	32
III.4. Sediment/water interactions	34
III.4.1. Physical processes	35
III.4.2. Chemical processes	35
III.4.3. Biological processes	35
III.5. Assessment and remediation of contaminated sediment	37
III.5.1. Sediment toxicity effects on benthic community	37
III.5.2. Tests of Sediment Toxicity	37
CHAPTER III	
➤ MATERIALS AND METHODS	41
A) Sampling Locations	41
1) El-Tibeen drain	43
2) El-Rahawy drain	45
3) River Nile and Rosetta branch	48
B) Sampling Procedures	50
1. Water Sampling	50
2. Sediment Sampling	51
C) Methods of Analyses	51
1. Physico-chemical analyses of water samples	51
1.1 Temperature	51
1.2. pH	51
1.3. Electric conductivity (EC)	51
1.4. Dissolved oxygen (DO)	52
1.5. Turbidity	52
1.6. Ammonia	52
1.7. Biochemical oxygen demand (BOD)	52
1.8. Major anions	53
1.9. Major cations and trace metals	53
2. Bacteriological analyses of water samples	53
2.1 Enumeration of standard plate count (SPC) bacteria	53
2.2. Total coliform (TC) Count	54
2.3. Fecal coliform (FC) Count	55
2.4. Detection and isolation of <i>Escherichia coli</i>	56
2.5. Detection and isolation of <i>Pseudomonas aeruginosa</i>	57
